Balance service availability and quality through fit-for-purpose occupational entry regulations

What are the effects of occupational entry regulations? Please describe your experience and name the specific occupations you are referring to.

Without formal qualifications, I found it very difficult to get into even many Administration roles after being in admin roles for 29 years. I then decided to study a Cert III in Admin to become employable!

Do you believe current occupational entry regulations are proportionate to the level of risk associated with different professions? Why or why not? If not, do you have any suggested improvements to regulations to better reflect risks? Please name the specific occupations you are referring to.

I believe there are some proportionate levels eg. Doctor but when put into an admin/WHS role years ago, the experience gave me better understanding when I did study to gain formal qualifications. Going into that study with no prior knowledge or experience would have made the study less rewarding and more of a task/burden.

Which of the following best describes your connection to occupational entry regulations? Please select all that apply.
