Improve school student outcomes with the best available tools and resources

What (if anything) needs to be done to improve the use of edtech tools (including GenAI) in schools?

The participant did not respond to this question.

What more (if anything) needs to be done to improve awareness and access to high quality lesson planning and curriculum materials in schools?

The participant did not respond to this question.

Is there anything more you would like to say about edtech, GenAI or lesson planning and curriculum materials?

The participant did not respond to this question.

Which of the following best describes you?

The participant did not respond to this question.

Are you currently using any edtech tools (including learning games and GenAI) to support teaching and learning in the classroom?

The participant did not respond to this question.

If yes, what has been your experience with using these tools?

The participant did not respond to this question.

Are there things you would like to do with GenAI or edtech tools that you can't do currently? What's stopping you from doing these things?

The participant did not respond to this question.

If no, can you tell us why you are not using any edtech tools?

The participant did not respond to this question.

Do you access lesson planning and curriculum materials online?

The participant did not respond to this question.

If yes, what has been your experience with using these tools?

The participant did not respond to this question.

If no, can you tell us why you are not using online lesson planning and curriculum materials?

The participant did not respond to this question.

Support the workforce through a flexible post-secondary education and training sector

Credit transfer and recognition of prior learning

In your experience, how well does the credit transfer and recognition of prior learning system operate in Australia? Does it adequately support students to move between courses or have their work experience recognised as part of a qualification? Are there ways it could be improved?

In the financial technology sector, highly specialised and fast-evolving skillsets are common.

While the finance sector is one of the largest industries in Australia – with a particular focus

on commercial and consumer banking, other areas of specialty require ambitious executive to

go offshore to pursue their goals. The Electronic Market Making Industry has enabled these

executives to remain in Australia and pursue global and broader regional roles based here,

reducing the brain drain offshore.

Increasingly, the Electronic Market Making Industry requires specialist skills in AI and ML and Quantitative Research. Australia is not a world leader in these areas. China and the USA

are dominant sources of skills in these areas. A thriving regional industry based in Australia

would enable us to import these vitally important global talent pools into Australia, accelerating the adoption and expansion of skills and knowledge transfer in Australia.

EMMI would help stimulate further demand for STEM-trained professionals by anchoring high-skilled jobs in Australia.

In 2021, electronic market makers in Australia employed over 800 people and paid \$600 million in wages and bonuses. Around 95% of new hires hold STEM degrees, with average

graduate remuneration in excess of \$200,000 annually. Supporting the expansion of this industry through EMMI will have multiplier effects on talent retention and skills development.

Which of the following best describes you? Please select all that apply.

I am a former university student

In the past 3 years, have you applied for credit recognition or recognition of prior learning (RPL)?

The participant did not respond to this question.

If yes, what was your experience in applying for credit recognition or RPL like?

The participant did not respond to this question.

If no, can you elaborate on why you didn't apply?

The participant did not respond to this question.

Work related training

What are the main reasons individuals and/or businesses do or do not participate in work-related training?

Businesses like ours invest heavily in internal training because of the rapid pace of innovation and the niche skills required. However, public recognition of such training—particularly in areas like AI, ML, and quantitative finance—is limited. EMMI's support for companies investing in frontier financial technologies helps ensure such training is tied to real employment growth.

What role, if any, should businesses be playing to address any barriers and better support the offer of work-related training to employees?

Adoption of Electronic Market Making Incentive (EMMI) would signal a policy commitment to a high-skill economy, reinforcing government priorities in digital capability building, encouraging the private sector to source global talent in these fields and import them into Australia.

What, if anything, could government do to address barriers and better support the offer of work-related training to employees?

The participant did not respond to this question.

Which of the following best describes you? Please select all that apply.

I am an employee/individual

For business owners, managers and sole traders, how many employees do you have?

The participant did not respond to this question.

For employees/individuals, have you participated in any work-related training in the last 12 months that did not relate to general compliance (such as WHS)?

No

If yes, can you elaborate on the reasons for the training and any benefits you received from doing it?

The participant did not respond to this question.

If no, can you elaborate on any challenges or barriers you faced in attempting to undertake work-related training?

The participant did not respond to this question.

For business owners, managers or sole traders, have you provided or supported your employees to participate in work-related training in the past 12 months?

The participant did not respond to this question.

If yes, can you elaborate on the reasons for the training and any benefits you or your employees received from doing it?

The participant did not respond to this question.

Can you describe whether you accessed any government assistance, what type, and the amount received? If you didn't access any financial assistance, please tell us the reasons why.

The participant did not respond to this question.

If no, can you elaborate on any challenges or barriers you faced in attempting to provide or support your employees to undertake work-related training, such as the time or cost, availability of relevant or high-quality courses, and level of interest from your employees?

The participant did not respond to this question.

Balance service availability and quality through fit-for-purpose occupational entry regulations

What are the effects of occupational entry regulations? Please describe your experience and name the specific occupations you are referring to.

The participant did not respond to this question.

Do you believe current occupational entry regulations are proportionate to the level of risk associated with different professions? Why or why not? If not, do you have any suggested improvements to regulations to better reflect risks? Please name the specific occupations you are referring to.

The participant did not respond to this question.

Which of the following best describes your connection to occupational entry regulations? Please select all that apply.

The participant did not respond to this question.

Which state or territory are you predominantly based in?

New South Wales
