

‘Have your say on investing in cheaper, cleaner energy and the net zero transformation.’

Dear Productivity Commission,

The Fake Green, Weather Dependent Solar/Wind/BESS Energy Poverty Swindle DEFIES EVERY ASPECT OF THE NATIONAL ELECTRICITY LAW OBJECTIVE

‘The objective of the National Electricity Law is to promote efficient investment in, & efficient operation and use of, electricity services for the long term interests of consumers with respect to:-

(a) price, quality, safety, reliability and security of supply of electricity;

and

(b) the reliability, safety and security of the national electricity system;

and

(c) the achievement of targets set by a participating jurisdiction

(i) for reducing Australia’s greenhouse gas emissions; or

(ii) that are likely to contribute to reducing Australia’s greenhouse gas emissions.’

AEMO, AER, AEMC, Energy Ministers, Networks, Generators & everyone in 'authority', place primacy on emissions target rather than the other requirements of the NEL.

The emissions requirement was only added to the NEL in Sep 2023, and the NSW Emissions Reduction Act 2023 was only passed in Nov 23 (other states were similarly tardy to legislate any targets), - so on what basis did any Gov act prior to that to impose all this on us? Yet they all did, and still emphasise emissions over other objectives.

NEL is made in the SA Parliament, and in the 2nd reading, the Minister there also reiterated that ALL OBJECTIVES ARE EQUAL.

An IMMEDIATE MORATORIUM ON ALL OF THE RENEWABLE/INTERCONNECTOR NIGHTMARE IS ESSENTIAL as well as for all implementation of AEMO’s cyber security roles and Participant Fee structure;

A COMPREHENSIVE INDEPENDENT AUDIT into the cybersecurity supply chains, personnel, and third-party advisors involved—with a specific focus on identifying anyone subject to the CCP’s National Intelligence Law;

A ROYAL COMMISSION into the ideological capture, governance failures, and systemic conflicts of interest across AEMO, AER, AEMC, and other so-called independent energy bodies is essential.

A RETURN TO AN ENERGY POLICY BASED ON NATIONAL INTERESTS—affordable, secure, sovereign energy rooted in our existing coal-based assets, not the fantasy of renewables.

Australia cannot afford another day of sabotage disguised as ‘productivity.’

Yours Sincerely,

Lynette LaBlack
