Government spending and taxable income by agea,b,c
All governments, $’000 per person, 2011-12

a Estimates based on the age profiles of expenditure used in the study's projections. Where costs were not available by age, they were equally apportioned to all age groups. Health and education include both Australian Government and state and territory expenditures. **b** The 'Other' category includes the disability support pension, parenting payment, family tax benefit, disability support services (both Australian Government and state and territory), Other social security and welfare payments, defence and other expenditures and other state and territory expenditures not classified elsewhere. **c** Taxable income is per person who submitted an individual tax return in 2012.
