

We are in a remote area, with no mobile access at the homestead area or many parts of the property. Power failures often occur and our only reliable communication is landline, or radio contact from on the property to make a phone call for whatever is happening. Recently we had an emergency situation in Tibooburra (70kms) away. It had rained, I was unable to leave the property because of creeks and wet roads, the power was inconsistent and I was only able to communicate with the local hospital over the landline.
