Re: International Air Transport Enquiry

Dear Commissioner

The Australian Family Party, a fully registered political party with the SA Electoral Office.

We oppose the recommendations and the whole thrust of the draft report into International Air Transport Enquiry.

We want it known that many people and a greater percentage of Australians didn't, still do not and have not been given a say as to whether we want involvement with WTO and GATT, and especially the Multicultural Agreement on Investment.

We believe that there is no good purpose and indeed, there is evidence that our involvements with WTO and other like minded authorities is bad for the nation of Australia.

The Productivity Commission has a very biased direction to that of economic rationalist and supports National Competition Policy.

It is obvious that the people of Queensland object to such policies and the Productivity Commissioner should note this.

Also, the Australian Family Party and Australians have never approved selling assets that belong to the Australian people and not to the Liberal/National Party, Labor Party or the Productivity Commission.

Many if not most Australians oppose the selling of Australian airports which has been done without approval of the community.

The Australian Family Party opposes the draft report and looks forward to seeing what has happened with other obscene reports - total rejection by the Government.

Yours sincerely,

Rodney Johnstone
National President
