

Dear Productivity Commission,

I am fifth generation Australian and proud of the country and we need Holden as it is part of our history

The people I know wont buy Holden's if made overseas

The Holden is an Australian icon. Suggestion, I work in mines the amount of hire utes that are not Holden is huge, if the Government made it mandatory that mines hire only Holden utes then there would be no need to get the car companies out of the shit.

Keep Holden because I will buy them if made in Australia but not if made overseas

Kind Regards,
Patrick Hunter
