

Dear Productivity Commission,

I am the soul income earner in our family. We are paying a mortgage, car loan and education expenses for our Son as well as juggling a credit card debt, and living expenses.

It would ruin us.

My wife lost her job earlier this year and despite her best efforts has been unable to secure employment - we are under huge financial pressure and both my wife and myself under a huge amount of financial and emotional stress. If I lost my job - we would be totally ruined. We live with this fear, already, every day given the current situation with the auto industry.... We are trying to live as a happy healthy family - the potential of the loss of my wage is terrifying.

It's a sad sad day when one of the founding industries, which this great land has been built on, is allowed to die.

Foreshame on the Australian Government.

It gives the average Aussie very little to be proud of.

A personal plea from me & my family. We are just one family of many, who live law abiding lives, just trying to make an honest living. I implore those who have the ability to step up and help save the Austr-Liam Auto Industry to do so....in these hard and shaky economic times, don't take away the dream and hopes of the average man & his family. Help us!

Kind Regards,
Daniel McLachlan
