

Dear Productivity Commission,

Hi. I have a 5yo son and have a wife of 12 years. We have been renting for over 15years and we are wanting to buy a house

Im currently working as a manufacturer of hand cleaners, leather rejuvenating products, metal polish, etc.... all the products are aussie made!

Prieviously I have work in the auto accessories field for almost 10 years... alot of my mate r still in this industry and have families and mortgages

I think closing down the auto industry would definitely affect aussie familys. Lost jobs will cause alot of stress to families. Some people may not to be able to find new jobs because they have been in there current position for many years. Plus since gaining my drivers lic, I have always bought Holden

The automotive industry has playd a massive part in Australias economyand culture. I think we r becoming a country that only cares about \$\$\$\$. Aussies lookout for each other and I think the one's at the top have forgotten that!

Kind Regards,
Ben peperkamp
