

Dear Productivity Commission,

Im the sole income earner for a young family of four. Welder by trade, married with a Mortgage .

I emlore to look into the flow on effects, of an auto industry shut down. Not just the workers of the car companies, but the suppliers as well.

Any kind of shut down will be disastrous for the Australian economy. This country could not support that many people out of work.

Though it doesnt effect me directly , it would be a horrible eventuality for Millions of Aussies. Kids and towns, This would turn Australia back to the Dark ages .

Kind Regards,  
Michael Seymour
