

Dear Productivity Commission,

I have a family and work in the manufacturing industry

I know a few people who work for Holden in a dealership I have a cousin who did his apprenticeship with Holden in Sydney and is working in a Holden dealership and to have the industry close would be a total disaster we already import so much from overseas it is ridiculous we need to keep the cars here and it is about time the federal government stopped playing games and keep Holden alive instead of more unemployment

A total disaster for the whole of Australia and Manufacturing

Please keep Holden afloat at least they are wanting to stay not like Ford get the money and then walk

Kind Regards,
wayne kerrigan
