

Dear Productivity Commission,

No mortgage, not a student. 70 something with family dependent on the motor industry

Jobs are disappearing on a daily basis and our prisons can't cope with the numbers, many there for petty thefts because they can't make ends meet.

All that is happening now will just get worse.

The government we have at present cant be trusted. The are reneging on so many of their pre election promises that I fear for the future over the next three years. They have no further thought t Han

Kind Regards,
Cheryl Birch
