

Dear Productivity Commission,

married with 2 boys and have a mortgage

out of work, only trade I know and no chance of getting a similar job, and no way to get the same wages

jobs, with all the forecasts jobs going, where are the new replacement jobs going to come from, what will Australia become a tourist industry with everybody working at take ways or Bunnings? Where are the 200,000 replacement jobs going to come from, and what crap are we going to drive, china built cars, thought we had enough people dying on the streets now without putting more of these coke cans on the road.

My life and current standards of living will be removed and little to no chance of ever finding something that will replace both my career or income

Kind Regards,
Kent Hill
