

Dear Productivity Commission,

I am a working in the local government area of waste water treatment and have a family and a mortgage.

We should be supporting the Australian auto industry and buying Australian made cars instead of importing cheap imports from China, Korea. The auto industry is an icon of Australian manufacturing and the government should be subsidising us to buy Australian made cars.

Closing down the auto industry will put another in the coffin of Australian manufacturing. Do we want to be buying everything from overseas. We should be proud of the auto industry and should support it not turn our backs on it.

This is important to me as i don't want to see more Australians out of work. We should be building the manufacturing industry not knocking it down. Subsidize us with \$3000 to \$5000 to buy Australian made cars and support the auto industry.

Kind Regards,  
Andrew Haden
