

Dear Productivity Commission,

I am a mature age bus driver with a mortgage and a family and I wonder how they will survive if all our jobs are exported in the name of efficiency

less jobs mean less money means less spending means less jobs .. a downward spiral

this would be a typical example of govt short term thinking.. the same as selling of all our assets ... we will be left being held hostage by foreign powers either govt or private

it is a disgrace that govt and govt depts are so short sighted and will not protect our own people over foreign people.. all our jobs sent overseas and we will be left with nothing .. we will end up lower than a third world country .. with no industry left we will not need a productivity commission which is just as well as we will have no tax money to pay them

Kind Regards,
