

Dear Productivity Commission,

I am working in Toyota Australia as a Engineer since 2010.I am married and father of a child. I have a mortgage. I am the only earning person in my family.

If Auto industry shutdown It affect me,my wife and child. My wife is currently not working as she taking care off my 3 months old baby. I am not sure how I feed my family if I lost the job. I will be homeless too if I lost my job.

If the Auto industry closing down a lot of people will loose their job.Many Australian family will suffer financially. More Auto industry is part of our national pride.We have developed skilled workers, technicians trades, engineers over many many years of our trades. Some of our world class vehicles cross our boundary and reaches many countries of the world. We certainly not expecting to loose our vehicle industry.

The sustainability of the Automotive industry means a lot to me my family, friends, colleagues. Without a job in this industry I won't survive.The industry is important to the Australian economy, contributing an estimated \$50 billion to national GDP over the last decade.

It is part of our manufacturing base.

It is important to jobs, directly employing over 45,000 Australians, and supporting many more jobs indirectly.

And the industry is also vital to communities and families – particularly those in Victoria and South Australia.

Kind Regards,
Jack Zakaria
