

Dear Productivity Commission,

Retired professional engineer

not affected

I hope you will take into consideration what other countries do to assist their car industries particularly Sweden, a far more advanced and sophisticated society than we are. They subsidise their car industry to the tune of \$330 per head of population because they have carefully calculated the benefits that flow from making that investment.

We provide \$18 per head. Please do not go down the Thatcherite road of blind obedience to the free market and to hell with the consequences

This is important directly or indirectly to the whole of Australia

Kind Regards,
Geoffrey Bond
