

Dear Productivity Commission,

I support manufacturing in australia.

Enough jobs are going overseas

We need to support this industry and the families that it supports.

One more industry gone.

Where will the young poeple get a job if there is nothing left?

More jobs gone.

What will become of Australia

This not just a car industry it is a broad section of are community.

Families,Husbands,Wifes,children.

Let the car industry go and it will not come back.

You have one chance to save a family

One chance.

Kind Regards,

Glenn Shields
