

Dear Productivity Commission,

I am a self employed man with 7 children

I am a taxi operator any industry shedding jobs reduces my income

The loss of the auto industry and 200000 jobs would destroy the hopes and dreams of over a million Australians many being children. Small business across the country would suffer and many close their doors. My industry suffered greatly in qld when the state government sacked 14000 workers with takings dropping 30 percent imagine the damage of 200000 lost jobs.

As australians we never give up we work hard and find solutions .Please do not give up on these hard working people their families and their local communities and send a a wave of despair throughout the country .Stand up for Australian jobs because without jobs there is no Australia.

Kind Regards,
Anthony Powell
