

As a Mother and former child care worker I agree that the parallel import of books is going to ruin the education of our children. It is complicated enough with the television being so Americanised without the introduction of US equivalent picture story books as well.

Cheaper is not always better. I had to correct my 3 1/2 year old yesterday when he ended the "ABC" song with a ZEE instead of a ZED. Please don't make it any more confusing for him and other Australian children.

Please say NO to the Coalition for Cheaper Books

Thank you
