

NSW
Farmers
Association

Please describe how native vegetation and biodiversity/threatened species laws have impacted on your:

Farming practices (your day to day operations)

Nil

Productivity (ability to develop existing or new land)

Original block cleared & developed pre carr. Just bought new block which has 600 acres of scrub. No chance of being cleared.

Sustainability (the ability to improve your land and the environment)

Property vales and returns

Scrub country largely unproductive thus reducing returns. Cleared country \$175 acre - Scrub \$30 acre.

Investment patterns (either on- or off-farm)
