

Thank you for allowing me to speak at the Melbourne Hearing. Having been given the opportunity to make a suggestion for the record, I wish to suggest the following :-

1. To Legislate that "All new buildings should be piped with provision for Toilets and Gardens to use "other than Drinking Quality" water. (This may be "Purple Pipe" recycled water, or, Harvested or collected water.)
2. To Legislate that all new Building Developments, both Domestic and Commercial should be required to install Two sets of pipe work for incoming water and One set for sewer drainage.

I would also like to reiterate that we need to properly plan our cities and our urban developments whereby we Legislate and Regulate the areas we Develop for Industrial, Commercial and Residential purposes. These should all be developed with a view to our sustainable future. Water Storage, Recycling and Usage should all be considered. These areas should all, also provide Environmental Water areas such as Lakes or similar water ways. It is essential that Trees and Vegetation be nurtured in all areas to encourage rainfall.

Thank you again for allowing me to attend and speak at the Hearing. It was most informative and enlightening. I am very happy that our future is in good hands. Thank you once again.

Neil Nicholas
