(a) Data on the number of notifications by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered to have a high level of reliability.

(b) See notes to table 9A.1.2 for how the data were defined and collected.

(c) In 2003-04, NSW was unable to provide full data due to ongoing implementation of a new reporting system.

- (a) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.
- (b) Data from 2002-03 should not be compared previous years. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.
- (c) In 2003-04, NSW was unable to provide full data due to ongoing implementation of a new reporting system.
- (d) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.
- (e) Care should be taken in interpreting the rates for Indigenous children due to the relatively small size of the Indigenous population.

| (f) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004. | | | | | |

(a) Prisoners who have had previous imprisonment in another state or territory may not be counted as having prior imprisonment. Some states and territories may also include episodes on remand as prior imprisonment. See Glossary of *Prisoners in Australia (ABS Cat no 4517.0)* for complete definition of prior imprisonment.

(b) The majority of full-time prisoners sentenced in the ACT are held in NSW prisons.

(c) The ACT in NSW figures are a subset of the NSW figures and are not separately counted in the Australian totals.

(d) Includes 292 prisoners whose Indigenous status was unknown

— Nil or rounded to zero.
