Steering Committee for the Review of Government Service Provision

Mr Paul McClintock AO
Chairman
COAG Reform Council
Level 24, 6 O'Connell Street
SYDNEY NSW 2000

Dear Mr McClintock

In accordance with Schedule C of the *Intergovernmental Agreement on Federal Financial Relations* I am pleased to submit to you the Steering Committee's report on the performance data for the *National Disability Agreement*.

This report is one of four Steering Committee reports that provide performance data on the National Agreements related to healthcare, affordable housing, disability and Indigenous reform. A separate appendix provides additional contextual information to assist in interpreting the information in this report.

This report was produced with the assistance of Australian, State and Territory Government departments and agencies, and a number of statistical bodies. The Steering Committee would like to record its appreciation for the efforts of all those involved in the development of this report.

Yours sincerely

Gary Banks AO
Chairman

23 December 2011

This Report

The Steering Committee for the Review of Government Service Provision was requested by COAG to collate information relevant to the performance indicators in the National Agreements, and to provide it to the COAG Reform Council. The COAG Reform Council subsequently requested the Steering Committee to include information on all categories of performance information set out in each National Agreement, including those variously referred to as performance indicators, progress measures, outputs, benchmarks and targets.

The information in this report is an input to the COAG Reform Council's analysis. To facilitate the COAG Reform Council's work, this report contains the following information:

- background and roles and responsibilities of various parties in National Agreement performance reporting
- contextual information relevant to the *National Disability Agreement*
- overview of the outputs, performance indicators, performance benchmarks and key issues in performance reporting for the *National Disability Agreement*
- individual indicator specifications and summaries of data issues
- attachment tables containing the performance data. The electronic version of this report contains electronic links between indicator specifications and attachment tables, to assist navigation through the report. Attachment tables are also available in excel format.

The original data quality statements provided by data collection agencies are also provided as an attachment to this report.

Steering Committee

This Report was produced under the direction of the Steering Committee for the Review of Government Service Provision (SCRGSP). The Steering Committee comprises the following current members:

Mr Gary Banks	Chairman	Productivity Commission
Mr Ron Perry	Aust. Govt.	Department of Prime Minister and Cabinet
Mr Peter Robinson	Aust. Govt.	Department of the Treasury
Mr Mark Thomman	Aust. Govt.	Department of Finance and Deregulation
Dr Meg Montgomery	NSW	Department of Premier and Cabinet
Mr Kevin Cosgriff	NSW	NSW Treasury
Mr Simon Kent	Vic	Department of Premier and Cabinet
Mr Tony Bates	Vic	Department of Treasury and Finance
Ms Amanda Scanlon	Qld	Department of the Premier and Cabinet
Ms Janelle Thurlby	Qld	Queensland Treasury
Mr Warren Hill	WA	Department of the Premier and Cabinet
Mr David Christmas	WA	Department of Treasury and Finance
Mr Chris McGowan	SA	Department of the Premier and Cabinet
Mr David Reynolds	SA	Department of Treasury and Finance
Ms Rebekah Burton	Tas	Department of Premier and Cabinet
Ms Pam Davoren	ACT	Chief Minister's Department
Ms Jenny Coccetti	NT	Department of the Chief Minister
Mr Craig Graham	NT	NT Treasury
Mr Trevor Sutton		Australian Bureau of Statistics
Mr David Kalisch		Australian Institute of Health and Welfare

People who also served on the Steering Committee during the production of this Report include:

Ms Sue Vroombout	Aust. Govt.	Department of the Treasury
Ms Liz Develin	NSW	Department of Premier and Cabinet
Mr Tony Stubbin	NT	NT Treasury
Mr David de Carvalho	Aust. Govt.	Department of Finance and Deregulation

National Disability Agreement performance reporting

Attachment tables

Data for the performance indicators in this report are presented in a separate set of attachment tables. Attachment tables are identified in references throughout this report by a 'NDA' prefix (for example, table NDA.3.1).

About this report

Background to National Agreement reporting

In November 2008, the Council of Australian Governments (COAG) endorsed a new Intergovernmental Agreement on Federal Financial Relations (IGA) (COAG 2009a). COAG reaffirmed its commitment to the IGA in July 2011 (COAG 2011a). The Ministerial Council for Federal Financial Relations (MCFFR) has general oversight of the operations of the IGA [IGA para. A4(a)].

The IGA includes six National Agreements (NAs):

- *National Healthcare Agreement*
- *National Education Agreement*
- *National Agreement for Skills and Workforce Development*
- *National Affordable Housing Agreement*
- *National Disability Agreement*
- *National Indigenous Reform Agreement*.

COAG also agreed to National Partnership (NP) payments — to fund specific projects and to facilitate and/or reward states and territories that deliver on nationally significant reforms.

Five of the NAs are associated with a national Specific Purpose Payment (SPP) that can provide funding to the states and territories for the sector covered by the NA. These five SPPs cover schools, vocational education and training (VET), disability services, healthcare and affordable housing. The *National Indigenous Reform Agreement* is not associated with a SPP, but draws together Indigenous elements from the other NAs and is associated with several NP agreements.

Under the reforms, each NA contains the objectives, outcomes, outputs and performance indicators for each sector, and clarifies the respective roles and responsibilities of the Commonwealth and the states and territories in the delivery of services. The performance of all governments in achieving mutually agreed outcomes and benchmarks specified in each NA will be monitored and assessed by the COAG Reform Council (CRC).

At its 7 December 2009 meeting, COAG agreed to a high level review of the NAs, NPs and implementation plans. On 13 February 2011, COAG noted a report on this review and agreed to further reviews of the performance indicator frameworks within each NA (COAG 2011b). The review of the National Disability Agreement (NDA) performance indicator framework is to be completed by end-December 2011 (too late for inclusion in this report) (COAG 2011c). It is anticipated that the outcomes from the review will be included in future cycles of NDA reporting.

National Agreement reporting roles and responsibilities

The IGA states that:

> para. C5 — The performance reporting framework for the National Agreements is based on:
>
> (a) high-level performance indicators for each National Agreement;
>
> (b) the *Steering Committee for the Review of Government Service Provision* (the Steering Committee) having overall responsibility for collating the necessary performance data; and
>
> (c) the [CRC] publishing performance data relating to National Agreements, and National Partnerships to the extent that they support the objectives in National Agreements, within three months of receipt from the Steering Committee, along with a comparative analysis of this performance information that:
>
> i. focuses on the high-level National Agreement performance indicators;
>
> ii. highlights examples of good practice;
>
> iii. highlights contextual differences between jurisdictions which are relevant to interpreting the data; and

iv. reflects COAG's intention to outline transparently the contribution of both levels of government to achieving performance benchmarks and to achieving continuous improvement against the outcomes, outputs and performance indicators.

The CRC are considering the impact of NPs on the achievement of the objectives of the NAs [para. C5 (c)]. The CRC has not requested the Steering Committee to include any performance data related to NPs in this report.

The IGA further specifies that:

> The Steering Committee will provide the agreed performance information to the COAG Reform Council, desirably within three months and no later than six months after the reporting period to which the data relates. [para. C10]
>
> Performance information in respect of the education and training sectors will be on a calendar year basis, commencing with performance information for 2008, and for all other sectors will be on a financial year basis, commencing with performance information for 2008-09. [para. C11]
>
> …the *Steering Committee* will comment on the quality of the performance indicator data using quality statements prepared by the collection agencies which set out the quality attributes of the data using the Australian Bureau of Statistics' Quality Framework. [para. C12]

Role of the CRC

The IGA states that:

> … the [CRC] will report to the Prime Minister…on:
>
> a) the publication of performance information for all jurisdictions against National Agreement outcomes and performance benchmarks;
>
> b) production of an analytical overview of performance information for each National Agreement, and National Partnership to the extent it supports the objectives in a National Agreement, noting that the [CRC] would draw on a range of sources, including existing subject experts;
>
> c) independent assessment of whether predetermined performance benchmarks have been achieved before an incentive payment to reward nationally significant reforms under National Partnerships is made;
>
> d) monitoring the aggregate pace of activity in progressing COAG's agreed reform agenda; and
>
> e) other matters referred by COAG. [para. A11]

The IGA further specifies that:

> The [CRC] will provide annual reports to COAG containing the performance data. It will also report its own comparative analysis of the performance of governments in

meeting the objectives of the National Agreements. The reports will also highlight examples of good practice and performance so that, over time, innovative reforms or methods of service delivery may be adopted by other jurisdictions. The parties [to the IGA] will provide the [CRC] the information necessary for it to fulfil its role, as directed by COAG. [para. C14]

The [CRCs] reports should be provided to COAG no later than three months after receiving the performance information from the *Steering Committee*. [para. C15]

In preparing its performance information reports, the [CRC] may draw upon other data collection agencies and subject experts it considers relevant to its work. [para. C16]

Role of the Steering Committee

The Steering Committee is required to report twice yearly to the CRC on performance under the NAs. Reports from the Steering Committee to the CRC are required:

- by end-June on the education and training sector (*National Education Agreement* and the *National Agreement for Skills and Workforce Development*), commencing with performance information for 2008
- by end-December on the other sectors (*National Healthcare Agreement*, the *National Affordable Housing Agreement*, the *National Disability Agreement* and the *National Indigenous Reform Agreement*), commencing with performance information for 2008-09
- to include the provision of quality statements prepared by the collection agencies (based on the Australian Bureau of Statistics' [ABS] data quality framework).

The CRC has also requested the Steering Committee to collate performance data on the performance benchmarks for the reward components of the following NP agreements:

- *National Partnership Agreement on Youth Attainment and Transitions*
- *National Partnership Agreement on Essential Vaccines*
- *National Partnership Agreement on the Elective Surgery Waiting List Reduction Plan* (Steering Committee reporting for this NP was completed in May 2011)
- *National Partnership Agreement on Improving Public Hospital Services*.

The Steering Committee reports separately to the CRC on these NP agreements.

Steering Committee report to Heads of Treasuries on data gaps in the National Performance Reporting Framework

The Steering Committee was asked by the Chair of the Heads of Treasuries Committee on Federal Financial Relations to draw together information on data gaps in the National Performance Reporting Framework. The first report addressed data gaps in the performance indicators in the National Agreements on education and training. The second report addressed data gaps in the indicators for the performance reporting categories covered in this report, and was submitted to the Heads of Treasuries Committee on 23 April 2010. To date, the Heads of Treasuries Committee has not requested any further data gaps reports.

Role of Ministerial Councils and COAG Working Groups

The IGA states that:

> The role of relevant Ministerial Councils, other than the Ministerial Council for Federal Financial Relations, and relevant COAG Working Groups with respect to [the IGA] includes recommending to COAG on:
>
> a) development of objectives, outcomes, outputs and performance indicators for National Agreements; and
>
> b) proposing new specific projects and reforms which could be supported by National Partnerships. [para. A9]

Ministerial Councils may also be consulted by the MCFFR, in relation to its roles in:

- maintaining a register of the national minimum data sets [para. C28]
- oversighting progress in improving the quality and timeliness of indicator data and the coordination of improvements in data collection processes, data quality and the timeliness of performance reporting for the National Performance Reporting System [para. C29].

Role of data collection agencies

Data collection agencies are responsible for providing the required data to the Steering Committee and preparing data quality statements '… which set out the quality attributes of the data using the ABS' Quality Framework' [para. C12].

As noted above, data collection agencies may also be called upon by the CRC, as the CRC prepares its performance information reports [para. C16].

Data collection agencies may also be consulted by the MCFFR, in relation to its roles in:

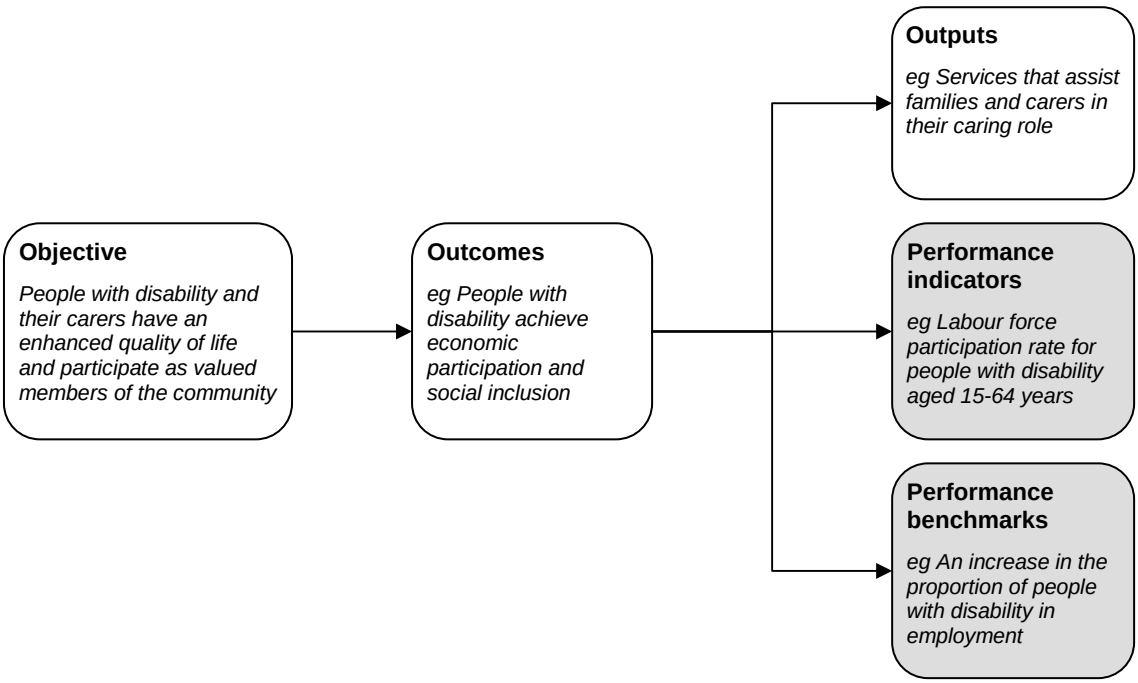
- maintaining a register of the national minimum data sets [para. C28]
- oversighting progress in improving the quality and timeliness of indicator data and the coordination of improvements in data collection processes, data quality and the timeliness of performance reporting for the National Performance Reporting System [para. C29].

Performance reporting

The Steering Committee is required to collate performance information for the *National Disability Agreement* (NDA) (COAG 2009b) and provide it to the CRC no later than 31 December 2011. The CRC has requested the Steering Committee to provide information on all performance categories in the National Agreements (variously referred to as 'outputs', 'progress measures', 'performance indicators', 'performance benchmarks' and 'targets').

The NDA includes the performance categories of 'outputs', 'performance indicators' and 'performance benchmarks'. The links between the objectives, outcomes and associated performance categories in the NDA are illustrated in figure 1.

Figure 1 **NDA performance reporting[a, b]**



a Shaded boxes indicate reportable categories of performance information included in this report. **b** Although the NDA has multiple outcomes, outputs, performance indicators and performance benchmarks, only one example of each is included in this figure for illustrative purposes.

This report includes available data for the following:

- NDA performance benchmarks

- NDA performance indicators.

This is the third NDA performance report prepared by the Steering Committee. The CRC has requested that data included in previous reports not be reproduced in subsequent reports. Therefore, this report contains only data that relate to more recent reporting periods, or which have been revised since earlier reports.

This report contains the original data quality statements completed by relevant data collection agencies. In addition, this report includes comments by the Steering Committee on the quality of reported data based on the data quality statements. This report also includes Steering Committee views on areas for development of NDA 'performance indicators' and 'performance benchmarks'. Box 1 identifies the key issues in reporting on the performance categories in the NDA.

A separate appendix (*National Agreement Performance Information 2010-11: Appendix — Health, Affordable Housing, Disability and Indigenous Reform*) provides general contextual information about each jurisdiction, to assist interpretation of the performance data. Contextual information is provided on population size and trends, family and household characteristics, socioeconomic status and general economic indicators.

Box 1 Key issues in reporting against the NDA

General comments

- The Survey of Disability, Ageing and Carers (SDAC) does not include people living in very remote areas, which affects the comparability of the NT results. As the SDAC provides the most comprehensive data on disability prevalence, this scope limitation also affects the accuracy and comparability of the prevalence estimates for the NT.
- National Aboriginal and Torres Strait Islander Social Survey (NATSISS) data are only available every six years. More frequent data are desirable. Consideration should be given to including the disability module from the SDAC in the Australian Aboriginal Torres Strait Islander Health Survey (AATSIHS — previously the NATSIHS), to enable a rolling three-yearly cycle of reporting for Indigenous people to complement three-yearly reporting for the general population.
- Potential population estimates are used as denominators for one performance benchmark and two performance indicators (table 1), and provide an indication of the number of people with the potential to require specialist disability services. New estimates based on the 2009 SDAC have created a break in series, with estimates only able to be derived for 2009-10 and backcast for one year (2008-09). Therefore, data in this report are not comparable to data in previous reports.

Performance benchmarks

- Of the six performance benchmarks, three could not be reported against, as relevant measures have yet to be developed.
  - *A decrease in the proportion of potential population with unmet demand for services.*
  - *An increase in the proportion of people with disability accessing services who have an individualised service plan.*
  - *All services are subject to quality improvement systems consistent with National Standards by 2010.*

Performance indicators

- Of the ten performance indicators, two could not be reported against, as relevant measures have yet to be developed.
  - *Proportion of people with disability who are satisfied with the range of disability service options and the quality of support received.*
  - *Proportion of carers of people with disability who are satisfied with the range of disability service options and quality of support received.*

(Continued next page)

Box 1 **(continued)**

- Of the eight indicators reported against, one was reported against using an interim or proxy indicator.
  - *Proportion of carers of people with disability accessing support services to assist in their caring role* — further work is required to identify the full carer population, to reflect more accurately the scope of the indicator.
- Data for one indicator was reported against on an incorrect scope in the 2008-09 baseline NDA performance report. Revised data for this indicator have been provided to enable a comparable time series.
  - *Labour force participation rate for carers aged 15–64 years of people with disability*.

Changes from the previous National Disability Agreement performance report

Table 1 summarises changes to indicator specifications, measures or data from the 2009-10 NDA performance report.

In general, this report only includes new data that were not included in previous reports. However, where there has been a change in an indicator, measure or data collection, data for previous years have been reported, where possible, to provide a consistent time series.

CRC advice to the Steering Committee on data requirements

Under the IGA, the CRC 'may advise on where changes might be made to the performance reporting framework' [IGA para C30]. The CRC recommended changes to outputs and indicators in its first two NDA reports (CRC 2010, 2011), as well as providing additional advice to the Steering Committee. COAG published responses to the CRC recommendations on 19 August 2011 (COAG 2011c, 2011d). Where practicable, the Steering Committee has incorporated the CRC recommendations and advice in this report (table 1).

Table 1 **Changes from the previous NDA performance report**

Change	*Indicator*
• There was a change in the identification of a 'primary carer' in the 2009 SDAC. This report includes current year data according to both the new definition and according to the previous definition (to enable time series analysis). • 2003 data on the labour force participation of carers was incorrect in the 2008-09 baseline NDA performance report. A selection of data for 2003 have been revised and are included in this report.	• NDA Indicator 7
• New data for the denominator (2009 SDAC) have led to a break in series. Data in this report are not comparable with data in previous reports. • Comparable data for the denominator can be backcast for one year (creating a new baseline). Therefore, two years of data are included in this report (new baseline and current year).	• NDA benchmark (e) • NDA Indicator 3 • NDA Indicator 6
• New measures (but no data) were included in the previous report. Data for these measures are available for the first time for this report.	• NDA Indicator 2 • NDA Indicator 5 —measures 5b and 5c
• An additional disaggregation is reported (English proficiency).	• NDA benchmark (a) —measures 1a and 1b • NDA Indicator 1—measures 1a and 1b • NDA Indicator 2 • NDA Indicator 5 —measures 5b and 5c • NDA Indicator 7
• Data for 2008-09 have been revised and are included in this report.	• NDA benchmark (e) • NDA Indicator 3 • NDA Indicator 6 • NDA Interim Indicator 8
• Data for 2007-08, 2008-09 and 2009-10 have been revised and are included in this report.	• NDA benchmark (d)

Context for National Disability Agreement performance reporting

The objective of the NDA is that 'People with disability and their carers have an enhanced quality of life and participate as valued members of the community' [para. 6]. Further to this, the NDA aims to contribute to the following outcomes:

(a) people with disability achieve economic participation and social inclusion

(b) people with disability enjoy choice, wellbeing and opportunity to live as independently as possible

(c) families and carers are well supported [para. 7].

The focus of the NDA is on the provision and funding of specialist disability services. The Steering Committee has previously identified the provision of mainstream services as an important, and potentially more efficient, way of delivering services to people with disability and their carers. The National Disability Strategy (NDS), endorsed by COAG on 13 February 2011, and launched by the Australian Government on 18 March 2011, complements the NDA, and focuses on the provision of mainstream services for people with disability (COAG 2011e).

Roles and responsibilities

The roles and responsibilities of the Commonwealth under the NDA is detailed at para. 15. The roles and responsibilities of states and territories' are detailed at para. 16, and shared roles and responsibilities are detailed at para. 14.

In brief, the Commonwealth is responsible for the provision of income support for people with disability, their families and carers, and employment services for people with disability. The states and territories are responsible for the provision of specialist disability services for people with disability (except Disability Employment Services). State and Territory Government expenditure on specialist disability services is predominantly on accommodation support, community support and community access (SCRGSP 2011a).

Disability prevalence

Data on disability prevalence are sourced from the ABS Survey of Disability, Ageing and Carers (SDAC) which, from 2009, is planned to be conducted every

three years (guaranteed to 2018). The most recent SDAC data were collected in 2009. For the purposes of SDAC, disability is defined as any limitation, restriction or impairment that restricts everyday activities and lasts longer than six months (for example, loss of sight not corrected by glasses, or arthritis which causes difficulty dressing).

The ABS estimates that, in 2009, just under one in five people in Australia (4 026 200 or 18.5 per cent) had a reported disability (that is, a core activity limitation, a schooling or employment restriction or an impairment)[1] (ABS 2010a). The national rate of profound or severe core activity limitation was 5.8 per cent. These rates were slightly lower than those identified in the previous survey in 2003 (20.0 per cent and 6.3 per cent respectively). The decrease in the prevalence of disability between 2003 and 2009 was due to a decline in the proportion of Australians disabled by physical health conditions, such as asthma and heart disease (ABS 2010a). Age standardised State and Territory rates for 2009 are presented in table 2.

Table 2 **Disability rates, by State and Territory, 2009 (age standardised per 100 people)[a, b]**

	NSW	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*
Severe/profound core activity limitation[c]	5.5	5.9	5.5	4.9	5.6	6.2	5.1	6.0	5.5
All with reported disability	17.6	17.4	17.6	17.3	18.6	20.7	17.0	18.8	17.7

a Rates are age standardised to 2001. **b** Includes people of all ages. **c** Core activities comprise communication, mobility and self care.

Source: ABS (unpublished) Survey of Disability, Ageing and Carers, Australia, 2009, Canberra.

The 2006 ABS Census of Population and Housing (the Census) provides an alternative source of information on people with disability. The Census includes questions about severe/profound core activity limitation, but uses a different methodology to the SDAC, and data from the Census and SDAC are not comparable. The Census provides data at small geographic levels and for small demographic groups, and can provide useful information on the relative differences in prevalence of disability between geographic locations and sub-populations (including Indigenous and non-Indigenous Australians). However, the Census does not include any adjustment for non-response. In 2006, the Census non-response rate for the questions about need for assistance was 7 per cent in the Indigenous population, and 2 per cent in the non-Indigenous population.

[1] Further information on how disability and the different types of disability are defined is provided in the glossary section of this report.

Although disability and chronic disease are different concepts, disability is often associated with long term health conditions. Drawing on data from the National Health Survey, the ABS estimated that, in 2007-08, 68.9 per cent of people with profound/severe disability had four or more long term health conditions, compared to 10.8 per cent of people without disability (ABS 2009a). Coordinating support and providing services to people with long term health conditions is complex. The more disabilities a person has, the more likely they will need help with 'core' daily activities of self-care, mobility and communication, and the more likely they will face education restrictions (for children of school age) and employment restrictions (for people aged 15–64 years).

Demographic shifts and advances in medical technology have resulted in an increased number of people with disability in older age groups. According to the SDAC, in 2009, the national rate of disability increased with age, from 3.4 per cent for those aged less than five years, to 40.1 per cent for people aged 65–69 years and 88.3 per cent for people aged 90 years or over. Rates for profound or severe disabilities also increased with age, reaching 70.3 per cent for people aged 90 years or over (ABS 2010a).

The aged population of Australia is expected to continue to increase, both in absolute terms and as a proportion of the population. Although it is anticipated that Australia's aged population in the future will be healthier and experience lower rates of disability than the current aged cohort, the absolute increase in the number of older people is expected to lead to an increase in the number of people with disability (Madge 2000).

Aboriginal and Torres Strait Islander people

The most comprehensive data on disability prevalence for Indigenous Australians come from the ABS National Aboriginal and Torres Strait Islander Social Survey (NATSISS) and relate to persons aged 15 years or over. The most recent NATSISS data are from 2008. The NATSISS uses different questions on disability for persons living in remote and non-remote areas, which are not comparable to non-Indigenous data and may result in an underestimate of the number of Indigenous persons with disability in remote areas (ABS 2009b). The ABS estimates that, nationally in 2008, the age standardised rate of disability for Indigenous people aged 15 years or over was 49.8 per cent (7.9 per cent for profound/severe core activity limitation) (table 3).

Table 3 **Disability rates for Indigenous people aged 15 years or over, by State and Territory, 2008 (age standardised per 100 people)[a]**

	NSW	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*[b]	*NT*	*Aust*
Severe/profound core activity limitation[c]	8.7	9.6	6.2	6.5	9.1	9.2	11.2	9.4	7.9
All with reported disability	52.4	55.9	48.0	45.8	54.8	49.9	56.2	46.3	49.8

a Rates are age standardised to June 2001. **b** The ACT rate for severe/profound core activity limitation has a relative standard error greater than 25 per cent and should be used with caution. **c** Core activities comprise communication, mobility and self care.

Source: ABS (2009) *National Aboriginal and Torres Strait Islander Social Survey, 2008*, Cat. no. 4714.0.

The ABS recommends that comparisons between the disability rates for Indigenous and non-Indigenous Australians are made using age standardised data for people aged 18 years or over in non-remote areas from the 2008 NATSISS and the 2007-08 National Health Survey (NHS). The criteria used to determine disability in these two collections are similar (that is, they both use the same short module). These data indicate that Indigenous Australians in non-remote areas were 2.0 times as likely as non-Indigenous Australians to need assistance with the core activities of daily living (SCRGSP 2011b, table 4A.8.1). Although disability rates increased with age in both populations, the relative onset of disability for Indigenous Australians occurred much earlier than for non-Indigenous Australians (ABS 2011a).

Location and socioeconomic status

Disability is more common in regional and remote areas than major cities (AIHW 2008), and in more disadvantaged areas relative to less disadvantaged areas (Bradbury, Norris and Abello 2001).

The AIHW (2009) examined the distribution of 0–64 year old people with severe disability living in capital cities, using data from the 2006 Census. (Although the Census does not provide comprehensive data on disability prevalence, it is the only source that can provide a detailed geographical disaggregation for people with disability.) The AIHW found considerable variation in the rate of disability within cities — although aggregate disability rates were lower in metropolitan areas than in regional and remote areas, some local areas within cities had relatively high rates of severe disability. The most disadvantaged statistical local areas (SLAs) within cities tended to have the highest rates of severe disability, while the most advantaged SLAs tended to have the lowest rates.

A recent study by McPhedran (2010), analysing Household, Income and Labour Dynamics Australia (HILDA) data, found that people with disability living in regional Australia could experience cumulative negative influences of disability and location, particularly in relation to social connectedness. However, the study also found that regional living can be positively associated with community engagement and community-oriented activities, irrespective of disability status.

Cultural and linguistic diversity (CALD)

Cultural and linguistic diversity can not be measured using a single variable. The ABS defines CALD by three variables:

- country of birth
- language other than English (LOTE) spoken at home
- English language proficiency.

Information about people with disability from diverse cultural and linguistic backgrounds is limited. The 2009 SDAC includes information on country of birth, main language spoken at home, and English language proficiency, and the 2006 Census contains information on country of birth, language spoken at home and English language proficiency. However, SDAC and Census disability data are not comparable.

In 2009, the disability prevalence rate for people born in Australia was 18.0 per cent. The disability prevalence rates for people born in New Zealand and Asia are lower, and the rates for people born in Europe are higher, than the rates for people born in Australia (ABS 2010a).

Education and labour force participation

People with disability may face challenges that hinder their full and effective participation in society (including education and employment) (PC 2011; UN General Assembly 2006). The extent to which people with disability are able to be fully involved in society varies. A significant impairment may not be severely disabling if there is a sufficiently supportive and enabling environment (Priestly 2001).

On average, people with disability are less likely to be in paid employment, and are paid less, than people without disability. Wanting to work but being unable to get a job, is a 'serious stressor' for 10.7 per cent of people with profound/severe

disability, compared to 6.0 per cent of people without disability (ABS 2009a). Data on workforce participation are reported under NDA PI 1.

Higher levels of education and more work experience are associated with higher labour force participation and employment rates for people both with and without disability. Vocational education, in particular, can reduce the labour market disadvantage of people with disability (Mavromaras et al. 2007; Mavromaras and Polidano 2011; OECD 2011a), and people with profound or severe core-activity limitation are more likely than people without disability to obtain VET qualifications as their highest level of educational attainment. However, people with profound or severe core-activity limitation with VET qualifications are still less likely to be employed than their counterparts without disability (ABS 2011b).

In 2009, over half of all people aged 15–64 years without disability had completed year 12 or equivalent (54.9 per cent), compared to 33.3 per cent of people with disability, reducing to 26.0 per cent for people with severe/profound core activity limitation. Nearly one in four people aged 15–64 years without disability had completed a bachelor degree or above (24.3 per cent), compared to one in seven people (14.6 per cent) with disability, and 9.1 per cent for people with severe/profound core activity limitation — people without disability were 2.7 times more likely than people with severe/profound core activity limitation to have a bachelor degree or above (ABS 2010a).

The data collected for the disability module in the survey of education and training experience (SET) relate to a broader 'disability and long-term health condition' population than the 'disability' population used by the SDAC. SET data are suitable for population comparisons, but not for prevalence updates between cycles of the SDAC. In 2009, SET data showed that people without disability were 2.3 times more likely than people with severe/profound core activity limitation to have a bachelor degree or above (ABS 2010b).

Profile of services for people with disability

NDA outputs

The NDA has four outputs [para. 8]:

- services that provide skills and supports to people with disability to enable them to live as independently as possible
- services that assist people with disability to live in stable and sustainable living arrangements

- income support for people with disability and their carers
- services that assist families and carers in their caring role.

The NDA outputs are not statistical measures, and were not intended to relate only to specialist disability services. The outputs relate to broad outcomes for people with disability, and go beyond specialist disability services, to include income support, mainstream services and community and family support.

Income support

The provision of income support for people with disability and their carers is an output under the NDA. The Australian Government funds income support payments for people with disability, their carers, and those temporarily incapacitated from work as a result of illness, with payments made to those who meet the eligibility criteria. These payments include:

- the Disability Support Pension (DSP)
- the Carer Payment
- the Carer Allowance
- the Sickness Allowance
- the Mobility Allowance.

Data on the proportion of people receiving DSP are reported under NDA PI 10. The disability services chapter in the *Report on Government Services 2011* (SCRGSP 2011a) contains further information on payments and the number of recipients (updated data will be available in the 2012 Report, due for release on 31 January 2012 [SCRGSP forthcoming]).

Additional information on specialist disability services is provided below. The majority of the information is sourced from the 2009-10 Disability Support Services publication (AIHW 2011).

Scope of services

The majority of disability services are provided to people whose disability has manifest before the age of 65 years and not to people whose disability is age-related.

The Commonwealth Government is responsible for providing funds to States and Territories to contribute to the achievement of the NDA objective and outcomes

[para. 15(c)]. The National Disability Specific Purpose Payment provides funding to the states and territories to contribute to the delivery of specialist disability services (except Disability Employment Services, for which the Australian Government is responsible). However, jurisdictions vary in whether specialist psychiatric disability services and early childhood intervention services are provided under the NDA or other programs (see table 4). Following a recommendation from the CRC to COAG, specialist psychiatric disability services have been excluded from the disability support services data since the 2009-10 NDA Performance Report, to improve comparability across jurisdictions.

Table 4 **Scope of services included under the NDA, by State and Territory, 2009-10**

	NSW	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*
Specialist psychiatric disability services	N	Y	Y	N	N	N	N	N
Early childhood intervention[a, b]	Y	Y	Y	Y	Y	N	Y	Y

a Includes selected services only for the NT. **b** Tasmania provides therapy services to children aged 0–4 years that are not within the scope of services included under the NDA.

Source: AIHW (2011) *Disability Support Services 2009-10*, Canberra.

Agencies and service type outlets providing specialist disability services

In 2009-10 2256 NDA agencies consisting of 12 623 service type outlets delivered NDA services across Australia (table 5 and table 6).

Counts of service type outlets should be interpreted with caution. A 'service type outlet' is a unit of an agency that delivers a particular NDA service type at or from a discrete location. If an agency provides, for example, both accommodation support and respite services, it is counted as two service type outlets. The number of service type outlets has increased in recent years both as a result of growing numbers of physical outlets, and because more outlets are providing multiple types of service (and being counted for each type of service they provide).

In 2009-10, 1607 agencies (71.2 per cent) were funded by State and Territory governments, with the remaining 649 (28.8 per cent) funded by the Australian Government (table 5).

Users of specialist disability services

In 2009-10, approximately 295 024 people of all ages used NDA services in Australia (table 7).

Table 7 **Users of NDA services by State and Territory, 2009-10[a]**

	NSW	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*

a Includes State/Territory services as well as services funded directly by the Australian Government

Source: AIHW (2011) *Disability Support Services 2009-10*, Canberra.

As would be expected given their higher rate of disability, Indigenous Australians accessed NDA services at a higher rate than non-Indigenous Australians. However, it is not clear whether Indigenous Australians with disability access services at the same rate as non-Indigenous Australians with disability (see discussion below under 'Potential population').

In 2009-10, 4.1 per cent of users of NDA services were Indigenous, while 2.5 per cent of the general population were Indigenous as at 30 June 2006. The proportion of users of NDA services who are Indigenous was higher than the Indigenous proportion of the population in all states and territories except Tasmania (table 8).

Table 8 **Users of NDA services as a proportion of population, by Indigenous status and by State and Territory, 2009-10 (per cent)[a, b]**

	NSW	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*
Indigenous	6.3	3.1	6.8	10.5	4.0	2.5	3.4	55.8	4.8
Non-Indigenous	89.3	81.5	88.8	88.3	92.9	93.6	93.0	33.4	89.6
Not stated/not collected	4.5	15.4	4.4	1.2	3.0	3.9	3.6	10.8	5.6
Total	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
Indigenous proportion of population[c]	2.2	0.7	3.5	3.4	1.8	3.8	1.3	30.4	2.5

[a] Service user data are estimates after use of a statistical linkage key to account for individuals who received services from more than one service type outlet during the 12-month period. [b] Totals may not be the sum of components because service users may have accessed services in more than one State/Territory. [c] At 30 June 2006.

Potential population

A true count of the number of people who may be eligible for specialist disability services is not available. An estimate of the population eligible to access specialist disability services is the 'potential population'. In this report, 'potential population' indicates the number of people, aged 0–64 years (15–64 years for employment related items), with the potential to need specialist disability services, including individuals who meet the service eligibility criteria but who do not demand services.

Estimates of potential population are used in this report as denominators to calculate access to services under performance indicator 3 (Proportion of the potential population who used disability services), performance indicator 5 (Proportion of the potential population expressing unmet demand for disability support services), and performance indicator 6 (Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services).

Carers

In 2009, approximately 2.6 million people provided assistance to those who needed help because of disability or older age. Around one third of these (29.0 per cent) were identified as primary carers, who provided the majority of informal help to a person with disability or person aged 60 years or over. This rate can not be compared to the proportion of primary carers in 2003 (19 per cent) because the method of identifying primary carers has changed (ABS 2010a). Data for primary carers in the attachment tables for this report are provided based on both the 2003 and the 2009 definitions (for time series and current year reporting, respectively).

In 2009, over two thirds of primary carers[2] (68 per cent) were women. Thirteen per cent of women had caring responsibilities, compared with 11 per cent of men (ABS 2010a).

The most recent data for Indigenous carers is from the 2006 Census. In 2006, around 16 per cent of Indigenous women (aged 15 years or over) and 10 per cent of Indigenous men (aged 15 years or over) provided unpaid assistance to a person with disability (ABS 2010c).

In addition to physical care needs, the role of a carer can include advocacy and emotional support, and planning for the future care and accommodation arrangements of the person with disability, which can affect a carer's social and emotional wellbeing (Cummins et al. 2007; Nolan, Bauer and Nay 2009; Senate Community Affairs Committee Secretariat 2011). Providing care to a person with disability can affect a carer's participation in the labour force, leading to less time for paid employment, reduced family income, reduced superannuation and lower standards of living (ABS 2011c; Hill, Thompson and Cass 2011). Care-giving is associated with a higher probability of experiencing poverty in Australia compared to most other OECD countries. Carers of working age, and women carers, are at the highest risk of poverty (OECD 2011b).

Care-giving has a significant impact on the economy as a whole, including the value of the informal care provided, and the opportunity cost of carers not participating fully in the paid labour force. This impact is likely to increase as the number of people requiring care increases over the coming decades (primarily due to the ageing population and the shift from institutional to community care) (NATSEM 2004). Data on the labour force participation of carers are reported under NDA PI 7.

[2] Primary carers in the SDAC include persons aged 15 years or over for whom a personal interview was conducted (ABS 2010a).

Table 9 presents information on labour force participation by carer status. In 2009, 70.5 per cent of carers participated in the labour force, compared to 79.9 per cent of people who were not carers. Only 53.9 per cent of primary carers participated in the labour force, compared with 77.1 per cent of non-primary carers.

Table 9 **Labour force participation and employment to population rate of people aged 15–64 years, by carer status, 2009 (per cent)** [a]

Carer status	*Labour force participation rate (%)*	*Employment to population rate (%)*
Primary carer of people with disability	53.9	51.1
Non-primary carers of people with disability	77.1	71.8
Total carers of people with disability	70.5	65.9
Not a carer	79.9	75.7
Total	**78.6**	**74.4**

[a] Primary carer status is based on the 2009 definition of primary carer.

Source: ABS (unpublished) 2009 Survey of Disability, Ageing and Carers.

The 2006 Families Caring for a Person with a Disability survey was based on a random sample of carers who received Carer Payment and/or Carer Allowance. The survey found that many carers stopped work once they commenced caring, and that the majority of non-employed carers of working age expressed a desire to be in paid employment (Edwards et al. 2008). Further analysis of female carers found that providing full time care (as opposed to part time care) was associated with a higher rate of wanting to work (Gray and Edwards 2009).

Performance benchmarks

The CRC has requested the Steering Committee to report against the performance benchmarks identified in the NAs. The performance benchmarks in the NDA are:

(a) an increase in the proportion of people with disability in employment

(b) a decrease in the proportion of potential population with unmet demand for services

(c) an increase in the proportion of people with disability accessing services who have an individualised service plan

(d) an increase in the proportion of younger people in, or at risk of entering, residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services

(e) an increase in the proportion of Indigenous people with disability receiving disability services

(f) all services are subject to quality improvement systems consistent with National Standards by 2010.

Not all the performance benchmarks in the NDA can be reported against. While some benchmarks are clearly defined, readily measureable and have available data, others require further work on concepts and definitions, or data are not currently available.

Outlined below are the performance benchmarks, any associated issues and, where available, data for the most recent reporting period. (As noted, the CRC has requested that data included in previous reports not be reproduced in subsequent reports. Therefore, this report contains only data that relate to the more recent reporting period, or which have been revised since the previous report.) Links are provided to the related NDA outcome and, where relevant, to the related performance indicator.

Performance benchmark (a) — An increase in the proportion of people with disability in employment

Key changes from the second cycle of reporting:	SDAC data are planned to be available every three years (guaranteed to 2018) for reporting against this benchmark (previously available every six years) An additional disaggregation has been provided for the first time (English proficiency – for measures 1a and 1b)
Outcome:	People with disability achieve economic participation and social inclusion
Measure:	Proportion of people with disability aged 15–64 years who are employed The measure is defined as: • *numerator* — number of persons with disability aged 15–64 years who are employed • *denominator* — number of persons with disability aged 15–64 years and is expressed as a *percentage*
Related performance indicator/s:	Performance indicator 1: Labour force participation rate for people with disability aged 15–64 years
Data source:	*Numerator and denominator* — (all) Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018)
Data provider:	ABS
Data availability:	SDAC — 2009
Baseline:	SDAC — 2003
Cross tabulations provided:	This benchmark utilises the data for performance indicator 1 (measure 1b): State/Territory, by: • disability status (has profound or severe disability, other disability or restrictive long term health condition, total with disability, has no disability, total) All with reported disability (aged 15–64 years) by State/Territory, by: • sex (male, female, total) • age group (15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years) • remoteness area (Major Cities, Inner Regional, other, total) • English proficiency (very well/well, not well/not at all, total) • country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)

Box 2 **Results**

For this report, new data for this benchmark are available for 2009.

- Labour force participation data by State and Territory are presented:
  - by disability status in tables NDA.1.1–3
  - by sex in tables NDA.1.4–6
  - by age group in tables NDA.1.7–9
  - by remoteness area in tables NDA.1.10–12
  - by English proficiency in tables NDA.1.13–15
  - by country of birth in tables NDA.1.16–18
  - by sex by age group in tables NDA.1.19–21.
- Employment to population rate data by State and Territory are presented:
  - by disability status in tables NDA.1.22–24
  - by sex in tables NDA.1.25–27
  - by age group in tables NDA.1.28–30
  - by remoteness area in tables NDA.1.31–33
  - by English proficiency in tables NDA.1.34–36
  - by country of birth in tables NDA.1.37–39.
- Unemployment rate data by State and Territory are presented by disability status in tables NDA.1.40–42.

Results for 2003 are available in the 2008-09 baseline NDA performance report.

Box 3 **Comment on data quality**

This performance benchmark is related to NDA performance indicator 1 (Labour force participation rate for people with disability aged 15–64 years).

Further information on the quality of the data used to inform this performance benchmark is contained in the comment on data quality for performance indicator 1 in the next section on 'Performance Indicators'.

Performance benchmark (b) — A decrease in the proportion of potential population with unmet demand for services

Key changes from the second cycle of reporting:	No changes
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Measure:	A measure for this benchmark is yet to be developed
Related performance indicator/s:	Performance Indicator 5: Proportion of the potential population expressing unmet demand for disability support services
Data source:	Not yet identified
Data provider:	Not yet identified
Data availability:	Nil
Baseline:	Yet to be determined
Cross tabulations provided:	Nil

Box 4 **Comment on data quality**

A measure for this benchmark is yet to be developed.

Performance benchmark (c) — An increase in the proportion of people with disability accessing services who have an individualised service plan

Key changes from the second cycle of reporting:	No changes
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Measure:	A measure for this benchmark is yet to be developed
Related performance indicator/s:	Nil
Data source:	Not yet identified
Data provider:	Not yet identified
Data availability:	Nil
Baseline:	Yet to be determined
Cross tabulations provided:	Nil

Box 5 **Comment on data quality**

A measure for this benchmark is yet to be developed.

Performance benchmark (d) — An increase in the proportion of younger people in, or at risk of entering, residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services

Key changes from the second cycle of reporting:	Data from the 2007-08, 2008-09 and 2009-10 ACCMIS have been revised. These data are included in this report.
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
INTERIM Measures:	There are three (interim) measures for this benchmark: • Measure d.1 is the rate of people aged 0–64 years admitted to permanent residential aged care • Measure d.2 is the number of persons aged 0–64 years receiving permanent residential aged care services • Measure d.3 is the number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family Measure d.1 is defined as: • *numerator* — number of persons aged 0–64 years admitted to permanent residential aged care in the reporting period • *denominator* — estimated potential population for disability support services (people aged 0–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period and is expressed as a *rate per 10 000 potential population* Measure d.2 is defined as: • *numerator* — number of persons aged 0–64 years receiving permanent residential aged care services in the reporting period and is expressed as a *number* Measure d.3 is defined as: • *numerator* — number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family in the reporting period and is expressed as a *number*
Related performance indicator/s:	Nil

Data source:	(All) *Numerator* — Department of Health and Ageing (DoHA) Aged and Community Care Management Information System (ACCMIS). Data are available annually (Measure d.1) *Denominator* — ABS Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018). ABS Estimated Resident Population (ERP). Data are reported quarterly. ABS Census of Population and Housing (Census). Data are collected every five years. Data are available for reporting annually
Data provider:	AIHW
Data availability:	2007-08 (revised due to revised ACCMIS data), 2008-09 (revised due to revised ACCMIS data and new potential population for the denominator), 2009-10 (revised due to revised ACCMIS data and new potential population for the denominator), and 2010-11
Baseline:	2007-08
Cross tabulations provided:	State/Territory by age group (0–49 years, 50–64 years and total 0–64 years)

Box 6 **Results**

For this report, new data for this benchmark are available for 2010-11 by age groups in tables NDA.PBd.1–3.

Revised data for prior years are available by age groups:

- for 2009-10 in tables NDA.PBd.4–6
- for 2008-09 in tables NDA.PBd.7–9
- for 2007-08 in tables NDA.PBd.10–12.

Attachment tables

Table NDA.PBd.1	Rate of people aged 0–64 years admitted to permanent residential aged care, 2010-11 (per 10 000 potential population)
Table NDA.PBd.2	Number of persons aged 0–64 years receiving permanent residential aged care, 2010-11
Table NDA.PBd.3	Number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family, 2010-11
Table NDA.PBd.4	Rate of people aged 0–64 years admitted to permanent residential aged care, 2009-10 (per 10 000 potential population)
Table NDA.PBd.5	Number of persons aged 0–64 years receiving permanent residential aged care, 2009-10

Table NDA.PBd.6	Number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family, 2009-10
Table NDA.PBd.7	Rate of people aged 0–64 years admitted to permanent residential aged care, 2008-09 (per 10 000 potential population)
Table NDA.PBd.8	Number of persons aged 0–64 years receiving permanent residential aged care, 2008-09
Table NDA.PBd.9	Number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family, 2008-09
Table NDA.PBd.10	Rate of people aged 0–64 years admitted to permanent residential aged care, 2007-08 (per 10 000 potential population)
Table NDA.PBd.11	Number of persons aged 0–64 years receiving permanent residential aged care, 2007-08
Table NDA.PBd.12	Number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family, 2007-08

Box 7 **Comment on data quality**

The DQS for this benchmark has been prepared by the AIHW and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the rate and number of people aged 0–64 years admitted to residential aged care, and the number of people aged 0–64 years receiving, and separated from residential aged care. Data are not available by Indigenous status or socioeconomic status (SES).
- There are issues with the consistency of the numerator and denominator for measure d.1, as the numerator and denominator are drawn from differently defined populations and different data sources.
- Annual data are available. The most recent available data are for 2010-11.
- Data are comparable over the four years for which data are provided.
- Detailed explanatory notes are publicly available to assist in the interpretation of results.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issue.

- Disaggregation of this benchmark by Indigenous status and SES is a priority. However, the small population of interest means that reporting may be limited, as some data are likely to be suppressed for confidentiality reasons.
- Further work is required to determine the appropriate concept and definition of SES for people with disability and their carers.

Performance benchmark (e) — An increase in the proportion of Indigenous people with disability receiving disability services

Key changes from the second cycle of reporting:

Data from the 2009 SDAC has been included in the calculation of the denominator for this benchmark. This has resulted in a break in series with data included in previous reports.

Comparable data for the denominator are only able to be backcast for one year (creating a new baseline). Therefore, two years of data are included in this report (new baseline and current year).

Data from the 2008-09 DS NMDS have been revised. These data are included in this report.

Outcome:

People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible

Measure:

There are three measures for this benchmark:

- Measure e.1 is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 0–64 years who used State/Territory delivered disability support services
- Measure e.2 is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 15–64 years who used open employment services
- Measure e.3 is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 15–64 years who used supported employment services

Measure e.1 is defined as:

- *numerator* — number of Aboriginal and Torres Strait Islander persons aged 0–64 years who used State/Territory delivered disability support services in the reporting period
- *denominator* — estimated Indigenous potential population for State/Territory delivered disability support services (people aged 0–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period

and is expressed as a *percentage*

Measure e.2 is defined as:

- *numerator* — number of Aboriginal and Torres Strait Islander persons aged 15–64 years who used open employment services in the reporting period
- *denominator* — estimated Indigenous potential population for employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period

and is expressed as a *percentage*

Measure e.3 is defined as:

- *numerator* — number of Aboriginal and Torres Strait Islander persons aged 15–64 years who used supported employment services in the reporting period
- *denominator* — estimated Indigenous potential population for

	employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period and is expressed as a *percentage* *These measures exclude specialist psychiatric disability services in Victoria, Queensland and WA*
Related performance indicator/s:	Performance Indicator 6: Number of Indigenous persons with disability receiving disability services as a proportion of the Indigenous potential population requiring services
Data source:	*Numerator* — Disability Services National Minimum Data Set (DS/CSTDA NMDS[3]). Data are collected annually *Denominator* — Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018). Census of Population and Housing (Census). Data are collected every five years. Estimates of Indigenous projected population are produced annually and updated every five years following a Census Data are available for reporting annually
Data provider:	AIHW
Data availability:	2008-09 (revised due to revised CSTDA NMDS data and new potential population for the denominator) and 2009-10 (DS NMDS)
Baseline:	2008-09 (revised due to break in series for data on the potential population)
Cross tabulations provided:	This benchmark utilises the data provided for performance indicator 6 (Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services) The following disaggregations are presented for all three measures: • State/Territory by sex (male, female, total) • Nationally by remoteness area (Major Cities, Inner Regional, Outer Regional/Remote, total) • State/Territory by need for assistance in life area (activities of daily living; activities of independent living or work, education or community but not activities of daily living; total needing assistance; no need for help or supervision; need for assistance not determined; total) (denominator for this disaggregation will be the State/Territory total of the number of service users in the reporting period) Measure e1: • State/Territory by age group (0–4, 5–14, 15–24, 25–34, 35–44, 45–54,

[3] Data for 2008-09 and prior is from the CSTDA NMDS data set. Data for 2009-10 and going forward is from the DS NMDS data set. This report uses CSTDA/DS NMDS when referring generally to these data.

55–64 years, subtotal 0–49 years, total 0–64 years)

- State/Territory by service group (accommodation support, community support, community access, respite, total)

Measures e2 and e3:

- State/Territory by age group (15–24, 25–34, 35–44, 45–54, 55–64 years, subtotal 15–49 years, total 0–64 years)

Box 8 **Results**

For this report, new data for this benchmark are available for 2009-10.

- Data on State/Territory delivered disability services are presented:
  - by age group in table NDA.6.1
  - by sex in table NDA.6.2
  - by remoteness area in table NDA.6.3
  - by need for assistance in life area in table NDA.6.4
  - by service group in table NDA.6.5.
- Data on open employment services are presented:
  - by age group in table NDA.6.6
  - by sex in table NDA.6.7
  - by remoteness area in table NDA.6.8
  - by need for assistance in life area in table NDA.6.9.
- Data on supported employment services are presented:
  - by age group in table NDA.6.10
  - by sex in table NDA.6.11
  - by remoteness area in table NDA.6.12
  - by need for assistance in life area in table NDA.6.13.

Revised data for 2008-09 are available.

- Data on State/Territory delivered disability services are presented in tables NDA.6.14–18.
- Data on open employment services are presented in tables NDA.6.19–22.
- Data on supported employment services are presented in tables NDA.6.23–26.

Table NDA.6.17	Indigenous service users aged 0–64 years accessing State/Territory delivered disability support services, by need for assistance in life area and State/Territory, 2008-09
Table NDA.6.18	Indigenous potential population aged 0–64 years accessing State/Territory delivered disability support services, by service group and State/Territory, 2008-09
Table NDA.6.19	Indigenous potential population aged 15–64 years accessing open employment services, by age group and State/Territory, 2008-09
Table NDA.6.20	Indigenous potential population aged 15–64 years accessing open employment services, by sex and State/Territory, 2008-09
Table NDA.6.21	Indigenous potential population aged 15–64 years accessing open employment services, by remoteness area, Australia, 2008-09
Table NDA.6.22	Indigenous service users aged 15–64 years accessing open employment services, by need for assistance in life area and State/Territory, 2008-09

Table NDA.6.23	Indigenous potential population aged 15–64 years accessing supported employment services, by age group and State/Territory, 2008-09
Table NDA.6.24	Indigenous potential population aged 15–64 years accessing supported employment services, by sex and State/Territory, 2008-09
Table NDA.6.25	Indigenous potential population aged 15–64 years accessed supported employment services, by remoteness area, Australia, 2008-09
Table NDA.6.26	Indigenous service users aged 15–64 years accessed supported employment services, by need for assistance in life area and State/Territory, 2008-09

Box 9 **Comment on data quality**

This performance benchmark is related to NDA performance indicator 6 (Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services).

Further information on the quality of the data used to inform this performance benchmark is contained in the comment on data quality for performance indicator 6 in the next section on 'Performance Indicators'.

Performance benchmark (f) — All services are subject to quality improvement systems consistent with National Standards by 2010

Key changes from the second cycle of reporting:	No changes
Outcome:	Yet to be determined
Measure:	A measure for this benchmark has yet to be developed
Related performance indicator/s:	Nil
Data source:	Not yet identified
Data provider:	Not yet identified
Data availability:	Nil
Baseline:	Yet to be determined
Cross tabulations provided:	Nil

Box 10 **Comment on data quality**

A measure for this benchmark is yet to be developed.

Performance indicators

The performance indicators in this report cover the 10 'performance indicators' included in the NDA (table 10).

In this report, for performance indicators where data quality and/or completeness is an issue, interim measures are provided and are identified as such in the text.

Data for the performance indicators in this report are presented in attachment tables identified in references throughout this report by a 'NDA' prefix. The CRC has requested that data included in the previous NDA performance report not be reproduced in subsequent reports. Therefore, this report contains only data that relate to more recent reporting periods or which have been revised since the previous NDA performance report.

Table 10 **Performance indicators in the National Disability Agreement[a]**

Performance indicator		*Page no. in this report*
1.	Labour force participation rate for people with disability aged 15–64 years	43
2.	Proportion of people with disability who participate in social and community activities	49
3.	Proportion of the potential population accessing disability services	57
4.	Proportion of people with disability who are satisfied with the range of disability service options and the quality of support received	63
5.	Proportion of the potential population expressing unmet demand for disability support services	64
6.	Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services	70
7.	Labour force participation rate for carers aged 15–64 years of people with disability	75
8.	Proportion of carers of people with disability accessing support services to assist in their caring role	83
	*Interim indicator: Proportion of carers of people with disability accessing support services to assist in their caring roles – restricted carer population	
9.	Proportion of carers of people with disability who are satisfied with the range of disability service options and quality of support received	87
10.	Proportion of people with disability receiving income support	88

a The performance indicators are presented in this table using the direct wording from the table on pp. 6-7 of the NDA (COAG 2009b). This does not necessarily reflect the measures used to report against the indicators in this report. * Interim indicator until indicator 8 can be reported against.

Performance indicator 1: Labour force participation rate for people with disability aged 15–64 years

Key changes from the second cycle of reporting:	SDAC data are planned to be available every three years (guaranteed to 2018) for reporting against this indicator (previously available every six years) An additional disaggregation has been provided for the first time (English proficiency – for measures 1a and 1b)
Outcome:	People with disability achieve economic participation and social inclusion
Measure:	There are three measures for this indicator: • Measure (1a) is the proportion of people with disability aged 15–64 years, who are in the labour force • Measure (1b) is the proportion of people with disability aged 15–64 years, who are employed • Measure (1c) is the proportion of people with disability in the labour force aged 15–64 years, who are unemployed Measure (1a) is defined as: • *numerator* — number of persons with disability aged 15–64 years who are in the labour force (employed or unemployed) • *denominator* — number of persons with disability aged 15–64 years and is expressed as a *percentage* Measure (1b) is defined as: • *numerator* — number of persons with disability aged 15–64 years who are employed • *denominator* — number of persons with disability aged 15–64 years and is expressed as a *percentage* Measure (1c) is defined as: • *numerator* — number of persons with disability aged 15–64 years who are unemployed • *denominator* —number of persons with disability in the labour force (employed or unemployed) aged 15–64 years and is expressed as a *percentage*
Data source:	*Numerator and denominator* — (all) Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018) (Indigenous) National Aboriginal and Torres Strait Islander Social Survey (NATSISS) for Indigenous data. Data are collected every six years. [2008 NATSISS reported for the baseline. No new data available for this report]
Data provider:	ABS

Data availability: SDAC — 2009

Cross tabulations provided:

(all – 1a, 1b and 1c) State/Territory, by:

- disability status (has profound or severe disability, other disability or restrictive long term health condition, total with disability, has no disability, total)

Measure 1(a):

All with reported disability (15–64 years), by State/Territory, by:

- sex (male, female, persons)
- age group (15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years)
- remoteness area (Major Cities, Inner Regional, other, total)
- English proficiency (very well/well, not well/not at all, total)
- country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)
- sex by age group (15–24, 25–34, 35–54, 55–64, total 15–64 years)

Measure 1(b):

All with reported disability (15–64 years), by State/Territory, by:

- sex (male, female, persons)
- age group (15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years)
- remoteness area (Major Cities, Inner Regional, other, total)
- English proficiency (very well/well, not well/not at all, total)
- country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)

Box 11 **Results**

For this report, new data for this indicator are available for 2009.

- Labour force participation data by State and Territory are presented:
  - by disability status in tables NDA.1.1–3
  - by sex in tables NDA.1.4–6
  - by age group in tables NDA.1.7–9
  - by remoteness area in tables NDA.1.10–12
  - by English proficiency in tables NDA.1.13–15
  - by country of birth in tables NDA.1.16–18
  - by sex by age group in tables NDA.1.19–21.
- Employment to population rate data by State and Territory are presented:
  - by disability status in tables NDA.1.22–24
  - by sex in tables NDA.1.25–27
  - by age group in tables NDA.1.28–30
  - by remoteness area in tables NDA.1.31–33
  - by English proficiency in tables NDA.1.34–36
  - by country of birth in tables NDA.1.37–39.
- Unemployment rate data by State and Territory are presented by disability status in tables NDA.1.40–42.

Results for 2003 are available in the 2008-09 baseline NDA performance report.

Table NDA.1.38	Relative standard errors for employment to population rate for people with disability aged 15–64 years, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.1.39	95 per cent confidence intervals for employment to population rate for people with disability aged 15–64 years, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.1.40	Unemployment rate for people with disability aged 15–64 years, all with reported disability, by disability status, by State/Territory, 2009
Table NDA.1.41	Relative standard errors for unemployment rate for people with disability aged 15–64 years, all with reported disability, by disability status, by State/Territory, 2009
Table NDA.1.42	95 per cent confidence intervals for unemployment rate for people with disability aged 15–64 years, all with reported disability, by disability status, by State/Territory, 2009

Box 12 **Comment on data quality**

The DQS for this indicator has been prepared by the ABS and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the proportion of people with disability who are participating in the labour force, along with supplementary measures on employment and unemployment. Data are not available by socioeconomic status (SES).
- The SDAC does not include people living in very remote areas, which affects the comparability of the NT results.
- The SDAC is planned to be conducted every three years (guaranteed to 2018), with the most recent data available for 2009.
- Some SDAC estimates for Tasmania, the ACT and the NT have relative standard errors greater than 25 per cent and should be used with caution.
- Detailed explanatory notes are publicly available to assist in interpretation of results.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues.

- The size of the standard errors means that SDAC data may not be adequate for measuring change over time. Small year to year movements may be difficult to detect if the size of the standard errors is large compared to the size of the difference between estimates.
- Disaggregation of this indicator by SES is a priority. The current structure of the SDAC does not include collection of SES. Further work is required to determine the appropriate concept and definition of SES that should be collected for people with disability.
- Australian governments have committed to closing the gaps between Indigenous and non-Indigenous people. Comparable data are not available for Indigenous and non-Indigenous people with disability. Further data development is needed so that outcomes can be compared.
- The CRC has requested consideration of an additional measure on underemployment (CRC 2010). Data on underemployment are not available from the 2009 SDAC due to a sequencing issue with the questions, but are anticipated to be available from the 2012 SDAC.

Performance indicator 2: Proportion of people with disability who participate in social and community activities

Key changes from the second cycle of reporting:	SDAC data are planned to be available every three years (guaranteed to 2018) for reporting against this benchmark (previously available every six years) An additional disaggregation has been provided for the first time (English proficiency)
Outcome:	People with disability achieve economic participation and social inclusion
Measure:	Social and community participation of people with disability

There are three measures proposed for this indicator:

- Measure (2a) is the proportion of people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week
- Measure (2b) is the proportion of people with disability aged 5–64 years who travelled to a social activity in the last two weeks
- Measure (2c) is the proportion of people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition

Measure 2a is defined as:

- *numerator* — number of persons aged 15–64 years with disability who had face-to-face contact with ex-household family or friends in the previous week
- *denominator* — total number of persons with disability aged 15–64 years

and is expressed as a *percentage*

Measure 2b is defined as:

- *numerator* — number of persons aged 5–64 years with disability who travelled to a social activity in the last two weeks
- *denominator* — total number of persons with disability aged 5–64 years

and is expressed as a *percentage*

Measure 2c is defined as:

- *numerator* — number of persons aged 5–64 years with disability *who* report the main reason for not leaving home as often as they would like is their disability or condition
- *denominator* — total number of persons with disability aged 5–64 years

and is expressed as a *percentage*

Data source: *Numerator and denominator —*

- (All measures) Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018).
- (Measure 2a) only, and only for persons with and without disability) General Social Survey (GSS). Data are collected every four years.
- (Indigenous people) National Aboriginal and Torres Strait Islander Social Survey (NATSISS). Data are collected every six years [2008 NATSISS reported for the baseline. No new data available for this report]

Data provider: ABS

Data availability: SDAC — 2009
GSS — 2010

Cross tabulations provided: Measure 2(a) is disaggregated by:

- State/Territory, by disability status (has profound or severe disability, other disability or restrictive long term health condition, total with disability)

Measures 2(b) and 2(c) are disaggregated by:

- State/Territory, by disability status (has profound or severe disability, other disability or restrictive long term health condition, total with disability, has no disability, total)

All with reported disability by State/Territory, by:

- sex (male, female, persons)
- age group (5–14 [for measures 2b and 2c only], 15–24, 25–34, 35–44, 45–54, 55–64, total)
- remoteness area (Major Cities, Inner Regional, other, total)
- English proficiency (very well/well, not well/not at all, total)
- country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)
- sex by age group (where possible)

Box 13 **Results**

For this report, new data for this indicator are available for 2009.

- Data on face-to-face contact with ex-household family or friends in the previous week by State and Territory are presented:
  - by disability status in tables NDA.2.1–3
  - by sex in tables NDA.2.4–6
  - by age group in tables NDA.2.7–9
  - by remoteness area in tables NDA.2.10–12
  - by English proficiency in tables NDA.2.13–15
  - by country of birth in tables NDA.2.16–18
  - by sex by age group in tables NDA.2.19–21.
- Data on travel to a social activity in the last two weeks by State and Territory are presented:
  - by disability status in tables NDA.2.22–24
  - by sex in tables NDA.2.25–27
  - by age group in tables NDA.2.28–30
  - by remoteness area in tables NDA.2.31–33
  - by English proficiency in tables NDA.2.34–36
  - by country of birth in tables NDA.2.37–39
  - by sex by age group in tables NDA.2.40–42.
- Data on the main reason for not leaving home as often as they would like is their disability or condition, by State and Territory are presented:
  - by disability status in tables NDA.2.43–45
  - by sex in tables NDA.2.46–48
  - by age group in tables NDA.2.49–51
  - by remoteness area in tables NDA.2.52–54
  - by English proficiency in tables NDA.2.55–57
  - by country of birth in tables NDA.2.58–60
  - by sex by age group in tables NDA.2.61–63.

Results for 2003 are available in the 2008-09 baseline NDA performance report.

Table NDA.2.9	95 per cent confidence intervals for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.10	People with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.11	Relative standard errors for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.12	95 per cent confidence intervals for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.13	People with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.14	Relative standard errors for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.15	95 per cent confidence intervals for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.16	People with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by country of birth, by State/Territory, 2009

Table NDA.2.17	Relative standard errors for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.18	95 per cent confidence intervals for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.19	People with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.20	Relative standard errors for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.21	95 per cent confidence intervals for people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.22	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, by disability status, by State/Territory, 2009
Table NDA.2.23	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, by disability status, by State/Territory, 2009
Table NDA.2.24	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, by disability status, by State/Territory, 2009
Table NDA.2.25	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.26	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.27	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.28	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.29	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.30	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.31	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.32	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.33	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by remoteness area, by State/Territory, 2009.

Table NDA.2.34	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.35	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.36	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.37	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.38	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.39	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.40	People with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.41	Relative standard errors for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.42	95 per cent confidence intervals for people with disability aged 5–64 years who travelled to a social activity in the last two weeks, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.43	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by disability status, by State/Territory, 2009
Table NDA.2.44	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by disability status, by State/Territory, 2009
Table NDA.2.45	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by disability status, by State/Territory, 2009
Table NDA.2.46	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.47	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.48	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex, by State/Territory, 2009
Table NDA.2.49	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by age group, by State/Territory, 2009

Table NDA.2.50	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.51	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by age group, by State/Territory, 2009
Table NDA.2.52	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by remoteness area, by State/Territory, 2009
Table NdA.2.53	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.54	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by remoteness area, by State/Territory, 2009
Table NDA.2.55	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.56	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.57	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by English proficiency, by State/Territory, 2009
Table NDA.2.58	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.59	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.60	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by country of birth, by State/Territory, 2009
Table NDA.2.61	People with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.62	Relative standard errors for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.63	95 per cent confidence intervals for people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition, all with reported disability, by sex by age group, by State/Territory, 2009
Table NDA.2.64	People with disability (aged 18–64 years), who have had face-to-face contact with family or friends living outside the household in the last week, by disability or long-term health condition status, by State/Territory, 2010

Box 14 **Comment on data quality**

The DQS for this indicator has been prepared by the ABS and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- There are three measures for this indicator. The data provide relevant information, at the State and Territory level, on people with disability who have participated in social activities. Data are not available by Indigenous status or socioeconomic status (SES).
- The SDAC does not include people living in very remote areas, which affects the comparability of the NT results.
- The SDAC is planned to be conducted every three years (guaranteed to 2018), with the most recent data available for 2009.
- Some SDAC estimates have relative standard errors greater than 25 per cent and should be used with caution.
- Detailed explanatory notes are publicly available to assist in interpretation of results.
- Additional data from the data source are available on-line, and on request.

Measure 2a

- Relevant information from the General Social Survey (GSS) is used to provide comparisons for people with and without disability. Data reported are comparable over time. However, GSS estimates are not comparable with SDAC estimates. The GSS uses different questions to the SDAC to identify people with disability, and therefore the GSS should not be used to provide estimates of prevalence. In addition, the scope of the GSS is persons aged 18 years or over, which is different to the scope captured by the SDAC for this measure (persons aged 15–64 years).

The Steering Committee also notes the following issues.

- The size of the standard errors means that SDAC data may not be adequate for measuring change over time. Small year to year movements may be difficult to detect if the size of the standard errors is large compared to the size of the difference between estimates.
- Disaggregation of this indicator by SES is a priority. The current structure of the SDAC does not include collection of SES. Further work is required to determine the appropriate concept and definition of SES that should be collected for people with disability.
- Australian governments have committed to closing the gaps between Indigenous and non-Indigenous people. Comparable data are not available for Indigenous and non-Indigenous people with disability. Further data development is needed so that outcomes can be compared.

Performance indicator 3: Proportion of the potential population accessing disability services

Key changes from the second cycle of reporting:	Data from the 2009 SDAC have been included in the calculation of the denominator for this indicator. This has resulted in a break in series with data included in previous reports. Comparable data for the denominator are only able to be backcast for one year (creating a new baseline). Therefore, two years of data are included in this report (new baseline and current year). Data from the 2008-09 CSTDA NMDS have been revised. These data are included in this report.
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Measure:	There are three measures for this indicator: • Measure 3a is the proportion of the potential population (people with profound or severe core activity limitation) aged 0–64 years who used State/Territory delivered disability support services • Measure 3b is the proportion of the potential population (people with profound or severe core activity limitation) aged 15–64 years who used open employment services • Measure 3c is the proportion of the potential population (people with profound or severe core activity limitation) aged 15–64 years who used supported employment services Measure 3a is defined as: • *numerator* — number of persons aged 0–64 years who used State/Territory delivered disability support services in the reporting period • *denominator* — estimated potential population for State/Territory delivered disability support services (people aged 0–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period and is expressed as a *percentage* Measure 3b is defined as: • *numerator* — number of persons aged 15–64 years who used open employment services in the reporting period • *denominator* — estimated potential population for employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period and is expressed as a *percentage* Measure 3c is defined as: • *numerator* — number of persons aged 15–64 years who used supported employment services in the reporting period • *denominator* — estimated potential population for employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period and is expressed as a *percentage*

These measures exclude specialist psychiatric disability services in Victoria, Queensland and WA

Data source: *Numerator* — Disability Services National Minimum Data Set (DS/CSTDA NMDS). Data are collected annually

Denominator — Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018). Census of Population and Housing (Census), data are collected every five years. Estimated Resident Population (ERP), data are collected annually

Data are available for reporting annually

Data provider: AIHW

Data availability: 2008-09 (revised due to revised CSTDA NMDS data and new potential population for the denominator) and 2009-10 (DS NMDS)

Cross tabulations provided: The following disaggregations are presented for all three measures:

- Nationally by country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)
- Nationally by remoteness area (Major Cities, Inner Regional, Outer Regional/Remote, total)
- State/Territory by need for assistance in life area (activities of daily living; activities of independent living or work, education or community but not activities of daily living; total needing assistance; no need for help or supervision; need for assistance not determined; total) (denominator for this disaggregation will be the State/Territory total of the number of service users in the reporting period)

Measure 3a: For each service group (accommodation support, community support, community access, respite and total):

- State/Territory by sex (male, female, total) by age group (0–4, 5–14, 15–24, 25–34, 35–44, 45–54, 55–64, total 0–64 years)

Measures 3b and 3c:

- State/Territory by sex (male, female, total) by age group (15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years)

Box 15 **Results**

For this report, new data for this indicator are available for 2009-10.

- Data on State/Territory delivered disability services are presented:
  - by sex, by age group in tables NDA.3.1–5
  - by country of birth and remoteness in tables NDA.3.6–10
  - by need for assistance in life area in tables NDA.3.11–15.
- Data on open employment services are presented:
  - by sex, by age group in table NDA.3.16
  - by country of birth and remoteness in tables NDA.3.17
  - by need for assistance in life area in tables NDA.3.18.
- Data on supported employment services are presented:
  - by sex, by age group in table NDA.3.19
  - by country of birth and remoteness in tables NDA.3.20
  - by need for assistance in life area in tables NDA.3.21.

Revised data for 2008-09 are available.

- Data on State/Territory delivered disability services are presented in tables NDA.3.22–36.
- Data on open employment services are presented in tables NDA.3.37–39.
- Data on supported employment services are presented in tables NDA.3.40–42.

Attachment tables

Table NDA.3.1	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (total), by sex, by age group and State/Territory, 2009-10
Table NDA.3.2	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by sex, by age group and State/Territory, 2009-10
Table NDA.3.3	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community support), by sex, by age group and State/Territory, 2009-10
Table NDA.3.4	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community access), by sex, by age group and State/Territory, 2009-10
Table NDA.3.5	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (respite), by sex, by age group and State/Territory, 2009-10

Table NDA.3.6	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (total), by country of birth and remoteness, 2009-10
Table NDA.3.7	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by country of birth and remoteness, 2009-10
Table NDA.3.8	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community support), by country of birth and remoteness, 2009-10
Table NDA.3.9	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community access), by country of birth and remoteness, 2009-10
Table NDA.3.10	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (respite), by country of birth and remoteness, 2009-10
Table NDA.3.11	Service users aged 0–64 years accessing State/Territory delivered disability support services (total), by need for assistance in life area, 2009-10
Table NDA.3.12	Service users aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by need for assistance in life area, 2009-10
Table NDA.3.13	Service users aged 0–64 years accessing State/Territory delivered disability support services (community support), by need for assistance in life area, 2009-10
Table NDA.3.14	Service users aged 0–64 years accessing State/Territory delivered disability support services (community access), by need for assistance in life area, 2009-10
Table NDA.3.15	Service users aged 0–64 years accessing State/Territory delivered disability support services (respite), by need for assistance in life area, 2009-10
Table NDA.3.16	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing open employment services, by sex, age group and State/Territory, 2009-10
Table NDA.3.17	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing open employment services, by country of birth and remoteness, 2009-10
Table NDA.3.18	Service users aged 15–64 years accessing open employment services, by need for assistance in life area, 2009-10
Table NDA.3.19	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing supported employment services, by sex, age group and State/Territory, 2009-10
Table NDA.3.20	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing supported employment services, by country of birth and remoteness, 2009-10
Table NDA.3.21	Service users aged 15–64 years accessing supported employment services, by need for assistance in life area, 2009-10
Table NDA.3.22	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services, by sex, age group and State/Territory, 2008-09
Table NDA.3.23	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by sex, age group and State/Territory, 2008-09

Table NDA.3.24	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community support), by sex, age group and State/Territory, 2008-09
Table NDA.3.25	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community access), by sex, age group and State/Territory, 2008-09
Table NDA.3.26	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (respite), by sex, age group and State/Territory, 2008-09
Table NDA.3.27	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (total), by country of birth and remoteness, 2008-09
Table NDA.3.28	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by country of birth and remoteness, 2008-09
Table NDA.3.29	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community support), by country of birth and remoteness, 2008-09
Table NDA.3.30	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (community access), by country of birth and remoteness, 2008-09
Table NDA.3.31	Potential population (people with profound or severe core activity limitation) aged 0–64 years accessing State/Territory delivered disability support services (respite), by country of birth and remoteness, 2008-09
Table NDA.3.32	Service users aged 0–64 years accessing State/Territory delivered disability support services (total), by need for assistance in life area, 2009-10
Table NDA.3.33	Service users aged 0–64 years accessing State/Territory delivered disability support services (accommodation support), by need for assistance in life area, 2008-09
Table NDA.3.34	Service users aged 0–64 years accessing State/Territory delivered disability support services (community support), by need for assistance in life area, 2008-09
Table NDA.3.35	Service users aged 0–64 years accessing State/Territory delivered disability support services (community access), by need for assistance in life area, 2008-09
Table NDA.3.36	Service users aged 0–64 years accessing State/Territory delivered disability support services (respite), by need for assistance in life area, 2008-09
Table NDA.3.37	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing open employment services, by sex, age group and State/Territory, 2008-09
Table NDA.3.38	Potential population (people with profound or severe core activity limitation) aged 15–64 years accessing open employment services, by country of birth and remoteness, 2008-09
Table NDA.3.39	Service users aged 15–64 years accessing open employment services, by need for assistance in life area and State/Territory, 2008-09
Table NDA.3.40	Potential population aged 15–64 years accessing supported employment services, by sex, age group and State/Territory, 2008-09

Table NDA.3.41	Potential population aged 15–64 years accessing supported employment services, by country of birth and remoteness, Australia, 2008-09
Table NDA.3.42	Service users aged 15–64 years accessing supported employment services, by need for assistance in life area and State/Territory, 2008-09

Box 16 **Comment on data quality**

The DQS for this indicator has been prepared by the AIHW and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the proportion of the potential population accessing disability support services. Data are not available by socioeconomic status (SES).
- Annual data for the numerator are available from the Disability Services National Minimum Dataset (DS/CSTDA NMDS). The most recent available data are for 2009-10. Data for the denominator (measuring the potential population) have been estimated from several different sources, from different years, under key assumptions, which may reduce the accuracy of the estimates. The denominator can be estimated annually.
- The inclusion of the 2009 SDAC data in the denominator has resulted in a break in series for this indicator. Data are available for 2009-10 and backcast for 2008-09. Data are comparable for the two years included in this report.
- DS/CSTDA NMDS data are derived from service delivery administrative data. It is assumed that service delivery processes involve the assessment of disability support needs following broadly consistent principles and practices across jurisdictions. However, this assumption is untested.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues.

- The method for deriving the potential population is currently under review through the Disability Policy and Research Working Group (DPRWG). This review should consider the feasibility of backcasting using the new method to the NDA baseline year reported against (2007-08).
- Disaggregation of this indicator by SES is a priority. The DS/CSTDA NMDS data collection does not currently include SES. Further work is required to determine the appropriate concept and definition of SES for people with disability and their carers.
- Australian governments have committed to closing the gaps between Indigenous and non-Indigenous people. Further data development is needed to allow comparison of outcomes for Indigenous and non-Indigenous people with disability.

Performance indicator 4: Proportion of people with disability who are satisfied with the range of disability service options and quality of support received

Key changes from the second cycle of reporting:	No changes
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Measure:	A measure for this indicator has yet to be developed

Box 17 Comment on data quality

A measure for this indicator is yet to be developed.

The ABS has advised that relevant data items will be tested for suitability of inclusion in the 2012 Survey of Disability, Ageing and Carers.

Performance indicator 5: Proportion of the potential population expressing unmet demand for disability support services

Key changes from the second cycle of reporting:	Data are reported for the first time for two of the new measures included in the previous years report (5b and 5c) SDAC data are planned to be available every three years (guaranteed to 2018) for reporting against measures 5b and 5c (previously available every six years) An additional disaggregation has been provided for the first time (English proficiency – for measures 5a and 5b)
Outcome:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Measure:	There are three measures for this indicator: • Measure 5a is the proportion of eligible persons aged 0–64 years waiting to commence service or waiting for additional service (from jurisdiction demand systems) • Measure 5b is the proportion of people aged 0–64 years in potential population who have taken action in the last 12 months to get more formal assistance but who still need more formal assistance • Measure 5c is the proportion of people aged 0–64 years in potential population who need more formal assistance than they are currently receiving Measure 5a is defined as: • *numerator* — number of eligible persons aged 0–64 years waiting to commence service or waiting for additional service (from jurisdiction demand systems) • *denominator* — number of persons aged 0–64 years who require and are eligible for disability support services, including persons receiving and not receiving services (from jurisdiction demand systems) and is expressed as a *percentage* Measure 5b is defined as: • *numerator* — number of persons aged 0–64 years in potential population who have taken action in the last 12 months to get more formal assistance but who still need more formal assistance • *denominator* — number of persons aged 0–64 years in potential population and is expressed as a *percentage* Measure 5c is defined as: • *numerator* — number of persons aged 0–64 years in potential population who need more formal assistance than they are currently receiving • *denominator* — number of persons aged 0–64 years in potential population and is expressed as a *percentage*

Data source:

Numerator and denominator —

- Measure 5a: Jurisdiction demand systems. Data are anticipated to be collected annually. Not yet available
- Measures 5b and 5c: Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018). (Indigenous) National Aboriginal and Torres Strait Islander Social Survey (NATSISS) for Indigenous data. Data are collected every six years. [2008 NATSISS reported for the baseline. No new data available for this report].

Data provider:

ABS

Data availability:

Measure 5a:
[Data not yet available]

Measures 5b and 5c:
SDAC — 2009

Cross tabulations provided:

(Measures 5b and 5c)
All with reported disability aged 0–64 years, by State/Territory, by:

- sex (male, female, persons)
- age group (0–14,15–24, 25–34, 35–44, 45–54, 55–64, total 0–64 years)
- remoteness area (Major Cities, Inner Regional, other, total)
- English proficiency (very well/well, not well/not at all, total)
- country of birth (Australia, other English speaking countries, all English speaking countries, non-English speaking countries, total)

[Data disaggregation will depend on the reliability of estimates]

Box 18 **Results**

For this report, new data for this indicator are available for 2009.

- Data on the potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance by State and Territory are presented:
  - by sex in tables NDA.5.1–3
  - by age group in tables NDA.5.4–6
  - by remoteness area in tables NDA.5.7–9
  - by English proficiency in tables NDA.5.10–12
  - by country of birth in tables NDA.5.13–15.
- Data on the potential population who need more formal assistance than they are currently receiving by State and Territory are presented:
  - by sex in tables NDA.5.16–18
  - by age group in tables NDA.5.19–21
  - by remoteness area in tables NDA.5.22–24
  - by English proficiency in tables NDA.5.25–27
  - by country of birth in tables NDA.5.28–30.

Results for an interim measure (proportion of the potential population who need more assistance) for 2003 are available in the 2008-09 baseline NDA performance report.

Attachment tables

Table NDA.5.1	People aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by sex, by State/Territory, 2009
Table NDA.5.2	Relative standard errors for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by sex, by State/Territory, 2009
Table NDA.5.3	95 per cent confidence intervals for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by sex, by State/Territory, 2009
Table NDA.5.4	People aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by age group, by State/Territory, 2009
Table NDA.5.5	Relative standard errors for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by age group, by State/Territory, 2009
Table NDA.5.6	95 per cent confidence intervals for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by age group, by State/Territory, 2009

Table NDA.5.7	People aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by remoteness area, by State/Territory, 2009
Table NDA.5.8	Relative standard errors for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by remoteness area, by State/Territory, 2009
Table NDA.5.9	95 per cent confidence intervals for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by remoteness area, by State/Territory, 2009
Table NDA.5.10	People aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by English proficiency, by State/Territory, 2009
Table NDA.5.11	Relative standard errors for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by English proficiency, by State/Territory, 2009
Table NDA.5.12	95 per cent confidence intervals for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by English proficiency, by State/Territory, 2009
Table NDA.5.13	People aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by country of birth, by State/Territory, 2009
Table NDA.5.14	Relative standard errors for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by country of birth, by State/Territory, 2009
Table NDA.5.15	95 per cent confidence intervals for people aged 0–64 years in potential population who have taken action in the last twelve months to get more formal assistance but who still need more formal assistance, by country of birth, by State/Territory, 2009
Table NDA.5.16	People aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by sex, by State/Territory, 2009
Table NDA.5.17	Relative standard errors for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by sex, by State/Territory, 2009
Table NDA.5.18	95 per cent confidence intervals for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by sex, by State/Territory, 2009
Table NDA.5.19	People aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by age group, by State/Territory, 2009
Table NDA.5.20	Relative standard errors for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by age group, by State/Territory, 2009
Table NDA.5.21	95 per cent confidence intervals for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by age group, by State/Territory, 2009
Table NDA.5.22	People aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by remoteness area, by State/Territory, 2009
Table NDA.5.23	Relative standard errors for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by remoteness area, by State/Territory, 2009

Table NDA.5.24	95 per cent confidence intervals for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by remoteness area, by State/Territory, 2009
Table NDA.5.25	People aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by English proficiency, by State/Territory, 2009
Table NDA.5.26	Relative standard errors for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by English proficiency, by State/Territory, 2009
Table NDA.5.27	95 per cent confidence intervals for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by English proficiency, by State/Territory, 2009
Table NDA.5.28	People aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by country of birth, by State/Territory, 2009
Table NDA.5.29	Relative standard errors for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by country of birth, by State/Territory, 2009
Table NDA.5.30	95 per cent confidence intervals for people aged 0–64 years in potential population who need more formal assistance than they are currently receiving, by country of birth, by State/Territory, 2009

Box 19 **Comment on data quality**

The DQS for this indicator has been prepared by the ABS and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- There are three measures for this indicator. Data for measure 5(a) are not available. Measure 5(a) is intended to measure unmet demand as a proportion of confirmed demand. Definitional work to inform data development is proceeding through the Disability Policy and Research Working Group (DPRWG).
- The data provide relevant information, at the State and Territory level, on the potential population expressing unmet demand for disability support services. Data are not available by Indigenous status or socioeconomic status (SES).
- The SDAC does not include people living in very remote areas, which affects the comparability of the NT results.
- The SDAC is planned to be conducted every three years from 2012 (guaranteed to 2108), with the most recent data available for 2009.
- Some SDAC estimates have relative standard errors greater than 25 per cent and should be used with caution.
- Detailed explanatory notes are publicly available to assist in interpretation of results.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues.

- Disaggregation of this indicator by Indigenous status and SES is a priority.
- The size of the standard errors means that SDAC data may not be adequate for measuring change over time. Small year to year movements may be difficult to detect if the size of the standard errors is large compared to the size of the difference between the estimates.
- Comparable data from the previous SDAC are not available. Although information on the need for more assistance is available from the 2003 SDAC, it is not possible to identify the need for more *formal* assistance.

Performance indicator 6: Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services

Key changes from the second cycle of reporting:

Data from the 2009 SDAC have been included in the calculation of the denominator for this indicator. This has resulted in a break in series with data included in previous reports.

Comparable data for the denominator are only able to be backcast for one year (creating a new baseline). Therefore, two years of data are included in this report (new baseline and current year).

Data from the 2008-09 CSTDA NMDS have been revised. These data are included in this report.

Outcome:

People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible

Measure:

There are three measures for this indicator:

- Measure 6a is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 0–64 years who used State/Territory delivered disability support services
- Measure 6b is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 15–64 years who used open employment services
- Measure 6c is the proportion of the Indigenous potential population (people with profound or severe core activity limitation) aged 15–64 years who used supported employment services

Measure 6a is defined as:

- *numerator* — number of Indigenous persons aged 0–64 years who used State/Territory delivered disability support services in the reporting period
- *denominator* — estimated Indigenous potential population for State/Territory delivered disability support services (people aged 0–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period

and is expressed as a *percentage*

Measure 6b is defined as:

- *numerator* — number of Indigenous persons aged 15–64 years who used open employment services in the reporting period
- *denominator* — estimated Indigenous potential population for employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period

and is expressed as a *percentage*

Measure 6c is defined as:

- *numerator* — number of Indigenous persons aged 15–64 years who used supported employment services in the reporting period
- *denominator* — estimated Indigenous potential population for employment services (people aged 15–64 years with profound or severe core activity limitation) on 30 June at the start of the reporting period

and is expressed as a *percentage*

These measures exclude specialist psychiatric disability services in Victoria, Queensland and WA

Data source: *Numerator* — Disability Services National Minimum Data Set (DS/CSTDA NMDS). Data are collected annually

Denominator — Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018). Census of Population and Housing (Census). Data are collected every five years. Estimates of Indigenous projected population are produced annually and updated every five years following a Census

Data are available for reporting annually

Data provider: AIHW

Data availability: 2008-09 (revised due to revised CSTDA NMDS data and new potential population for the denominator) and 2009-10 (DS NMDS)

Cross tabulations provided: The following disaggregations are presented for all three measures:

- State/Territory by sex (male, female, persons)
- Nationally by remoteness area (Major Cities, Inner Regional, Outer Regional/Remote, total)
- State/Territory by need for assistance in life area (activities of daily living; activities of independent living or work, education or community but not activities of daily living; total needing assistance; no need for help or supervision; need for assistance not determined; total) (denominator for this disaggregation will be the State/Territory total of the number of service users in the reporting period)

Measure 6a:

- State/Territory by age group (0–4, 5–14, 15–24, 25–34, 35–44, 45–54, 55–64, subtotal 0–49 years, total 0–64 years)
- State/Territory by service group (accommodation support, community support, community access, respite, total)

Measures 6b and 6c:

- State/Territory by age group (15–24, 25–34, 35–44, 45–54, 55–64, subtotal 15–49 years, total 15–64 years)

Box 20 **Results**

For this report, new data for this indicator are available for 2009-10.

- Data on State/Territory delivered disability services are presented:
  - by age group in table NDA.6.1
  - by sex in table NDA.6.2
  - by remoteness area in table NDA.6.3
  - by need for assistance in life area in table NDA.6.4
  - by service group in table NDA.6.5.
- Data on open employment services are presented:
  - by age group in table NDA.6.6
  - by sex in table NDA.6.7
  - by remoteness area in table NDA.6.8
  - by need for assistance in life area in table NDA.6.9.
- Data on supported employment services are presented:
  - by age group in table NDA.6.10
  - by sex in table NDA.6.11
  - by remoteness area in table NDA.6.12
  - by need for assistance in life area in table NDA.6.13.

Revised data for 2008-09 are available.

- Data on State/Territory delivered disability services are presented in tables NDA.6.14–18.
- Data on open employment services are presented in tables NDA.6.19–22.
- Data on supported employment services are presented in tables NDA.6.23–26.

Table NDA.6.20	Indigenous potential population aged 15–64 years accessing open employment services, by sex and State/Territory, 2008-09
Table NDA.6.21	Indigenous potential population aged 15–64 years accessing open employment services, by remoteness area, Australia, 2008-09
Table NDA.6.22	Indigenous service users aged 15–64 years accessing open employment services, by need for assistance in life area and State/Territory, 2008-09
Table NDA.6.23	Indigenous potential population aged 15–64 years accessing supported employment services, by age group and State/Territory, 2008-09
Table NDA.6.24	Indigenous potential population aged 15–64 years accessing supported employment services, by sex and State/Territory, 2008-09
Table NDA.6.25	Indigenous potential population aged 15–64 years accessed supported employment services, by remoteness area, Australia, 2008-09

Table NDA.6.26	Indigenous service users aged 15–64 years accessed supported employment services, by need for assistance in life area and State/Territory, 2008-09

Box 21 Comment on data quality

The DQS for this indicator has been prepared by the AIHW and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the proportion of the Indigenous potential population accessing disability support services.
- Annual data for the numerator are available from the Disability Services National Minimum Dataset (DS/CSTDA NMDS). The most recent available data are for 2009-10. Data for the denominator (measuring the potential population) have been estimated from several different sources, from different years, under key assumptions, which may reduce the accuracy of the estimates. The denominator can be estimated annually.
- The inclusion of the 2009 SDAC data in the denominator has resulted in a break in series for this indicator. Data are available for 2009-10 and backcast for 2008-09. Data are comparable for the two years included in this report.
- DS/CSTDA NMDS data are derived from service delivery administrative data. It is assumed that service delivery processes involve the assessment of disability support needs following broadly consistent principles and practices across jurisdictions. However, this assumption is untested.
- The quality of Indigenous data varies substantially across jurisdictions and data sources. It is recommended that these data be viewed in close conjunction with the associated data quality statement.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues.

- Further work is needed to test the many assumptions that underpin the Indigenous potential population (the denominator for this indicator).
- Australian governments have committed to closing the gaps between Indigenous and non-Indigenous people. Further data development is needed to allow comparison of outcomes for Indigenous and non-Indigenous people with disability.

Performance indicator 7: Labour force participation rate for carers aged 15–64 years of people with disability

Key changes from the second cycle of reporting:	SDAC data are planned to be available every three years (guaranteed to 2018) for reporting against this indicator (previously available every six years) There was a change in the identification of a 'primary carer' in the 2009 SDAC following feedback from the survey user community. 2009 data using the new (2009 SDAC) definition have been provided for current year reporting. 2009 data using the previous (2003 SDAC) definition have been provided to enable a time series with the 2003 SDAC data An additional disaggregation has been provided for the first time (English proficiency)
Outcome:	Families and carers are well supported
Measure:	Proportion of carers (of people with disability) aged 15–64 years who are in the labour force The measure is defined as: • *numerator* — number of carers aged 15–64 years (carers of people aged 0–64 years with disability) who are in the labour force (employed or unemployed) • *denominator* — total number of carers aged 15–64 years (carers of people aged 0–64 years with disability) and is expressed as a *percentage*
Data source:	*Numerator and denominator* — Survey of Disability, Ageing and Carers (SDAC). Data will be collected every three years (guaranteed to 2018)
Data provider:	ABS
Data availability:	2003 (revised due to incorrect scope reported in the 2008-09 baseline NDA performance report) and 2009
Cross tabulations provided:	For each of the following carer status groups data for 2009 will be by: • Primary carer (2009 definition for reporting) • Primary carer (2003 definition for time series) • Non-primary carer (2009 definition for reporting) • Non-primary carer (2003 definition for time series) • All carers • Non-carers The following disaggregations will be presented by State/Territory: • Carer sex (male, female, persons) • Carer age group (15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years)

- Carer Remoteness Area (Major Cities, Inner Regional, other, total)
- Carer English proficiency (very well/well, not well/not at all, total)
- Carer country of birth (Australia, other, total)
- Carer sex by carer age group (15–44, 45–64, total 15–64 years) where possible

For the following carer status groups:

- Primary carer (using 2009 definition for reporting)
- Primary carer (using 2003 definition for time series)

The following disaggregations will also be presented by State/Territory:

- main recipient of care age group (0–14, 15–24, 25–34, 35–44, 45–54, 55–64, total 15–64 years)
- relationship between carer and main recipient of care (wife/husband/partner, mother, father, son/son-in-law/daughter/daughter-in-law, other, total)

For each of the following carer status groups, revised 2003 data will be by:

- Primary carer
- Non-primary carer
- All carers
- Non-carers

The following disaggregations will be presented by State/Territory:

- Carer sex by carer age group (15–44, 45–64, total 15–64 years)
- Carer Remoteness Area (Major Cities, Inner Regional, other, total).

Box 22 **Results**

For this report, new data for this indicator are available for 2009.

- Data on labour force participation for primary carers by State and Territory are presented:
  - by sex of carer in tables NDA.7.1–3
  - by carer age groups tables NDA.7.4–6
  - by carer remoteness area in tables NDA.7.7–9
  - by carer country of birth in tables NDA.7.10–12
  - by carer English proficiency in tables NDA.7.13–15
  - by carer sex by carer age group in tables NDA.7.16–18
  - by main recipient of care age groups in tables NDA.7.19–21
  - by relationship between carer and main recipient of care in tables NDA.7.22–24.
- Data on labour force participation for non-primary carers by State and Territory are presented:
  - by sex of carer in tables NDA.7.25–27
  - by carer age groups tables NDA.7.28–30
  - by carer remoteness area in tables NDA.7.31–33
  - by carer country of birth in tables NDA.7.34–36
  - by carer English proficiency in tables NDA.7.37–39
  - by carer sex by carer age group in tables NDA.7.40–42.
- Data on labour force participation for all carers and non-carers by State and Territory are presented:
  - by sex of carer in tables NDA.7.43–45
  - by carer age groups tables NDA.7.46–48
  - by carer remoteness area in tables NDA.7.49–51
  - by carer country of birth in tables NDA.7.52–54
  - by carer English proficiency in tables NDA.7.55–57
  - by carer sex by carer age group in tables NDA.7.58–60.

A selection of revised baseline data for 2003 are presented in this report (see comment on data quality).

- Data on labour force participation for primary carers by State and Territory are presented by remoteness and by sex by age group in tables NDA.7.61–62.
- Data on labour force participation for non-primary carers by State and Territory are presented by remoteness and by sex by age group in tables NDA.7.63–64.
- Data on labour force participation for all carers and non-carers by State and Territory are presented by remoteness and by sex by age group in tables NDA.7.65–66.

Attachment tables

Table NDA.7.1	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by State/Territory, 2009

Table NDA.7.3	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by State/Territory, 2009
Table NDA.7.4	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer age group, by State/Territory, 2009
Table NDA.7.5	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer age group, by State/Territory, 2009
Table NDA.7.6	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer age group, by State/Territory, 2009
Table NDA.7.7	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer remoteness area, by State/Territory, 2009
Table NDA.7.8	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer remoteness area, by State/Territory, 2009
Table NDA.7.9	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer remoteness area, by State/Territory, 2009
Table NDA.7.10	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer country of birth, by State/Territory, 2009
Table NDA.7.11	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer country of birth, by State/Territory, 2009
Table NDA.7.12	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer country of birth, by State/Territory, 2009
Table NDA.7.13	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.14	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.15	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.16	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.17	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.18	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009

Table NDA.7.19	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by main recipient of care age group, by State/Territory, 2009
Table NDA.7.20	Relative standard errors for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by main recipient of care age group, by State/Territory, 2009
Table NDA.7.21	95 per cent confidence intervals for primary carers (carers of people with disability) aged 15–64 years, by main recipient of care age group, by State/Territory, 2009
Table NDA.7.22	Labour force participation rate for primary carers aged 15–64 years, by relationship between carer and main recipient of care, by State/Territory, 2009
Table NDA.7.23	Relative standard error for labour force participation rate for primary carers aged 15–64 years, by relationship between carer and main recipient of care, by State/Territory, 2009
Table NDA.7.24	95 per cent confidence intervals for primary carers aged 15–64 years, by relationship between carer and main recipient of care, by State/Territory, 2009
Table NDA.7.25	Labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer sex, by State/Territory 2009
Table NDA.7.26	Relative standard error for labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer sex, by State/Territory, 2009
Table NDA.7.27	95 per cent confidence intervals for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer sex, by State/Territory 2009
Table NDA.7.28	Labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.29	Relative standard error for labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.30	95 per cent confidence intervals for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.31	Labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.32	Relative standard error for labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.33	95 per cent confidence intervals for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.34	Labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.35	Relative standard error for labour force participation rate for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.36	95 per cent confidence intervals for non–primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.37	Labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009

Table NDA.7.38	Relative standard error for labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.39	95 per cent confidence intervals for non-primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.40	Labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.41	Relative standard error for labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.42	95 per cent confidence intervals for non-primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.43	Labour force participation rate for all carers and non-carers (carers of people with disability) aged 15–64 years of people with disability, by carer sex, by State/Territory, 2009
Table NDA.7.44	Relative standard error for labour force participation rate for all carers (carers of people with disability) aged 15–64 years, by carer sex, by State/Territory, 2009
Table NDA.7.45	95 per cent confidence intervals for all carers and non-carers (carers of people with disability) aged 15–64 years of people with disability, by carer sex, by State/Territory, 2009
Table NDA.7.46	Labour force participation rate for all carers and non-carers aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.47	Relative standard error for labour force participation rate for all carers aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.48	95 per cent confidence intervals for all carers and non-carers aged 15–64 years of people with disability, by carer age group, by State/Territory, 2009
Table NDA.7.49	Labour force participation rate for all carers and non-carers aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.50	Relative standard error for labour force participation rate for all carers aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.51	95 per cent confidence intervals for all carers and non-carers aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2009
Table NDA.7.52	Labour force participation rate for all carers and non-carers aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.53	Relative standard error for labour force participation rate for all carers and non-carers aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.54	95 per cent confidence intervals for all carers and non-carers aged 15–64 years of people with disability, by carer country of birth, by State/Territory, 2009
Table NDA.7.55	Labour force participation rate for all carers and non-carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.56	Relative standard error for labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009

Table NDA.7.57	95 per cent confidence intervals for all carers and non-carers (carers of people with disability) aged 15–64 years, by carer English proficiency, by State/Territory, 2009
Table NDA.7.58	Labour force participation rate for all carers and non-carers aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.59	Relative standard error for labour force participation rate for all carers and non-carers aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.60	95 per cent confidence intervals for all carers and non-carers aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2009
Table NDA.7.61	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer remoteness area, by State/Territory, 2003
Table NDA.7.62	Labour force participation rate for primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2003
Table NDA.7.63	Labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2003
Table NDA.7.64	Labour force participation rate for non-primary carers (carers of people with disability) aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2003
Table NDA.7.65	Labour force participation rate for all carers and non-carers aged 15–64 years of people with disability, by carer remoteness area, by State/Territory, 2003
Table NDA.7.66	Labour force participation rate for all carers and non-carers aged 15–64 years, by carer sex, by carer age group, by State/Territory, 2003

Box 23 **Comment on data quality**

The DQS for this indicator has been prepared by the ABS and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the labour force participation rate for carers. Data are not available by Indigenous status or socioeconomic status (SES).
- The SDAC does not include people living in very remote areas, which affects the comparability of the NT results.
- The SDAC is planned to be conducted every three years (guaranteed to 2018), with the most recent data available for 2009.
- Some SDAC estimates have relative standard errors greater than 25 per cent and should be used with caution.
- Detailed explanatory notes are publicly available to assist in interpretation of results.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues:

- Data for 2003 included in the 2008-09 baseline NDA performance report are not comparable to data included in this report, due to an error in the scope for the age of the care recipient. To enable time series reporting a selected number of tables with revised 2003 data are included in this report.
- The size of the standard errors means that SDAC data may not be adequate for measuring change over time. Small year to year movements may be difficult to detect if the size of the standard errors is large compared to the size of the difference between estimates.
- Disaggregation of this indicator by Indigenous status and SES is a priority. Further work is required to determine the appropriate concept and definition of SES for people with disability and their carers.

Interim performance indicator 8: Proportion of carers of people with disability accessing support services to assist in their caring roles – restricted carer population

Key changes from the second cycle of reporting:	Data from the 2008-09 CSTDA NMDS have been revised. These data are included in this report
Outcome:	Families and carers are well supported
INTERIM Measure:	Proportion of disability support service users aged 0–64 years with an informal carer, where the service user accessed services to assist the carer in their caring role The (interim) measure is defined as: • *numerator* — (interim) number of disability support service users aged 0–64 years with an informal carer, where the service user accessed services to assist the carer in their caring role, in the reporting period • *denominator* — (interim) number of disability support service users aged 0–64 years with an informal carer in the reporting period and is expressed as a *percentage* *These measures exclude specialist psychiatric disability services in Victoria, Queensland and WA*
Data source:	*Numerator and denominator* — (interim) Disability Services National Minimum Data Set (DS/CSTDA NMDS). Data are collected annually
Data provider:	AIHW
Data availability:	2009-10 2008-09 [revised]
Cross tabulations provided:	This indicator is reported for three categories of specialist disability services: 1. In-home accommodation support 2. Community access services 3. Respite services (where possible respite services will be further disaggregated) Each category of services is disaggregated by State/Territory, by: • carer sex (male, female, total) by carer age group (less than 45 years, 45–64 years, 65 years or over, total) • carer relationship to care recipient/service user (wife/husband/partner, mother, father, son/son-in-law/daughter/ daughter-in-law, other, total) • age of care recipient/service user (0–4, 5–14, 15–24, 25–34, 35–44, 45–54, 55–64 years, total 0–64 years) • carer primary status (primary carer, non-primary carer, total)

- carer residency status (co-resident, non-resident, total)

An additional disaggregation will be presented for respite services:
State/Territory by respite service type (own home respite, centre-based respite/ respite homes, host family respite/ peer support respite, flexible respite, other respite, total)

Box 24 **Results**

For this report, new data for this indicator are available for 2009-10.

- Data on in-home accommodation support, community access, and respite services are presented:
  - by carer age and carer sex in tables NDA.8.1–3
  - by age of care recipient/service user in table NDA.8.5–7
  - by carer relationship to care recipient/service user in tables NDA.8.8–10
  - by carer primary status and residency status in tables NDA.8.11–13.
- Data on respite services are also presented by type of respite service in table NDA.8.4.

Revised data are available for 2008-09.

- Data on in-home accommodation support, community access, and respite services are presented:
  - by carer age and carer sex in tables NDA.8.14–16
  - by age of care recipient/service user in table NDA.8.18–20
  - by carer relationship to care recipient/service user in tables NDA.8.21–23
  - by carer primary status and residency status in tables NDA.8.24–26.
- Data on respite services are also presented by type of respite service in table NDA.8.17.

Data for 2007-08 are available in the 2009-10 NDA performance report.

Attachment tables

Table NDA.8.1	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer age and carer sex, and State/Territory, 2009-10
Table NDA.8.2	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by carer age and carer sex, and State/Territory, 2009-10
Table NDA.8.3	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by carer age and carer sex, by State/Territory, 2009-10
Table NDA.8.4	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by type of respite service, by State/Territory, 2009-10

Table NDA.8.5	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by age of care recipient/service user, and State/Territory, 2009-10
Table NDA.8.6	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by age of care recipient/service user, and State/Territory, 2009-10
Table NDA.8.7	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by age of care recipient/service user, by State/Territory, 2009-10
Table NDA.8.8	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer relationship to care recipient/service user, and State/Territory, 2009-10
Table NDA.8.9	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by carer relationship to care recipient/service user, and State/Territory, 2009-10
Table NDA.8.10	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by carer relationship to care recipient/service user, by State/Territory, 2009-10
Table NDA.8.11	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer primary status and residency status, State/Territory, 2009-10
Table NDA.8.12	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by carer primary status and residency status, State/Territory, 2009-10
Table NDA.8.13	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by carer primary status and residency status, State/Territory, 2009-10
Table NDA.8.14	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer age and carer sex, and State/Territory, 2008-09
Table NDA.8.15	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by carer age and carer sex, and State/Territory, 2008-09
Table NDA.8.16	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by carer age and carer sex, by State/Territory, 2008-09
Table NDA.8.17	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by type of respite service, by State/Territory, 2008-09
Table NDA.8.18	Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by age of care recipient/service user, and State/Territory, 2008-09
Table NDA.8.19	Service users aged 0–64 years with an informal carer where the service user accessed community access services, by age of care recipient/service user, and State/Territory, 2008-09
Table NDA.8.20	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by age of care recipient/service user, by State/Territory, 2008-09

Table NDA.8.26	Service users aged 0–64 years with an informal carer where the service user accessed respite services, by carer primary status and residency status, State/Territory, 2008-09

Box 25 **Comment on data quality**

The DQS for this indicator has been prepared by the AIHW and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the proportion of carers of people with disability accessing support services to assist in their caring role. Data are not available by Indigenous status or socioeconomic status (SES).
- Annual data for the numerator and denominator are available from the Disability Services National Minimum Data Set (DS/CSTDA NMDS). The most recent available data are for 2009-10.
- DS/CSTDA NMDS data are derived from service delivery administrative data. It is assumed that service delivery processes involve the assessment of disability support needs following broadly consistent principles and practices across jurisdictions. However, this assumption is untested.
- Not stated/not collected rates vary substantially across data items and jurisdictions. If the characteristics of the people for whom the information is not available are different to those people for whom information is reported, there is potential for bias to be introduced into the data.
- Additional data from the data source are available on-line, and on request.

The Steering Committee also notes the following issues.

- The population for this indicator is a subset of carers (that is, carers of people with disability accessing disability support services, not all carers). Further work is required to identify the full population of carers.
- Disaggregation of this indicator by Indigenous status and SES is a priority. However, the small population of interest means that reporting may be limited, as some data are likely to be suppressed for confidentiality reasons.
- The DS/CSTDA NMDS data collection does not currently include SES. Further work is required to determine the appropriate concept and definition of SES for people with disability and their carers.

Performance indicator 9: Proportion of carers of people with disability who are satisfied with the range of disability service options and quality of support received

Key changes from the second cycle of reporting:	No changes
Outcome:	Families and carers are well supported
Measure:	A measure for this indicator has yet to be developed

Box 26 Comment on data quality

A measure for this indicator is yet to be developed.

The ABS has advised that relevant data items will be tested for suitability of inclusion in the 2012 Survey of Disability, Ageing and Carers.

Performance indicator 10: Proportion of people with disability receiving income support

Key changes from the second cycle of reporting:	The upper age range for the measure has changed from 62 years to 64 years
Outcome:	People with disability achieve economic participation and social inclusion
Measure:	Disability income support The measure is defined as: • *numerator* — number of persons with disability aged 16–64 years who receive the Disability Support Pension (DSP) at end of reporting period • *denominator* — total number of persons with disability aged 16–64 years on 30 June of the previous reporting period as calculated by using age-sex specific disability prevalence rates from the most recent Survey of Disability, Ageing and Carers (SDAC) multiplied by the ERP and is expressed as a *percentage* A suitable denominator is only available for Indigenous people for the year that the NATSISS is conducted (last conducted in 2008). Therefore, the number of Indigenous persons is included in this report, but not the percentage (percentage for 2008 included in the 2008-09 baseline NDA performance report).
Data source:	*Numerator* — Centrelink Disability Support Pension data. Data are available annually *Denominator* — Survey of Disability, Ageing and Carers (SDAC) — data will be collected every three years (guaranteed to 2018) National Aboriginal and Torres Strait Islander Social Survey (NATSISS) — data are collected every six years Census of Population and Housing (Census) — data are collected every five years Estimated Resident Population (ERP) — data are collected annually Data are available for reporting annually (except for denominator for Indigenous people – only available every six years)
Data provider:	ABS
Data availability:	DSP — 25 June 2010
Cross tabulations provided:	All persons with reported disability aged 16–64 years by State/Territory, by: • sex and age group (male, female, persons) • country of birth Indigenous persons with reported disability aged 16–64 years by State/Territory, by: • sex (male, female, persons)

Box 27 **Results**

For this report, new data for this indicator are available for 30 June 2010.

- Data by State and Territory are presented in tables NDA.10.1 to NDA.10.3.

Data for 2008 and 2009 are available in the 2008-09 baseline and 2009-10 NDA performance reports, respectively.

Attachment tables

Table NDA.10.2	People with disability, aged 16–64 years who receive the Disability Support Pension, by country of birth, State/Territory, 30 June 2010
Table NDA.10.3	Number of Indigenous people with disability, aged 16–64 years who receive the Disability Support Pension, 30 June 2010

Box 28 **Comment on data quality**

The DQS for this indicator has been prepared by the ABS and is included in its original form in the section of this report titled 'Data Quality Statements'. Key points from the DQS are summarised below.

- The data provide relevant information, at the State and Territory level, on the proportion of people with disability receiving the disability support pension (DSP). Data are available on the number (not proportion) of Indigenous people with disability receiving DSP. Data are not available by socioeconomic status (SES).
- Annual data are available. The most recent data are for 2010.
- The requirements for receiving DSP are different to the criteria for identifying disability for the purposes of ABS surveys, and therefore the scope of the numerator and denominator are not directly comparable. This may affect the comparability of data over time.

The Steering Committee also notes the following issues.

- The ABS has advised that a suitable denominator is not available for this indicator for Indigenous people for 2010. Unless a method is developed to provide estimates of the Indigenous population with disability between National Aboriginal and Torres Strait Islander Social Surveys (NATSISS), a denominator will only be available every six years.
- Disaggregation of this indicator by SES is a priority. Further work is required to determine the appropriate concept and definition of SES for people with disability and their carers.

NDA Indicator 10	
Table NDA.10.1	People with disability, aged 16–64 years who receive the Disability Support Pension, by sex and age group, State/Territory, 30 June 2010
Table NDA.10.2	People with disability, aged 16–64 years who receive the Disability Support Pension, by country of birth, State/Territory, 30 June 2010
Table NDA.10.3	Number of Indigenous people with disability, aged 16–64 years who receive the Disability Support Pension, 30 June 2010

NDA Benchmark a:

Data for this performance benchmark are provided in the data tables for performance indicator 1.

An increase in the proportion of people with disability in employment

NDA Benchmark b:

There is currently no agreed measure, nor any available data, to inform this indicator.

A decrease in the proportion of potential population with unmet demand for services

NDA Benchmark c:

There is currently no agreed measure, nor any available data, to inform this indicator.

An increase in the proportion of people with disability who used services who have an individualised service plan

NDA Benchmark d:

An increase in the proportion of younger people in, or at risk of entering, residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services

NDA Benchmark e:

Data for this performance benchmark are provided in the data tables for performance indicator 6.

An increase in the proportion of Indigenous people with disability receiving disability services

NDA Benchmark f:

There is currently no agreed measure, nor any available data, to inform this indicator

All services are subject to quality improvement systems consistent with National Standards by 2010

NDA Indicator 1:

Labour force participation rate for people with disability aged 15–64 years

Table NDA.1.1 **Labour force participation rate for people with disability aged 15–64 years, by disability status, by State/Territory, 2009**

(a) Estimates with a relative standard error (RSE) between 25 per cent and 50 per cent should be used with caution.

(b) Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.

(c) Non–English speaking countries includes those persons for whom country of birth was inadequately described. This is estimated to be less than 0.1 per cent nationally.

Disability status (a)										
With disability or long-term health condition	%	3.8	3.5	3.5	3.1	5.3	2.7	4.1	6.2	1.8
Without disability or long-term health condition	%	3.4	2.5	2.6	2.9	3.1	2.1	2.6	4.0	1.5
						95 per cent confidence intervals				
Disability status (a)										
With disability or long-term health condition	%	5.6	5.2	5.4	5.0	8.0	4.6	6.1	9.2	2.7
Without disability or long-term health condition	%	5.2	4.1	4.3	4.6	5.1	3.6	3.9	6.4	2.4

(a) Disability status is collected on the GSS using the short disability question module. This module uses 10 questions to establish disability status where Survey of Disability, Ageing and Carers uses 125 questions. Analysis shows the short module significantly overstates the prevalence of disability.

(a) State/Territory delivered disability support services include any of accommodation support, community support (includes case management/co-ordination), community access and respite.

(b) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes people with not stated sex.

(a) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(b) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(c) Includes people with not stated sex.

– Nil or rounded to zero. **np** Not published.

(a) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(b) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(c) Includes people with not stated sex.

– Nil or rounded to zero. **np** Not published.

(a) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(b) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(c) Includes people whose need for assistance was 'not stated', 'not collected' or 'not applicable (due to age)'.

Total 0–64 years	**%**	**18.5**	**32.0**	**15.4**	**21.4**	**34.2**	**27.3**	**35.8**	**18.7**	**23.1**

(a) State/Territory delivered disability support services include any of accommodation support, community support (includes case management/co-ordination), community access and respite.

(b) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes people with not stated sex.

(a) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(b) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(c) Includes people with not stated sex.

(a) State/Territory delivered disability support services include any of accommodation support, community support (includes case management/co-ordination), community access and respite.

(b) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes people whose need for assistance was 'not stated', 'not collected' or 'not applicable (due to age)'.

NDA Indicator 4:

There is currently no agreed measure, nor any available data, to inform this indicator.

Proportion of people with disability who are satisfied with the range of disability service options and quality of support received

NDA Indicator 5:

Proportion of the potential population expressing unmet demand for disability support services

Subtotal 0–49 years	%	30.8	69.5	23.4	46.5	55.7	14.5	54.2	19.2	33.7
Total 0–64 years	**%**	**24.6**	**62.1**	**18.8**	**36.1**	**46.1**	**12.2**	**42.9**	**16.1**	**27.6**

(a) State/Territory delivered disability support services include any of accommodation support, community support (includes case management/co-ordination), community access and respite.

(b) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Refer to the Data Quality Statement for caveats relating to Indigenous potential population and the identification of Indigenous service users.

(d) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

np Not published.

(a) 'In-home accommodation support' includes attendant care/personal care and in-home accommodation support services.

Table NDA.8.1 **Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer age and carer sex, and State/Territory, 2009-10 (a), (b), (c)**

	Unit	*NSW*	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*

(b) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes carers with not stated age.

(e) Includes carers with not stated sex.

np Not published.

(a) 'In-home accommodation support' includes attendant care/personal care and in-home accommodation support services.

Table NDA.8.8 **Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer relationship to care recipient/service user, and State/Territory, 2009-10 (a), (b), (c)**

	Unit	*NSW*	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*

(b) Some jurisdictions provide specialist psychiatric services under the NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes carers with not stated relationship.

(a) 'In-home accommodation support' includes attendant care/personal care and in-home accommodation support services.

(b) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes carers with not stated age.

(e) Includes carers with not stated sex.

np Not published.

Table NDA.8.18 Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by age of care recipient/service user, and State/Territory, 2008-09 (a), (b), (c)

	Unit	*NSW*	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*

(a) 'In-home accommodation support' includes attendant care/personal care and in-home accommodation support services.

(b) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

Table NDA.8.24 Service users aged 0–64 years with an informal carer where the service user accessed in-home accommodation support services, by carer primary status and residency status, State/Territory, 2008-09 (a), (b), (c)

	Unit	*NSW*	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aust*
Total (e)	**%**	**3.3**	**3.3**	**13.1**	**9.6**	**10.1**	**6.5**	**4.3**	**5.2**	**6.4**

(a) 'In-home accommodation support' includes attendant care/personal care and in-home accommodation support services.

(b) Some jurisdictions provide specialist psychiatric services under the CSTDA/NDA, whilst others provide these services under health. For comparability, the indicator excludes those who only receive specialist psychiatric disability services. This does not exclude those people with a psychiatric condition who receive other specialist disability services.

(c) Total service users for Australia may not be the sum of components because individuals may have accessed services in more than one State or Territory during the 12 month period.

(d) Includes carers with not stated primary status.

(e) Includes carers with not stated residency status.

Data Quality Statements

This attachment includes copies of all DQSs as provided by the data providers. The Steering Committee has not made any amendments to the content of these DQSs.

Table 11 lists each performance benchmark in the NDA and the page reference for the associated DQS.

Table 11 Data quality statements for performance benchmarks in the National Disability Agreement

Performance benchmark		*Page no. in this report*
a.	An increase in the proportion of people with disability in employment	692
b.	A decrease in the proportion of potential population with unmet demand for services	..
c.	An increase in the proportion of people with disability accessing services who have an individualised service plan	..
d.	An increase in the proportion of younger people in, or at risk of entering, residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services	689
e.	An increase in the proportion of Indigenous people with disability receiving disability services	703, 717
f.	All services are subject to quality improvement systems consistent with National Standards by 2010	..

.. Not applicable as no new data were available for this report.

Table 12 lists each performance indicator in the NDA and the page reference for the associated DQS.

Table 12 Data quality statements for performance indicators in the National Disability Agreement

Performance indicator		*Page no. in this report*
1.	Labour force participation rate for people with disability aged 15-64 years	692
2.	Proportion of people with disability who participate in social and community activities	694
3.	Proportion of the potential population accessing disability services	696, 717
4.	Proportion of people with disability who are satisfied with the range of disability service options and quality of support received	..
5.	Proportion of potential population expressing unmet demand for disability support services	701
6.	Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services	703, 717
7.	Labour force participation rate for carers aged 15 to 64 of people with disability	708

(Continued next page)

Table 12 **(continued)**

Performance indicator	*Page no. in this report*
8. Proportion of carers of people with disability accessing support services to assist in their caring role *Interim indicator: Proportion of carers of people with disability accessing support services to assist in their caring roles – restricted carer population	710, 717
9. Proportion of carers of people with disability who are satisfied with the range of disability service options and quality of support received	..
10. Proportion of people with disability receiving income support	713

.. Not applicable as no new data were available for this report.

Data Quality Statement — performance benchmark d: An increase in the proportion of younger people in, or at risk of entering, residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services

Target/Outcome	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Performance benchmark	Assistance to younger people with disabilities in residential aged care
Key data quality points	**1.** The data used to measure the number of younger people in residential aged care are from an administrative data collection designed for payment of subsidies to service providers and have accurate data on the number and location of funded aged care places. **2.** Data measuring the potential population is not explicitly available for the required time point and so has been estimated from several difference sources under several key assumptions. The assumption of constant age-sex specific rates of severe/profound core activity limitation over time is contradicted by comparison of age-sex specific rates of severe/profound core activity limitation from SDAC 2003 and SDAC 2009, which indicate an overall slight decline in rates between these two time periods. A further assumption that national level age-sex specific rates of severe/profound core activity limitation from the 2009 SDAC apply consistently across states/territories is untested. **3.** There are issues with the consistency of the numerator and denominator for this performance benchmark, as the numerator and denominator are drawn from differently defined populations and different data sources.
Measure (computation)	**1. Numerator:** Number of younger people with disability in residential aged care assisted with more appropriate forms of accommodation, diversionary strategies and/or enhanced services. Measure (d.1): (interim) Number of persons aged 0–64 years admitted to permanent residential aged care. Measure (d.2): (interim) Number of persons aged 0–64 years receiving permanent residential aged care services. Measure (d.3): (interim) Number of persons aged 0–64 years who separated from permanent residential aged care to return to home/family. **2. Denominator:** For measure (d.1): Estimated potential population for specialist disability services on 30 June at start of reporting period. The potential population is defined as people aged under 65 years with profound or severe core activity limitation. Potential population for a reporting period is calculated by applying age-sex-specific rates of severe/profound core activity limitation (from the Survey of Disability, Ageing and Carers 2009) to the 30 June Estimated Residential Population (ERP) at the beginning of the reporting period, by State/Territory, by age group, by sex. No Indigenous weight or scaling factor is used. National level age-sex rates from SDAC 2009, rather than State/Territory-age-sex rates are used due to the high sampling errors associated with some of the State/Territory-age-sex rate estimates. **3. Rate:** For measure (d.1): R/N x 10 000 where R = number of younger people with disability aged 0–64 years admitted to permanent residential aged care in the reporting period and N = estimated potential population on 30 June at the start of the reporting period.

Data source/s	**Numerator:** Australian Government Department of Health and Ageing (DoHA) aged care data warehouse. The aged care data warehouse is a consolidated data warehouse of service provider and service recipient data held by the Ageing and Aged Care Division and the Office of Aged Care Quality and Compliance of the Department of Heath and Ageing. **Denominator:** AIHW calculation of potential population from SDAC and ERP (refer to ABS data quality statements).
Institutional environment	Approved providers of residential and community care submit data to Medicare Australia to claim subsidies from the Australian Government. This data is provided to the Department of Health and Ageing to administer services under the Aged Care Act 1997 and the Aged Care Principles. The data for the numerator of this benchmark were prepared by the DoHA. The AIHW did not have all of the relevant datasets required to independently verify the data tables for this indicator. The AIHW is an Australian Government statutory authority accountable to Parliament and operates under the provisions of the Australian Institute of Health and Welfare Act 1987. The AIHW provides expert analysis of data on health, housing and community services. More information about the AIHW is available on the AIHW website. For information on the institutional environment of the ABS, including the legislative obligations of the ABS, please see ABS Institutional Environment.
Relevance	Data from several different sources, each referencing different time periods, are used to produce performance benchmark (d). Data used are from the DoHA aged care data warehouse, SDAC 2009, SDAC 2003, ERP June 2010, ERP June 2009, ERP June 2008, and ERP June 2007. This may reduce the overall accuracy of the estimates. In particular, • Data from DoHA aged care data warehouse, ERP June 2010, ERP June 2009, ERP June 2008, ERP June 2007, and Census 2006 cover all geographical areas of Australia, whereas the SDAC 2009 does not cover very remote areas nor Indigenous communities. • The use of SDAC 2009 age-sex specific rates of severe/profound core activity limitation to calculate 2010 estimates of potential population assumes these rates to be consistent over time. A comparison of age-sex specific rates of severe/profound core activity limitation from SDAC 2003 and SDAC 2009 indicates that most age-sex specific rates have declined between these two time periods. Overall, the rate of severe/profound core activity limitation for people aged 0-64 years has declined from 3.9 per cent in 2003 to 3.6 per cent in 2009. • The use of national level SDAC 2009 age-sex specific rates of severe/profound core activity limitation assumes these rates to be consistent across states/territories. This assumption is untested. The DoHA aged care data warehouse provides complete coverage of aged care services funded by the Australian Government under residential age care, Community Aged Care Packages (CACP), Extended Aged Care at Home (EACH), and Extended Age Care at Home Dementia (EACHD) programs.
Timeliness	DoHA aged care data warehouse: Claims are submitted by approved providers on a monthly basis for services delivered under residential age care, CACP, EACH and EACHD. Data for the previous financial year are available in October each year. ABS SDAC 2003 and 2009; Estimated Resident Population at 30 June 2010, 30 June 2009, 30 June 2008 and 30 June 2007.

Accuracy

The DoHA aged care data used to calculate the numerator of this benchmark are from an administrative data collection designed for payment of subsidies to service providers and have accurate data on the number and location of funded aged care places.

Being a sample survey, estimates from the SDAC 2009 are subject to sampling variability. A measure of the sampling variability, the relative standard error (RSE) percent, is estimated below for the age-sex specific rates of severe/profound core activity limitation.

Estimated RSE for age-sex rates of severe/profound core activity limitation at national level (percent)

Age group (years)	Male	Female
0–4	13.2	18.3
5–14	6.5	10.2
15–24	11.6	13.7
25–34	11.9	9.5
35–44	9.3	9.3
45–54	8.1	8.4
55–59	9.7	7.1
60–64	7.9	7.8

Source: ABS (2010) *Disability, Ageing and Carers, Australia: Summary of Findings, 2009*, Cat. no. 4430.0, Canberra.

See also ABS data quality statements regarding SDAC.

Coherence

The DoHA aged care data used to construct the numerator of this benchmark are consistent and comparable over time.

For measure (d.1), there are issues with the consistency of the numerator and denominator, as the numerator and denominator are drawn from differently defined populations and different data sources. These issues reduce the consistency of the performance indicators and lead to quality issues such as cells greater than 100 per cent.

While the numerator is taken from the DoHA aged care data warehouse, the denominator is an estimate derived from SDAC and ERP data. In the denominator, 'estimated potential population for specialist disability services' is defined as the estimated population with severe or profound core activity limitation. However, this does not match well with the numerator, which consists of people who used specialist residential aged care services. People who used these services do not necessarily have a severe or profound core activity limitation (mobility, communication, or self-care). They may instead have a mild/moderate core activity limitation or limitations in other activities.

Accessibility

Information on definitions used in the DoHA aged care data warehouse is available in the Aged Care Act 1997 and Aged Care Principles, and in the Residential Aged Care Manual 2009.

The ABS website provides information and data on the ERP and SDAC profound/ severe core-activity limitation. Detailed data extractions are available through the National Information Referral Service (cost-recovery applies).

Interpretability

Aggregated data can be obtained on request from the Department of Health and Ageing.

Data Quality Statement – Indicator 1: Labour force participation rate for people with disability aged 15–64 years

Target/Outcome	People with disability achieve economic participation and social inclusion.
Performance indicator	Labour force participation rate for people with disability aged 15–64 years.
Measure (computation)	**Numerator:** Number of people with disability aged 15–64 years who are in the labour force (employed or unemployed). **Denominator:** Total number of persons with disability aged 15–64 years.
Data source/s	The numerator and denominator for this indicator are drawn from the ABS 2009 Survey of Disability, Ageing and Carers (SDAC).
Institutional environment	SDAC are collected, processed, and published by the Australian Bureau of Statistics (ABS). The ABS operates within the framework of the Census and Statistics Act 1905 and the Australian Bureau of Statistics Act 1975. These ensure the independence and impartiality of the ABS, and the confidentiality of respondents. For more information on the institutional environment of the ABS, including legislative obligations, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see ABS Institutional Environment.
Relevance	The SDAC contains the most comprehensive and accurate measure of disability produced by the ABS, using 125 questions to collect information on any conditions people may have, whether these conditions cause restrictions, and the nature and severity of any restrictions. Labour force participation data is collected in the SDAC using the ABS standard 'minimum set' of questions to produce estimates of the current economically active population. Aggregates produced from these questions are designed to be consistent with international concepts of employment and unemployment.
Timeliness	The SDAC is conducted every three years over an approx. six month period. Results from the 2009 survey were released in April 2011.
Accuracy	The 2009 SDAC response rate for private dwellings was 89.9 per cent, and for establishments was 90.9 per cent. SDAC data are weighted to account for non-response. The SDAC is conducted in all States and Territories including people in both private and non-private dwellings (including cared-accommodation establishments) but excluding those in gaols and correctional institutions and very remote areas. The exclusion of persons usually resident in very remote areas has a small impact on estimates, except for the Northern Territory, where such persons make up a relatively large proportion of the population. As a consequence of this exclusion, comparisons between Indigenous and non-Indigenous people in remote areas would not be available even if the same disability module was used in each survey. For more information on SDAC scope and coverage, see the Disability, Ageing and Carers User Guide on the ABS website. Being drawn from sample surveys, data for this indicator are subject to sampling error. Sampling error occurs because a proportion of the population is used to produce estimates that represent the whole

population. Sampling error can be reliably estimated as it is calculated based on the statistical methods used to design surveys.

This indicator has acceptable levels of sampling error (relative standard errors less than 25 per cent) for the larger States for all tables, however data for Tasmania, ACT and NT have some RSEs between 25 per cent and 50 per cent, and should be used with caution. Estimates with RSEs greater than 50 per cent are found in tables 1.14, 1.20 and 1.41. Data with these RSEs are considered too unreliable for general use.

Coherence The SDAC collect a range of demographic, financial and other information that can be analysed in conjunction with the disability status and labour force participation rate of respondents.

The labour force information collected in SDAC is designed to be comparable with data collected in the monthly Labour Force Survey and other surveys.

Accessibility Information to aid interpretation of the data is available in the Disability, Ageing and Carers User Guide (Cat. no. 4431.0.55.001) on the ABS website.

Interpretability See Disability, Ageing and Carers, Australia: Summary of Findings, 2009 (Cat. no.4430.0) for an overview of results from the SDAC. Other information is available on request.

Data Quality Statement – performance indicator 2: Proportion of people with disability who participate in social and community activities

Target/Outcome	People with disability achieve economic participation and social inclusion
Performance indicator	Proportion of people with disability who participate in social and community activities
Measure (computation)	**Numerator:** Number of people with disability who had face-to-face contact with family or friends who don't live with them in the previous week (measures 2b and 2c) (15–64 years), or travelled to a social activity in the last two weeks (5–64 years), or reported the main reason they couldn't leave home as often as they would like was their own disability or medical condition (5–64 years). **Denominator:** Total number of persons with disability aged 15–64 years (measure 2a) and total number of persons with disability aged 5–64 years (measures 2b and 2c).
Data source/s	The numerator and denominator for this indicator are drawn from the ABS 2009 Survey of Disability, Ageing and Carers (SDAC).
Institutional environment	SDAC data are collected, processed, and published by the Australian Bureau of Statistics (ABS). The ABS operates within the framework of the Census and Statistics Act 1905 and the Australian Bureau of Statistics Act 1975. These ensure the independence and impartiality of the ABS, and the confidentiality of respondents. For more information on the institutional environment of the ABS, including legislative obligations, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see ABS Institutional Environment.
Relevance	The SDAC contains the most comprehensive and accurate measure of disability produced by the ABS, using 125 questions to collect information on any conditions people may have, whether these conditions cause restrictions, and the nature and severity of any restrictions. A range of social and community participation data are collected in the SDAC from persons aged 5 years and over with disability. These include visits from family and friends and travelling to social events in the previous fortnight. Persons who reported one or more instances of social or community participation in the specified timeframes are included in this indicator.
Timeliness	The SDAC is conducted every three years over an approx. six month period. Results from the 2009 survey were released in April 2011.
Accuracy	The 2009 SDAC response rate for private dwellings was 89.9 per cent, and for establishments was 90.9 per cent. SDAC data are weighted to account for non-response. The SDAC is conducted in all States and Territories including people in both private and non-private dwellings (including cared-accommodation establishments) but excluding those in gaols and correctional institutions and very remote areas. The exclusion of persons usually resident in very remote areas has a small impact on estimates, except for the Northern Territory, where such persons make up a relatively large proportion of the

population. As a consequence of this exclusion, comparisons between Indigenous and non-Indigenous people in remote areas would not be available even if the same disability module was used in each survey. For more information on SDAC scope and coverage, see the Disability, Ageing and Carers User Guide on the ABS website.

Being drawn from sample surveys, data for this indicator are subject to sampling error. Sampling error occurs because a proportion of the population is used to produce estimates that represent the whole population. Sampling error can be reliably estimated as it is calculated based on the statistical methods used to design surveys.

This indicator has acceptable levels of sampling error (relative standard errors less than 25 per cent) for most tables. RSEs increase for tables with a high level of disaggregation, so a number of tables (tables 2.8, 2.14, 2.17, 2.20, 2.35, 2.38, 2.41, 2.44, 2.47, 2.50, 2.53, 2.56, 2.59 and 2.62) show some RSEs between 25 per cent and 50 per cent. Data with these RSEs should be used with caution. Some tables (tables 2.14, 2.35, 2.50, 2.56, 2.59 and 2.62) also show some RSEs exceeding 50 per cent. Data with these RSEs are considered too unreliable for general use.

Coherence The SDAC collect a range of demographic, financial and other information that can be analysed in conjunction with the social participation of people with disability.

Accessibility Information to aid interpretation of the data is available in the Disability, Ageing and Carers User Guide (Cat. no. 4431.0.55.001) on the ABS website.

Interpretability See Disability, Ageing and Carers, Australia: Summary of Findings, 2009 (Cat. no.4430.0) for an overview of results from the SDAC. Other information is available on request.

Data Quality Statement – performance indicator 3: Proportion of the potential population accessing disability services

Target/Outcome	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Performance indicator	Proportion of the potential population accessing disability services.
Key data quality points	**1.** DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is untested. **2.** Data measuring the potential population is not explicitly available for the required time point and so has been estimated from several difference sources under several key assumptions. The assumption of constant age-sex specific rates of severe/profound core activity limitation over time is contradicted by comparison of age-sex specific rates of severe/profound core activity limitation from SDAC 2003 and SDAC 2009, which indicate an overall slight decline in rates between these two time periods. A further assumption that national level age-sex specific rates of severe/profound core activity limitation from the 2009 SDAC apply consistently across states/territories is untested. **3.** There are issues with the consistency of the numerator and denominator for this performance indicator, as the numerator and denominator are drawn from differently defined populations and different data sources.
Measure (computation)	**1. Numerator:** Number of users of specialist disability services aged 0–64 years in the reporting period. **2. Denominator:** Estimated potential population for specialist disability services on 30 June at start of reporting period. The potential population is defined as people aged 0–64 years with profound or severe core activity limitation. Potential population for a reporting period is calculated by applying age-sex-specific rates of severe/profound core activity limitation (from the Survey of Disability, Ageing and Carers (SDAC) 2009) to the 30 June Estimated Residential Population (ERP) at the beginning of the reporting period by State/Territory by age group by sex. No Indigenous weight or scaling factor is used. National level age-sex rates from SDAC 2009, rather than State/Territory-age-sex rates are used due to the high sampling errors associated with some of the State/Territory-age-sex rate estimates. Estimates of potential population by country of birth and Remoteness Area are calculated by applying the Census 06 distributions of country of birth and Remoteness Area for people who need assistance with core activities by State/Territory by age group by sex to the State/Territory by age group by sex potential population estimates. **3. Percentage:** R/N x 100 where R = number of service users aged 0–64 years in the DS/CSTDA NMDS during the reporting period and N = estimated potential population on 30 June at the start of the reporting period. Performance indicators for disability services provided by the Australian Government (disability employment services only) are restricted to the age range 15–64 years.

Data source/s

Numerator: DS/CSTDA NMDS. For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

Denominator: AIHW calculation of potential population from SDAC, Census and ERP (see ABS data quality statements).

Institutional environment

The AIHW is an Australian Government statutory authority accountable to Parliament and operates under the provisions of the *Australian Institute of Health and Welfare Act 1987*. The AIHW provides expert analysis of data on health, housing and community services. More information about the AIHW is available on the AIHW website.

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

For information on the institutional environment of the ABS, including the legislative obligations of the ABS, please see ABS Institutional Environment.

Relevance

Data from several different sources, each referencing different time periods, are used to produce performance indicator (c). Data used are from the CSTDA NMDS 2008-09 and DS NMDS 2009-10, SDAC 2009, ERP June 2008 and June 2009, and Census 2006. This may reduce the overall accuracy of the estimates. In particular,

- Data from the CSTDA NMDS 2008-09 and DS NMDS 2009-10, ERP June 2008 and June 2009 and Census 2006 cover all geographical areas of Australia, whereas the SDAC 2009 does not cover very remote areas nor Indigenous communities.
- The use of SDAC 2009 age-sex specific rates of severe/profound core activity limitation to calculate 2008 and 2009 estimates of potential population assumes these rates to be consistent over time. A comparison of age-sex specific rates of severe/profound core activity limitation from SDAC 2003 and SDAC 2009 indicates that most age-sex specific rates have declined between these two time periods. Overall, the rate of severe/profound core activity limitation for people aged 0-64 years has declined from 3.9 per cent in 2003 to 3.6 per cent in 2009.
- The use of national level SDAC 2009 age-sex specific rates of severe/profound core activity limitation assumes these rates to be consistent across states/territories. This assumption is untested.
- Information from Census 2006 about people with need for assistance with core activities is based on the self enumerated completion of four questions, whereas people are defined as having a severe/profound core activity limitation in SDAC 2009 on the basis of a comprehensive interviewer administered module of questions, and thus the two populations are different although they are conceptually related.
- The use of Census 2006 data about country of birth and Remoteness Area distributions for people with need for assistance with core activities assumes these distributions to be consistent over time. This assumption is untested.

DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is untested.

The scope of services provided under the CSTDA/NDA varied across jurisdictions. In Victoria, Queensland and Western Australia (in some cases), specialist psychiatric disability services were provided under the

CSTDA/NDA. In all other jurisdictions specific mental health services were funded and provided under health, rather than disability, portfolios. To facilitate comparability of data, specialist psychiatric disability services in Victoria, Queensland and Western Australia are excluded from the NDA performance indicators. That is, the data excludes those who only receive specialist psychiatric disability services, but does not exclude those people with a psychiatric condition who receive other specialist disability services. In addition, the predominant service models vary across jurisdictions, and this may affect comparability of data. For example, differences across the states and territories in the predominant model of accommodation support lead to differences in the number of people accessing those services. Caution is recommended in the use or interpretation of performance at the service type level. There is a risk when service type level data is interpreted in isolation as various service types are complementary and the emphasis on different services reflects jurisdictional policy directions. For more information, see *Disability support services 2008-09* and *Disability support services 2009-10* (forthcoming).

Timeliness

CSTDA NMDS 2008-09 and DS NMDS 2009-10

ABS SDAC 2009; Census 2006; Estimated Resident Population at 30 June 2008 and 30 June 2009

Accuracy

The Northern Territory's 2009-10 NMDS data submission to Australian Institute of Health and Welfare (AIHW) has highlighted anomalies in Northern Territory (NT) Disability Services data which would suggest that there are issues with the quality of the data collected through the NMDS and provided by the NT to meet National Disability Agreement reporting requirements. The Aged and Disability Program (A&DP) have received advice from AIHW which suggest that the anomalies in the data are most likely to be a result of underreporting.

Potential sources of error in the DS/CSTDA NMDS are data items for which the response is not stated or not collected. If the characteristics of the people for whom the information is not available are different to those people for whom information is reported, there is potential for bias to be introduced into the data. Not stated/not collected rates vary substantially across jurisdictions and data items. The data item need for assistance has a particularly high not stated/not collected rate. For the 2009-10 data set the rate was 13.1 per cent overall, ranging from 0.0 per cent for Australian Government agencies to 42.2 per cent for Victoria. For the 2008-09 data set the rate was 14.1 per cent overall, ranging from 0.2 per cent for Australian Government agencies to 41.8 per cent for Victorian agencies.

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

Being a sample survey, estimates from the SDAC 2009 are subject to sampling variability. A measure of the sampling variability, the relative standard error (RSE) percent, is estimated below for the age-sex specific rates of severe/profound core activity limitation.

Estimated RSE for age-sex rates of severe/profound core activity limitation at national level (percent)

Age group (years)	Male	Female
0-4	13.2	18.3
5-14	6.5	10.2
15-24	11.6	13.7
25-34	11.9	9.5

35-44	9.3	9.3
45-54	8.1	8.4
55-59	9.7	7.1
60-64	7.9	7.8

Source: ABS (2010) *Disability, Ageing and Carers, Australia: Summary of Findings, 2009*, Cat. no. 4430.0, Canberra.

Potential sources of error in Census data include failure to return a Census form or failure to answer applicable questions. Data distributions calculated from Census 2006 data excluded people for whom data item information was not available. Should the characteristics of interest of the people excluded differ from those people included, there is potential for bias to be introduced into the data distributions. Quality statements about Census 2006 data items can be found on the ABS website.

See also ABS data quality statements.

Coherence

For general issues relating to the DS/CSTDA NMDS refer to the DS/CSTDA NMDS Data Quality Statement.

There are issues with the consistency of the numerator and denominator for this performance indicator, as the numerator and denominator are drawn from differently defined populations and different data sources. These issues reduce the consistency of the performance indicators and lead to quality issues such as cells greater than 100 per cent. For example, the proportion of the 0–4 year old ACT Indigenous potential population accessing disability services is reported to be 326.8 per cent. A combination of data quality issues, as discussed in this and previous sections, has led to these impossible figures.

While the numerator is taken from the DS/CSTDA NMDS, the denominator is an estimate derived from SDAC, ERP and Census data. In the denominator, 'estimated potential population for specialist disability services' is defined as the estimated population with severe or profound core activity limitation. However, this does not match well with the numerator, which consists of people who used specialist disability services. People who used these services do not necessarily have a severe or profound core activity limitation (mobility, communication, or self-care). They may instead have a mild/moderate core activity limitation or limitations in other activities—for example, with working or education. This mismatch is more evident in certain types of services, such as open employment services, which are not necessarily tailored towards people with a severe or profound core activity limitation.

For the calculation of potential population for the denominator, the method used to calculate the country of birth and remoteness disaggregations is the same as that adopted by the Disability Services Working Group for calculation of special needs group indicators in the Report on Government Services 2011.

Accessibility

The AIHW provides a variety of products that draw upon the DS/CSTDA NMDS. Published products available on the AIHW website are:

- *Disability support services* (annual report)

- Interactive disability data cubes
- Ad hoc data are available on request (charges apply to recover costs)
- METeOR – online metadata repository
- National Community Services Data Dictionary.

The ABS website provides information and data on the ERP, Census Need

	for Assistance and SDAC profound/ severe core-activity limitation. Detailed data extractions are available through the National Information Referral Service (cost-recovery applies).
Interpretability	Information to assist in interpretation of the performance indicator is contained in the NDA performance indicator glossary, which accompanies these Data Quality Statements. Supporting information on the quality and use of the DS/CSTDA NMDS are published annually in 'Disability support services' available in hard copy or on the AIHW website (www.aihw.gov.au).

Data Quality Statement – Interim Indicator 5: Proportion of potential population expressing unmet demand for disability support services

Target/Outcome	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible.
Indicator	(**interim**) Proportion of potential population who need more assistance.
Measure (computation)	**Numerator: (interim)** Number of people with a profound or severe core activity limitation aged 0–64 years who have contacted an organised service in the previous 12 months for assistance with an activity and who need more assistance with that activity and the number of people with a profound or severe core activity limitation who need more formal assistance with an activity than they are currently receiving. **Denominator:** Total number of persons with a profound or severe core activity limitation aged 0–64 years. The potential population is defined as people aged under 65 years with profound or severe core activity limitation.
Data source/s	The numerator and denominator for this indicator are drawn from the ABS 2009 Survey of Disability, Ageing and Carers (SDAC).
Institutional environment	SDAC is collected, processed, and published by the Australian Bureau of Statistics (ABS). The ABS operates within the framework of the Census and Statistics Act 1905 and the Australian Bureau of Statistics Act 1975. These ensure the independence and impartiality of the ABS, and the confidentiality of respondents. For more information on the institutional environment of the ABS, including legislative obligations, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see ABS Institutional Environment.
Relevance	The SDAC contains the most comprehensive and accurate measure of disability produced by the ABS, using 125 questions to collect information on any conditions people may have, whether these conditions cause restrictions, and the nature and severity of any restrictions. A range of need and receipt of assistance data are collected in the SDAC from persons with a disability. These include asking about whether people need assistance, receive assistance and have contacted organised services in the previous 12 months for assistance with activities of daily living (self-care, mobility, communication, property maintenance, meal preparation, household chores, reading and writing, cognitive and emotional tasks and transport. Persons who reported needing more formal assistance with at least one of the nine considered daily activities are included in this indicator.
Timeliness	The SDAC is conducted every three years over an approx. six month period. Results from the 2009 survey were released in April 2011.
Accuracy	The 2009 SDAC response rate for private dwellings was 89.9 per cent, and for establishments was 90.9 per cent. SDAC data are weighted to account for non-response. The SDAC is conducted in all States and Territories including people in both private and non-private dwellings (including cared-accommodation establishments) but excluding those in gaols and correctional institutions and very remote areas. The exclusion of persons usually resident in very remote areas has a small impact on estimates, except for the Northern Territory, where such persons make up a relatively large proportion of the

population. As a consequence of this exclusion, comparisons between Indigenous and non-Indigenous people in remote areas would not be available even if the same disability module was used in each survey. For more information on SDAC scope and coverage, see the Disability, Ageing and Carers User Guide on the ABS website.

Being drawn from sample surveys, data for this indicator are subject to sampling error. Sampling error occurs because a proportion of the population is used to produce estimates that represent the whole population. Sampling error can be reliably estimated as it is calculated based on the statistical methods used to design surveys.

This indicator has acceptable levels of sampling error (relative standard errors less than 25 per cent) for the larger States for most tables, however some data have some RSEs between 25 per cent and 50 per cent and should be used with caution (all RSE Tables). Estimates with RSEs greater than 50 per cent are found in all RSE tables (except table 5.8). Data with these RSEs are considered too unreliable for general use.

Coherence The SDAC collect a range of demographic, financial and other information that can be analysed in conjunction with the disability status and labour force participation rate of respondents.

Interpretability Information to aid interpretation of the data is available in the Disability, Ageing and Carers User Guide (Cat. no. 4431.0.55.001), on the ABS website.

Accessibility See Disability, Ageing and Carers, Australia: Summary of Findings, 2009 (Cat. no.4430.0) for an overview of results from the SDAC. Other information from the survey is available on request.

Data Quality Statement – performance indicator 6: Number of Indigenous people with disability receiving disability services as a proportion of the Indigenous potential population requiring services

Target/Outcome	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible
Performance indicator	Use of specialist disability services by Aboriginal and Torres Strait Islander people
Key data quality points	**1.** The quality of data about Indigeneity varies substantially between jurisdictions and data sources. Caution should be exercised when interpreting these data. It is recommended that these data be viewed in close conjunction with information about the data quality. **2.** DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is untested. **3.** Data measuring the Indigenous potential population is not explicitly available for the required time point and so has been estimated from several different data sources under several key assumptions. Previous research has confirmed that Indigenous Australians experience severe or profound core activity limitation at more than twice the rate as non-Indigenous Australians but relative rates by age group and sex, across states and territories and remoteness areas, have not been fully investigated. In particular, caution should be exercised in comparing indicators for jurisdictions with very different remoteness area distributions of Indigenous population. **4.** The use of 2006 Census data to adjust underlying age-sex specific rates of severe or profound core activity limitation to account for the higher level of disability among Indigenous Australians involves mixing self-report data from a relatively simple instrument for measuring need for assistance with sample survey data collected by trained interviewers using a comprehensive survey instrument. The cultural appropriateness for Indigenous people of data collection instruments designed for the total population is not known; nor is it known how this, combined with different data collection methods, impacts on the accuracy of the estimated Indigenous potential population used in this indicator. **5.** There are issues with the consistency of the numerator and denominator for this performance indicator, as the numerator and denominator are drawn from differently defined populations and different data sources.
Measure (computation)	**1. Numerator:** Number of Aboriginal and Torres Strait Islander people aged 0–64 years who used specialist disability services in the reporting period**.** **2. Denominator:** Estimated Indigenous potential population for disability services aged 0–64 years on 30 June at start of reporting period. The potential population is defined as people aged 0–64 years with profound or severe core activity limitation. The method used to calculate the Indigenous potential population is the same as that adopted by the Disability Services Working Group for calculation of special needs group indicators for the Report on Government Services 2011. The Indigenous potential population is calculated by applying adjusted age-sex specific rates of severe/profound core activity

limitation (from the Survey of Disability, Ageing and Carers (SDAC) 2009) to the 30 June Indigenous Projected Population at the beginning of the reporting period by State/Territory by age group by sex. Research indicates that the age-sex specific rates of severe/profound core activity limitation are significantly different for Indigenous people as compared to non-Indigenous people, hence an adjustment to account for these differences must be applied to national level all person age-sex specific rates of severe/profound core activity limitation. National level age-sex rates from SDAC 2009, rather than State/Territory-age-sex rates are used due to the high sampling errors associated with some of the State/Territory-age-sex rate estimates. The national level age-sex rates from SDAC 2009 are adjusted by the rate ratio of the Indigenous State/Territory-age-sex rate of need for assistance with core activities to the all persons State/Territory-age-sex rate of need for assistance with core activities, as calculated from Census 2006 data. Estimates of Indigenous potential population by Remoteness Area are calculated by applying the Census 06 distributions of Remoteness Area for people who need assistance with core activities by State/Territory by age group by sex to the State/Territory by age group by sex Indigenous potential population estimates.

3. Percentage: R/N x 100 where R = number of Aboriginal and Torres Strait Islander people aged 0–64 years who used specialist disability services in the reporting period and N = estimated Indigenous potential population aged 0–64 years on 30 June at start of reporting period.

Performance Indicators reporting on disability services funded by the Australian Government (employment services only) are restricted to the age range 15–64 years and not stated age.

Data source/s

Numerator: DS/CSTDA NMDS. For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

Denominator: AIHW calculation of Indigenous potential population from SDAC, Census and Indigenous Projected Population.

Institutional environment

The AIHW is an Australian Government statutory authority accountable to Parliament and operates under the provisions of the *Australian Institute of Health and Welfare Act 1987*. The AIHW provides expert analysis of data on health, housing and community services. More information about the AIHW is available on the AIHW website.

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

For information on the institutional environment of the ABS, including the legislative obligations of the ABS, please see ABS Institutional Environment.

Relevance

Data from several different sources, each referencing different time periods, are used to produce performance indicator (f). Data used are from the CSTDA NMDS 2008-09 and DS NMDS 2009–2010, SDAC 2009, Indigenous Projected Population June 2008 and June 2009, and Census 2006. This may reduce the overall quality of the estimates. Some particular issues are listed in the Relevance section of the Data Quality Statement for performance indicator (c). Additionally,

- The Indigeneity data item from the SDAC 2009 is not readily available, so a rate ratio adjustment, calculated from information from the Census, is made to the national all person age-sex specific severe/profound core activity limitation rates, as detailed in the Measure section. The use of these adjustments assumes consistency between the rate ratio as calculated from Census information, and the corresponding information if it were collected from the SDAC 2009. Two particular points of note with regards to this

assumption are:

Information from Census 2006 about people with need for assistance with core activities is based on the self enumeration (interview in Indigenous communities) of four questions, whereas people are defined as having a severe/profound core activity limitation in SDAC 2009 on the basis of a comprehensive interviewer administered module of questions, and thus the two populations are different, although they are conceptually related.

ABS research indicates that the Indigenous identification rate differs between the Census and interviewer administered surveys.

- The cultural appropriateness for Indigenous people, of data collection instruments designed for the total population is not known; nor is it known how this, combined with different data collection methods, impacts on the accuracy of the estimated Indigenous potential population used in this indicator.

DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is untested.

The scope of services provided under the CSTDA/NDA varied across jurisdictions. In Victoria, Queensland and Western Australia (in some cases), specialist psychiatric disability services were provided under the CSTDA/NDA. In all other jurisdictions specific mental health services were funded and provided under health, rather than disability, portfolios. To facilitate comparability of data, specialist psychiatric disability services in Victoria, Queensland and Western Australia are excluded from the NDA performance indicators. That is, the data excludes those who only receive specialist psychiatric disability services, but does not exclude those people with a psychiatric condition who receive other specialist disability services. In addition, the predominant service models vary across jurisdictions, and this may affect comparability of data. For example, differences across the states and territories in the predominant model of accommodation support lead to differences in the number of people accessing those services. Caution is recommended in the use or interpretation of performance at the service type level. There is a risk when service type level data is interpreted in isolation as various service types are complementary and the emphasis on different services reflects jurisdictional policy directions. For more information, see *Disability support services 2008-09* and *Disability support services 2009-10* (forthcoming).

Timeliness

CSTDA NMDS 2008-09 and DS NMDS 2009-10

ABS SDAC 2009; Census 2006; Indigenous projected population at 30 June 2008 and 30 June 2009 (projected population is based on data from the 2006 Census)

Accuracy

A potential source of error in the DS/CSTDA NMDS is people for whom Indigenous status is not stated or not collected. For 2009-10, the not stated/not collected rate varied across jurisdictions from a low rate of 0.3 per cent for Australian Government agencies, to a high rate of 13.1 per cent for Northern Territory agencies; the overall rate being 4.2 per cent. For 2008-09, the not stated/not collected rate varied across jurisdictions from a low rate of 0.2 per cent for Australian Government agencies, to a high rate of 12.6 per cent for Victorian agencies; the overall rate being 4.6 per cent. See the accompanying appendix for further details. Not stated or not collected Indigenous status may introduce bias into the results affecting both the accuracy of estimates and the comparability of

estimates across jurisdictions. In addition, a coding audit of the Indigenous status data item has not been undertaken, thus the accuracy of the rate of Indigenous identification in the NMDS is not known.

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

Being a sample survey, estimates from the SDAC 2009 are subject to sampling variability. A measure of the sampling variability, the relative standard error (RSE) percent, was estimated for the age-sex specific rates of severe/profound core activity limitation and can be found in the Accuracy section of the Data Quality Statement for Indicator (c).

The cultural appropriateness for Indigenous people of data collection instruments designed for the total population is not known. Poor cultural sensitivity of data collection instruments is a potential source of non-sampling error which affects the accuracy of Indigenous potential population estimates. The size of this error, if present, cannot be measured.

Potential sources of error in Census include failure to return a Census form or failure to answer every applicable question. Information calculated from Census 2006 data excludes people for whom data item information was not available. Should the characteristics of interest of the people excluded differ from those people included, there is potential for bias to be introduced. In particular for Indigenous estimates, undercounting of Indigenous Australians may introduce bias into the results which would affect the comparability of estimates across jurisdictions. The net Census undercount for all Indigenous Australians was estimated at 11.5 per cent, calculated as the difference between the Census count and estimated Indigenous population on Census night. Estimates of the Indigenous net undercount for all jurisdictions are included below.

Estimated Indigenous net Census undercount

Jurisdiction	Undercount rate per cent
NSW	8.6
Vic.	9.4
Qld	11.6
WA	16.6
SA	8.6
Tas.	8.8
ACT	8.8
NT	16.0

Source: ABS Cat. no. 3238.0.55.001

Quality statements about Census 2006 data items can be found on the ABS website.

For general issues relating to the SDAC, Census and Indigenous Projected Population, refer to ABS data quality statements.

Coherence

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

There are issues with the consistency of the numerator and denominator for this performance indicator, as the numerator and denominator are drawn from differently defined populations and different data sources. These issues reduce the consistency of the performance indicators and lead to quality issues such as cells greater than 100 per cent. For example, the proportion of the 15–24 year old Victorian Indigenous potential population accessing State/Territory delivered disability support services in 2009-10 is reported to be 128.4 per cent (131.6 per cent in 2008-09). A combination of

data quality issues, as discussed in this and previous sections, has led to this impossible figure.

While the numerator is taken from the DS/CSTDA NMDS, the denominator is an estimate derived from SDAC, Indigenous Projected Population and Census data. In the denominator, 'estimated potential population for specialist disability services' is defined as the estimated population with severe or profound core activity limitation. However, this does not match well with the numerator, which consists of people who used specialist disability services. People who used these services do not necessarily have a severe or profound core activity limitation (mobility, communication, or self-care). They may instead have a mild/moderate core activity limitation or limitations in other activities—for example, with working or education. This mismatch is more evident in certain types of services, such as open employment services, which are not necessarily tailored towards people with a severe or profound core activity limitation.

The method used to calculate the Indigenous potential population estimates is the same as that adopted by the Disability Services Working Group for calculation of special needs group indicators for the Report on Government Services 2011.

For general issues relating to the SDAC, Census and Indigenous Projected Population, refer to ABS data quality statements.

Accessibility

The AIHW provides a variety of products that draw upon the DS/CSTDA NMDS. Published products available on the AIHW website are:

- *Disability support services* (annual report)
- *Aboriginal and Torres Strait Islander people with disability*, part of the Indigenous Observatory
- Interactive disability data cubes
- Ad hoc data are available on request (charges apply to recover costs)
- METeOR – online metadata repository
- National Community Services Data Dictionary.

The ABS website provides information and data on the ERP and the Indigenous Project Population, Census Need for Assistance and SDAC profound/ severe core-activity limitation. Detailed data extractions are available through the National Information Referral Service (cost-recovery applies).

Interpretability

Information to assist in interpretation of the performance indicator is contained in the NDA performance indicator glossary, which accompanies these Data Quality Statements.

Supporting information on the quality and use of the DS/CSTDA NMDS are published annually in 'Disability support services' available in hard copy or on the AIHW website (<www.aihw.gov.au>).

Data Quality Statement – Indicator 7: Labour force participation rate for carers aged 15–64 of people with disability

Target/Outcome	Families and carers are well supported.
Performance indicator	Proportion of carers of people with a disability who are in the labour force.
Measure (computation)	**Numerator:** Number of carers aged 15–64 years (carers of people aged 0–64 years with disability) who are in the labour force (employed or unemployed). **Denominator:** Total number of carers (carers of people aged 0–64 years with a disability) aged 15–64 years.
Data source/s	The numerator and denominator for this indicator are drawn from the ABS 2009 Survey of Disability, Ageing and Carers (SDAC).
Institutional environment	SDAC is collected, processed, and published by the Australian Bureau of Statistics (ABS). The ABS operates within the framework of the Census and Statistics Act 1905 and the Australian Bureau of Statistics Act 1975. These ensure the independence and impartiality of the ABS, and the confidentiality of respondents. For more information on the institutional environment of the ABS, including legislative obligations, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see ABS Institutional Environment.
Relevance	The SDAC collects information about primary carers and non-primary carers of people with disabilities. A primary carer is a person who provides the most informal assistance, in terms of help or supervision, to a person with one or more disabilities. The assistance has to be ongoing, or likely to be ongoing, for at least six months and be provided for one or more of the core activities (communication, mobility and self care). In this survey, primary carers only include persons aged 15 years and over for whom a personal interview was conducted. Tables for this indicator are presented for primary, non-primary and all carers. Labour force participation data is collected in the SDAC using the ABS standard 'minimum set' of questions to produce estimates of the current economically active population. Aggregates produced from these questions are designed to be consistent with international concepts of employment and unemployment.
Timeliness	The SDAC is currently conducted every three years over an approx. six month period. Results from the 2009 survey were released in April 2011.
Accuracy	The 2009 SDAC response rate for private dwellings was 89.9 per cent, and for establishments was 90.9 per cent. SDAC data are weighted to account for non-response. The SDAC is conducted in all States and Territories including people in both private and non-private dwellings (including cared-accommodation establishments) but excluding those in gaols and correctional institutions and very remote areas. The exclusion of persons usually resident in very remote areas has a small impact on estimates, except for the Northern Territory, where such persons make up a relatively large proportion of the population. For more information on SDAC scope and coverage, see the

Disability, Ageing and Carers User Guide on the ABS website.

Being drawn from sample surveys, data for this indicator are subject to sampling error. Sampling error occurs because a proportion of the population is used to produce estimates that represent the whole population. Sampling error can be reliably estimated as it is calculated based on the statistical methods used to design surveys.

This indicator has acceptable levels of sampling error (relative standard errors less than 25 per cent) for the larger States for most tables, however data in a number of tables have some RSEs between 25 per cent and 50 per cent (tables 7.2, 7.5, 7.8, 7.11, 7.14, 7.17, 7.20, 7.23, 7.29, 7.38, 7.47 and 7.56), and should be used with caution. Estimates with RSEs greater than 50 per cent are found in tables 7.5, 7.11, 7.14, 7.17, 7.20, 7.23, 7.38 and 7.56. Data with these RSEs are considered too unreliable for general use.

Coherence

The SDAC collects a range of demographic, financial and other information that can be analysed in conjunction with the labour force participation rate of carers of persons with disability.

The labour force information collected in SDAC is designed to be comparable with data collected in the monthly Labour Force Survey and other surveys.

Accessibility

Information is available to aid interpretation of SDAC data - see the Disability, Ageing and Carers User Guide, on the ABS website.

Interpretability

See Disability, Ageing and Carers, Australia: Summary of Findings, 2009 (Cat. no. 4430.0) for an overview of results from the SDAC. Other information from the survey is available on request.

Data Quality Statement – Interim performance indicator 8: Proportion of carers of people with disability accessing support services to assist in their caring roles — restricted carer population

Target/Outcome	Families and carers are well supported.
Performance indicator	Support services for carers.
Key data quality points	**1.** The quality of data about carers varies substantially between jurisdictions; caution should be exercised when interpreting these data. It is recommended that the data be viewed in close conjunction with data quality information, particularly response rates. **2.** DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is untested. **3.** The interim indicator is a proxy measure of carer access to support services based on a restricted carer population: carers of specialist disability service users. The data do not measure access to support services within the entire population of carers of people with disability and it is not known how well it approximates access to services in the wider carer population. Any marked differences across the states and territories in carer access to the disability service system will reduce the usefulness of this interim measure for comparison purposes (i.e. there may be vastly different proportions of carers outside the service system).
Measure (computation)	**1.** Numerator**:** (Interim) Number of disability support service users aged 0–64 years with an informal carer, where the service user accessed services to assist the carer in their caring role, in the reporting period. **2. Denominator:** (Interim) Number of disability support service users aged 0–64 years with an informal carer in the reporting period. **3. Percentage:** R/N x 100 (Interim) where R = number of DS/CSTDA NMDS service users aged 0–64 years with an informal carer, where the service user accessed services to assist the carer in their caring role in the reporting period and N = number of DS/CSTDA NMDS service users aged 0–64 years with an informal carer in the reporting period.
Data source/s	**Numerator and denominator**: DS/CSTDA NMDS. For general issues relating to the NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.
Institutional environment	The AIHW is an Australian Government statutory authority accountable to Parliament and operates under the provisions of the *Australian Institute of Health and Welfare Act 1987*. The AIHW provides expert analysis of data on health, housing and community services. More information about the AIHW is available on the AIHW website. For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.
Relevance	DS/CSTDA NMDS data are generated by processes that deliver services to people. It is assumed that these processes involve the determination of eligibility and the assessment of disability support needs following broadly consistent principles across jurisdictions, although it is known that differing assessment tools are in use across jurisdictions. This assumption is

untested.

For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.

The interim indicator is sourced from CSTDA NMDS 2008-09 and DS NMDS 2009-10 and provides information about the informal carers of people who use specialist disability services. The data collected in the NMDS is a subset of the entire population of carers of people with disability. It should be noted that the DS/CSTDA NMDS counts people with informal carers; it does not count carers. Limited data on carers is available, and the NMDS count of people with carers may not be an accurate measure of the number of individual carers.

For the numerator, services other than those provided under the National Disability Agreement (i.e. outside the DS/CSTDA NMDS) may also assist carers of people with disability in their caring role, such as those provided by the Home and Community Care (HACC) program. These are not included in this interim indicator.

The scope of services provided under the CSTDA/NDA varied across jurisdictions. In Victoria, Queensland and Western Australia (in some cases), specialist psychiatric disability services were provided under the CSTDA/NDA. In all other jurisdictions specific mental health services were funded and provided under health, rather than disability, portfolios. To facilitate comparability of data, specialist psychiatric disability services in Victoria, Queensland and Western Australia are excluded from the NDA performance indicators. That is, the data excludes those who only receive specialist psychiatric disability services, but does not exclude those people with a psychiatric condition who receive other specialist disability services. In addition, the predominant service models vary across jurisdictions, and this may affect comparability of data. For example, differences across the states and territories in the predominant model of accommodation support lead to differences in the number of people accessing those services. Caution is recommended in the use or interpretation of performance at the service type level. There is a risk when service type level data is interpreted in isolation as various service types are complementary and the emphasis on different services reflects jurisdictional policy directions. For more information, see *Disability support services 2008-09* and *Disability support services 2009-10* (forthcoming).

Timeliness

CSTDA NMDS 2008-09 and DS NMDS 2009-10

Accuracy

A potential source of error in the DS/CSTDA NMDS is people for whom carer information is not stated or not collected. Carer identification has improved over time: the not stated/not collected rate for the existence of a carer has decreased from approximately twenty percent for the 2003-04 to 2005-06 NMDS to the current levels of 7.7 per cent for the 2009-10 DS NMDS and 8.5 per cent for the 2008-09 CSTDA NMDS. However, not stated/not collected rates for carer data items vary substantially across jurisdictions, with, for example, rates above twenty five percent for Victoria in 2009-10 and below five percent for Tasmania. The overall not stated/not collected rates for the carer data items were: 11.7 per cent in 2009-10 for carer primary status (11.6 per cent in 2008-09); 11.9 per cent in 2009-10 for carer residency status (12.5 per cent in 2008-09); 9.9 per cent in 2009-10 for carer relationship to service user (8.4 per cent in 2008-09); and 16.8 per cent in 2009-10 for carer age group (19.1 per cent in 2008-09). See the accompanying appendix for further details. Not stated or not collected carer information may introduce bias into the results affecting both the accuracy of estimates and the comparability of estimates across

	jurisdictions. In addition, a coding audit of carer data items has not been undertaken, thus the accuracy of the carer information in the NMDS is not known.
Coherence	Issue of scope: any marked differences across the states and territories in carer access to the disability service system will reduce the usefulness of this interim measure for comparison purposes (i.e. there may be vastly different proportions of carers outside the service system). For general issues relating to the DS/CSTDA NMDS, refer to the DS/CSTDA NMDS Data Quality Statement.
Accessibility	The AIHW provides a variety of products that draw upon the DS/CSTDA NMDS. Published products available on the AIHW website are: • *Disability support services* (annual report) • *Australia's Welfare* • Interactive disability data cubes • Ad hoc data are available on request (charges apply to recover costs) • METeOR – online metadata repository • National Community Services Data Dictionary.
Interpretability	Information to assist in interpretation of the performance indicator is contained in the NDA performance indicator glossary, which accompanies these Data Quality Statements. Supporting information on the quality and use of the DS/CSTDA NMDS are published annually in 'Disability support services' available in hard copy or on the AIHW website (<www.aihw.gov.au>).

Data Quality Statement – performance indicator 10: Proportion of people with disability receiving income support

Target/outcome	People with disability achieve economic participation and social inclusion.
Performance indicator	Proportion of people with a disability receiving income support.
Measure (computation)	**Numerator:** Number of persons with disability aged 16–64 years who receive the Disability Support Pension (DSP) at end of reporting period. **Denominator:** Total number of people with a disability aged 16–64 years on 30 June of the previous reporting period as calculated by using age-sex specific disability prevalence rates from the most recent Survey of Disability, Ageing and Carers (SDAC) multiplied by the ERP.
Data source/s	The numerator for this indicator is provided by the Australian Government Department of Families, Housing, Community Services, and Indigenous Affairs (FaHCSIA), from Centrelink administrative data on DSP recipients as at 30 June 2010. The denominator for this indicator for the total population is calculated using age and sex-specific disability prevalence rates from the 2009 Survey of Disability, Ageing and Carers (SDAC) multiplied by the 30 June 2010 Estimated Resident Population (ERP).
Institutional environment	Payments of the Disability Support Pension (DSP) are made by Centrelink on behalf of FaHCSIA. Under the Commonwealth Services Delivery Agency Act 1997, Centrelink is a statutory agency with responsibility for delivering services and welfare payments, as negotiated with Australian Government departments. DSP data for this indicator is sourced from Centrelink administrative data as at 30 June 2010 and was provided by FaHCSIA. The SDAC is collected, processed, and published by the Australian Bureau of Statistics (ABS). The Estimated Resident Population (ERP) is Australia's official measure of the population and is compiled and published quarterly by the ABS based on data from the Census of Population and Housing; the Post Enumeration Survey (PES); births and deaths statistics from registers administered by the various State and Territory Registrars of Births, Deaths and Marriages; and passenger card data and related information provided by the Department of Immigration and Citizenship (DIAC). Medicare Australia client address data is used to estimate interstate migration. The ABS operates within the framework of the Census and Statistics Act 1905 and the Australian Bureau of Statistics Act 1975. These ensure the independence and impartiality of the ABS, and the confidentiality of respondents. For more information on the institutional environment of the ABS, including legislative obligations, financing and governance arrangements, and mechanisms for scrutiny of ABS operations, please see ABS Institutional Environment.
Relevance	Administrative data on recipients of the Disability Support Pension is the data source for the numerator. Persons with a disability, however, may receive other forms of income support, such as Youth Allowance, or a disability pension paid under the Veterans' Entitlements Act 1986. These other forms of income support are not able to be included in the numerator for this indicator, as presence of disability is not generally part of the eligibility criteria for these payments. It should be noted that the requirements for receipt of a Disability Support

Pension are different to the criteria for being considered to have a disability for the purposes of ABS surveys. To receive Disability Support Pension, persons must be unable to work for at least 15 hours per week, or be re-skilled for such work within two years because of their disability (see Eligibility requirements for Disability Support Pension on the Centrelink web site). In ABS surveys, persons are considered to have a disability if they have a limitation, restriction or impairment which has lasted, or is likely to last, for at least six months and restricts everyday activities. Therefore, the measure of "potential population" for accessing income support provided by the denominator is not the same as the actual population that are eligible for DSP.

The SDAC is the most comprehensive and accurate measure of disability produced by the ABS, using 125 questions to collect information on any conditions people may have, whether these conditions cause restrictions, and the nature and severity of any restrictions.

The methodology for constructing the potential population takes national level age- and sex-specific disability prevalence rates from the 2009 SDAC multiplied by the June 30 2010 ERP in various strata. The potential population is broken down into country of birth groups by taking the country of birth distribution of persons with a core activity need for assistance from the 2006 Census, and applying it to the potential population. This methodology assumes that age- and sex-specific rates of disability are consistent across geography and over time.

Timeliness

Centrelink data on persons who receive the DSP is available on a monthly basis and reported annually by FaCHSIA in the publication Characteristics of Disability Support Recipients.

The SDAC is currently conducted every three years from 2009. Results from the 2009 survey were released in April 2011.

ERP data by State/Territory and sex are prepared quarterly and are available 5-6 months after the reference date. ERP data disaggregated by single year of age and sex are prepared annually as at 30 June each year are also available 5-6 months after the reference date. ERP data disaggregated by age (5 year groups), sex, and Statistical Local Area (SLA) (and aggregations of SLAs) as at 30 June each year are available 9-10 months after the reference date. Disaggregations for geographies that are aggregations of Collection Districts (such as Remoteness Areas), and disaggregations by geography and single year of age are available as customised requests around 13 months after the reference date.

Accuracy

Numerator

Traditional indicators of survey data quality such as sampling error, coverage, and response rate do not generally apply to administrative data. However administrative data may also be subject to various sorts of non-sampling error (such as non-reporting for some fields).

The DSP dataset administered by Centrelink is continually updated. As the data is used to process payments, and the information contained within it is used to determine eligibility for the payment, the dataset is considered to have a high level of completeness. No formal assessment of data quality, however, was undertaken at this time. It should be noted that Indigenous identification for DSP recipients is optional.

Non-response and coverage

The 2009 SDAC response rate for private dwellings was 89.9 per cent, and

for establishments was 90.9 per cent. SDAC data are weighted to account for non-response.

The SDAC is conducted in all States and Territories including people in both private and non-private dwellings (including cared-accommodation establishments) but excluding those in gaols and correctional institutions and very remote areas. The exclusion of persons usually resident in very remote areas has a small impact on estimates, except for the Northern Territory, where such persons make up a relatively large proportion of the population. For more information on SDAC scope and coverage, see the Disability, Ageing and Carers User Guide on the ABS website.

Sampling error

As this indicator is partially drawn from a sample survey, it is subject to some level of sampling error. This error cannot be reliably estimated due to the methodology used in constructing the denominators, however as national level disability rates were used, the sampling error will be small.

Other sources of error

A potential source of error in the construction of the denominators is the assumption that disability rates vary only by age and sex (i.e. that there is no effect of geography, or any other variables). This is likely to affect the reliability of interstate comparisons, however it is not possible at this time to detect the size or direction of the potential bias.

Some unpublished exploratory analysis indicates there may be some data quality issues with using Census Need for Assistance data disaggregated by non-English speaking country of birth. This data feeds into the calculation for the disaggregation of the potential population into Country of Birth groups and may affect comparisons between the different groups.

It should also be noted that the Country of Birth groups are based on a classification devised by the Department of Immigration and Citizenship. This is not an attempt to classify countries on the basis of whether or not English is the predominant or official language of each country. It is a list of the main countries from which Australia receives, or has received, significant numbers of overseas settlers who are likely to speak English. A number of persons from English speaking countries (such as the Bahamas, Bermuda, Belize, and so on) will therefore be classified into "Non-English speaking countries". Conversely, persons from South Africa and Zimbabwe will be classified into "English speaking countries" even though those countries are not predominantly English speaking, and individual immigrants may not be native English speakers.

The combination of administrative and survey data based on different approaches with their own limitations means that interpretation and application of this indicator should be done with caution and an understanding of the systematic influences on the data sets. This indicator does give some sense of coverage of payments but may underestimate some categories and overestimate others.

Coherence

The SDAC collects a range of demographic, financial and other information that can be analysed in conjunction with the disability status of respondents.

Survey based estimates of persons receiving the DSP are available from a number of ABS surveys. Data on income sources in these surveys are as reported by respondents and may be different to numbers provided by Centrelink.

	Disability estimates and the characteristics of the disability population from the SDAC should not be compared with estimates from surveys using the Short Disability Module.
Accessibility	See Disability, Ageing and Carers, Australia: Summary of Findings, 2009 for an overview of results from the SDAC. Other information from the survey is available on request. Annual analysis of the characteristics of Disability Support Pension recipients is published by FaHSCIA.
Interpretability	Information is available to aid interpretation of SDAC data - see the Disability, Ageing and Carers User Guide, on the ABS website.

Data quality statement: CSTDA National Minimum Data Set 2008-09 and 2009-10

Indicators	NDA performance Indicators 3, 6 and 8
Measure (computation)	Not applicable
Data source/s	The Disability Services National Minimum Data Set (DS NMDS; formerly the Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS)). This data set provides annual estimates of the number of people who used specialist disability support services provided under the National Disability Agreement (NDA) from 1 January 2009 (and under the CSTDA 2002–2008). Further information about the DS/CSTDA NMDS is available on the AIHW website.
Institutional environment	All state and territory governments and the Australian Government are required to provide data annually for the DS NMDS, and are responsible for the quality and timeliness of the data. DS/CSTDA NMDS data were provided by both non-government service providers and State/Territory and Australian Government agencies. Service providers collated data in relation to each of their service type outlets providing services under the NDA, as well as the service users who accessed these outlets. A limited number of data items were provided by government agencies. Government agencies compiled, edited and verified the data, and supplied a final data set to the AIHW for further verification, national collation and analysis. The set of privacy and data principles for the DS NMDS collection are outlined in the *Data Guide*, the most recent version of which is available on the AIHW website. The AIHW is an Australian Government statutory authority accountable to Parliament and operates under the provisions of the *Australian Institute of Health and Welfare Act 1987*. This Act ensures that the data collections managed by the AIHW are kept securely and under strict conditions with respect to privacy and confidentiality. More information about the AIHW is available on the AIHW website. When errors are found in published data, those errors are corrected immediately in publications on the AIHW website, and where necessary, in on-line tables and online interactive data cubes. Corrections are documented on the AIHW website
Relevance	The DS/CSTDA NMDS collects data about specialist disability support services according to nationally agreed data definitions. The 2008-09 CSTDA NMDS includes services received, or purchased with, funding under the third CSTDA during the period 1 July 2008 to 31 December 2008, and/or provided under the NDA during the period 1 January 2009 to 30 June 2009. The 2009-10 DS NMDS includes services provided under the NDA during the period 1 July 2009 to 30 June 2010. Data collected in the DS/CSTDA NMDS includes characteristics of specialist disability services provided during the reporting period, the people receiving services and the outlets providing services. Disaggregation by state and territory, Remoteness Area, demographic characteristics, support needs, broad service groups and service types are available. The scope of services varied in terms of programs that were provided under

the CSTDA/NDA across jurisdictions. In particular, the provision of specialist psychiatric disability and early childhood intervention services differed across states and territories. In Victoria, Queensland and Western Australia (in some cases), specialist psychiatric disability services were provided under the CSTDA/NDA. In all other jurisdictions specific mental health services were funded and provided under health, rather than disability, portfolios. To facilitate comparability of data, specialist psychiatric disability services in Victoria, Queensland and Western Australia are excluded from the NDA performance indicators. That is, the data excludes those who only receive specialist psychiatric disability services, but does not exclude those people with a psychiatric condition who receive other specialist disability services. In addition, the predominant service models vary across jurisdictions, and this may affect comparability of data. For example, differences across the states and territories in the predominant model of accommodation support lead to differences in the number of people accessing those services. Caution is recommended in the use or interpretation of performance at the service type level. There is a risk when service type level data is interpreted in isolation as various service types are complementary and the emphasis on different services reflects jurisdictional policy directions. For more information, see *Disability support services 2008-09* and *Disability support services 2009-10* (forthcoming).

Counts of service users are estimates derived using a statistical linkage key. Invalid or incomplete linkage keys mean that it is not possible to fully eliminate multiple counting of service users. This is believed to lead to a slight overestimate of service user numbers. In 2009-10, the proportion of invalid linkage keys was 0.4 per cent, ranging from zero to 1.4 per cent of the total number of service user records in each jurisdiction. In 2008-09, the proportion of invalid linkage keys was 0.4 per cent, ranging from zero to 1.3 per cent of the total number of service user records in each jurisdiction. A small number of invalid linkage keys were recovered for the final data sets by comparison with records from current or previous years.

The process for collecting the statistical linkage key in Victoria leads to a relatively high number of invalid linkage keys and an associated high estimate of service users. In Victoria, the process for collecting service user information is an 'opt-in' approach. All other states and territories follow an 'opt-out' approach in which individuals may elect not to provide their information for the NMDS, however, procedures for opting out of the data collection vary. This affects the comparability of counts of service users across jurisdictions.

Data on service users were not collected for all people who received a CSTDA/NDA-provided service. In particular, service user information was not required to be collected for people who accessed advocacy, information and alternative formats of communication services or 'other support' services including research and evaluation, training and development and peak bodies. In addition, some service types were not required to collect selected service user data items—for example, recreation/holiday programs were only required to collect statistical linkage key data, and disability employment services were not required to collect selected informal carer data items. Of particular note is information collected to enable the determination of need for assistance: some of these data items are not applicable to younger age groups, and some services did not collect these data. The category 'Need for assistance not determined' includes these service users, as well as service users for whom the information was not adequately supplied. For more information, refer to the DS/CSTDA NMDS report, *Disability support services* (published annually).

Timeliness

Data for the DS/CSTDA NMDS are compiled and reported on an annual basis. Data from the 2008-09 CSTDA NMDS were released in January 2011, and revised data will be released on the AIHW website in October 2011. Data from the 2009-10 DS NMDS are due to be released in October 2011. The NDA performance indicators reflect the 2008-09 CSTDA data set as initially confirmed by State/Territory and Australian Government agencies in July 2010 with revisions applied as endorsed by NDIMG in March 2011. The 2009-10 DS data set was confirmed by State/Territory and Australian Government agencies in March 2011.

Accuracy

The DS/CSTDA NMDS aims to provide complete national data on all services provided under the NDA/CSTDA, service type outlets and service users each year. The national response rate for service type outlets is based on the number of service type outlets that responded out of the total number of funded outlets in each jurisdiction (97 per cent in 2009-10 and 96 per cent in 2008-09). It is not possible to calculate a national response rate for service users, as some outlets do not report on all service users due to administrative or other error. In addition, some service types are not required to report service user information.

'Not stated/not collected' rates for individual data items varied substantially across items and jurisdictions. Further information about 'not stated/not collected' rates is available in the accompanying appendix tables.

The 2008-09 CSTDA NMDS data was initially confirmed by State/Territory and Australian Government agencies in July 2010. Some coding errors were subsequently identified and, following NDIMG endorsement in March 2011, revisions were made to the data set. The revised data set was used to produce the 2008-09 performance indicators in this report. The 2009-10 DS NMDS data confirmed by State/Territory and Australian Government agencies in March 2011 were used to produce 2009-10 performance indicators. Any coding errors advised subsequently are reported in *Disability Support Services 2009-10* (forthcoming).

In response to concerns expressed by some jurisdictions, the NDIMG endorsed changes to the DS/CSTDA NMDS processing rules in 2010. These changes were to be effective for the 2008-09 NMDS and future collections, as well as retroactively to the 2007-08 data. The changes involve no longer attempting to match records with either missing sex or an estimated date of birth with existing records within the same year's data or previous years' DS/CSTDA NMDS data. The matching process provided a means by which these not stated or estimated values could be updated based on other records that, given their high match in other items, were assumed to represent the same service user. By no longer performing these functions these records now stand alone, thereby increasing slightly the number of unique service users within the DS/CSTDA NMDS.

Coherence

The DS/CSTDA NMDS consists of a set of nationally significant data items that are collected in all jurisdictions (State/Territory and Australian Government) and an agreed method of collection and transmission. Data items and definitions have remained consistent each year since the launch of the redeveloped national collection in 2002.

Data items are largely based on national community services data standards to enable comparability between collections. Items are also designed to be comparable with other major collections such as the ABS Survey of Disability, Aging and Carers (SDAC) and international standards including the World Health Organization's International Classification of Functioning and Disability (ICF). More information about the design and comparability of CSTDA NMDS data items is given in the AIHW publication *Australia's national disability services data collection: Redeveloping the*

Commonwealth-State/Territory Disability Agreement National Minimum Data Set.

From 1 October 2008, targeted support services previously delivered by the Australian Government and included in the service group 'employment services' were transferred to State/Territory governments and thus recorded as State/Territory delivered disability support services. Targeted support services delivered by the Australian Government are not included in the NDA performance indicators.

In 2008-09 the Department of Education, Employment and Workplace Relations (DEEWR) changed the coding procedures used for data about open employment service users for the 'need for help or supervision with activities or participation in life areas' data items. As a result of these changes caution should be used when comparing the 2008-09 and 2009-10 data in the 'need for assistance with life areas' tables for open employment users with data from previous years, as it is not possible to determine what quantum of change is due to change in characteristics of service users and what quantum of change is due to change in the coding procedures.

Accessibility

The CSTDA NMDS 2008-09 data were released in January 2011. The revised data will be released in October 2011. Data from the 2009-10 DS NMDS are due to be released in October 2011. However, the data may not be provided in the same format as for the performance indicators. Also, the NDA performance indicators are restricted to the age range 0–64 years, whereas DS/CSTDA NMDS data releases include all ages.

Annual reports from the DS/CSTDA NMDS data set are available for free download from the AIHW website. The AIHW also publishes interactive data cubes containing subsets of national information from the 1999 NMDS onwards, which allow people to construct data tables online according to their needs.

DS/CSTDA NMDS data are used for service planning and monitoring in individual jurisdictions, and for reporting national performance indicators. Performance indicators formed part of the accountability measures under the third CSTDA, and were published annually as part of the FaHCSIA publication *Commonwealth State/Territory Disability Agreement annual public report.* The AIHW also released supporting web publications which included these indicator tables in more detail, and these are available on the AIHW website. A set of performance indicators relating to disability which use DS/CSTDA NMDS data is also published annually in the *Report on government services* produced by the Steering Committee for the Review of Government Service Provision (SCRGSP), most recently in 2011 (using 2008-09 data).

Interpretability

Information available to aid the interpretation of DS/CSTDA NMDS data includes the annual DS/CSTDA NMDS Data Guide and the data specifications in METeOR, AIHW's online metadata registry.

Appendix: 'Not stated / not collected' rates

Table A1 'Not stated / not collected' response rates for service user data items in the CSTDA NMDS, by State/Territory, 2008-09 (service users aged 0–64 years)

Data item	*NSW*	*Vic*	*Qld*	*WA*	*SA*	*Tas*	*ACT*	*NT*	*Aus Gov*	*Australia*
Not stated / not collected										
Age	–	–	–	–	–	–	–	–	–	–
Sex	0.1	0.2	0.0	–	0.1	–	–	–	–	0.1
Indigenous status	4.7	12.6	6.6	0.5	4.9	3.4	3.5	10.2	0.2	4.6
Country of birth	6.3	12.6	6.1	3.5	4.6	3.5	4.1	8.5	0.4	5.1
Postcode of usual residence (used to derive Remoteness Area)	0.0	7.4	3.6	0.1	3.1	3.4	1.9	7.2	–	2.2
Need for assistance[a]	20.6	41.8	6.5	4.3	8.3	4.7	11.5	22.3	0.2	14.1
Carer—existence of	11.3	25.5	5.0	3.3	5.0	3.4	4.7	20.4	–	8.5
Carer—primary status	3.0	25.3	2.7	8.4	0.9	0.5	1.7	12.8	22.9	11.6
Carer—residency status	7.3	26.6	2.8	1.3	2.4	2.3	0.9	16.0	24.0	12.5
Carer—relationship to service user (also used to derive carer sex)	8.5	21.6	2.3	1.2	1.8	0.0	1.2	2.1	4.3	8.4
Carer—age group	18.2	35.5	5.6	5.2	7.8	0.7	10.3	4.7	30.0	19.1

a 'Need for assistance' was derived from a number of data items on service user support needs. The 'not stated/not collected' rate for need for assistance includes service users for whom need for assistance was not able to be determined. – Nil.

Glossary

Accommodation support services

Services received under the Commonwealth State/Territory Disability Agreement (CSTDA) or National Disability Agreement (NDA) that provide accommodation to people with a disability and services needed to enable a person with a disability to remain in their existing accommodation or to move to more suitable or appropriate accommodation. These services are classified as follows (For further information, see AIHW 2009):

- Large residentials/institutions (>20 places) (service type 1.01)—Large residentials/institutions are usually located on large parcels of land and provide 24-hour residential support in a congregate setting of more than 20 beds. In some cases a range of residential and vocational/day services, and/or respite services are provided on the one site.
- Small residentials/institutions (7–20 places) (service type 1.02)—Small residentials/institutions are usually located on large parcels of land and provide 24-hour residential support in a congregate or cluster setting of 7 to 20 beds. In some cases a range of residential and vocational/day services, and/or respite services are provided on the one site.
- Hostels (service type 1.03)—Hostels provide residential support in a congregate setting of usually less than 20 beds, and may or may not provide 24-hour residential support. Many are situated in an institutional setting and also have respite beds included on the premises. In contrast to residentials/institutions, hostels usually do not provide segregated specialist disability support services.
- Group homes (<7 places) (service type 1.04)—Group homes generally provide combined accommodation and community-based residential support to people in a residential setting. Usually no more than 6 service users are located in any one house, although this can vary. Group homes are generally staffed 24 hours a day. The agency being funded to provide the service should generally have control of the residence, not just the support to enable the residents to remain in the residence.
- Attendant care/personal care (service type 1.05)—An attendant care program provides for an attendant(s) to assist people with daily activities that they are unable to complete for themselves because of physical, intellectual or any other disability. The service is provided to people to assist them to live in the community, and live on their own.
- In-home accommodation support (service type 1.06)—Support involves individual in-home living support and/or developmental programming services for people with a disability, supplied independently of accommodation. The accommodation may be owned, rented, or otherwise provided, but should be independent of the agency providing the in-home support service.
- Alternative family placement (service type 1.07)—Placements of a person with a disability with an alternative family who will provide care and support. Includes shared-care arrangements and host family placements.
- Other accommodation support (service type 1.08)—Accommodation support services that provide short-term, one-off instances of accommodation such as:
  - accommodation provided so that individuals or families can access specialist services, or further education
  - emergency or crisis accommodation support

– houses or flats for holiday accommodation.

Carer

The definition of 'carer' depends on the scope of the measure and data source:

- Informal carer (of a disability service user)—the CSTDA/Disability Services National Minimum Data Set (DS NMDS) defines an informal carer as a person, such as a family member, friend or neighbour, who provides care and assistance on a regular and sustained basis to a person who uses specialist disability services (AIHW 2009). In this context a co-resident carer is a carer who provides care and assistance to a service user who lives in the same household. A carer is considered to be co-resident if they live in the same household as the service user for four or more days per week on average. A non-resident or visiting carer is a person who provides care and assistance on a regular and sustained basis to a service user who lives in a different household. Note that carers who are arranged by a formal service or who are paid (except through a pension or benefit) are not included in the definition of informal carer. This definition of informal carer applies to performance indicator 8.
- Primary carer (of a disability service user)—the CSTDA/Disability Services NMDS defines a primary carer as an informal carer who provides support in one or more of the following activities: self-care, mobility or communication (AIHW 2009). This definition applies to performance indicator 8.

Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS)

A nationally agreed set of data definitions to describe services provided under the Commonwealth State/Territory Disability Agreement (CSTDA) and an agreed data transmission protocol. Under the CSTDA the Australian Government (Commonwealth) was responsible for the planning, policy setting and management of employment services for people with disability, and the states and territories were responsible for all other disability support services (including accommodation support, community access, community support and respite services) (AIHW 2009). Responsibility for advocacy, information and print disability services was shared between the two levels of government. The 2008-09 CSTDA NMDS includes information about services provided through the CSTDA during the period 1 July 2008 to 31 December 2008 and through the National Disability Agreement (NDA) during the period 1 January 2009 to 30 June 2009.

Note that the NDA replaced the CSTDA on 1 January 2009, and the CSTDA NMDS was renamed the Disability Services (DS) NMDS from 1 July 2009.

Community access services

Services received under the CSTDA/NDA that are designed to provide opportunities for people with disability to gain and use their abilities to enjoy their full potential for social independence. People who do not attend school, or who are not employed full-time mainly use these services. The key features are that the services are flexible and responsive to personal needs and interests; range from educational to leisure and recreational pursuits; range from facility- to home-based activities; include supervision and physical care, and models which link people into activities which are offered to the whole community; range from long-term day support to time-limited and goal-oriented education that maximises personal independent functioning and may complement other community services. These services are classified as follows (For further information, see AIHW 2009):

- Learning and life skills development (service type 3.01)—These programs provide ongoing day-to-day support for service users to gain greater access and participate in community-based activities. Programs

may focus on continuing education to develop skills and independence in a variety of life areas (e.g. self-help, social skills and literacy and numeracy) or enjoyment, leisure and social interaction. They are often called day programs.

- Recreation/holiday programs (3.02)—Recreation services and holiday programs aim to facilitate the integration and participation of people with disabilities in recreation and leisure activities available in the general community. These services may also enhance the capacity and responsiveness of mainstream sport and recreation agencies and community organisations to provide for people with disabilities.
- Other community access (3.03)—Community access services other than those outlined above (i.e. other than service types 3.01 and 3.02). For example, services offering activities designed to improve service users' physical, cognitive and perceptual abilities; encourage self-esteem growth; and provide opportunities to socialise.

Community support services

Services received under the CSTDA/NDA that provide the support need for a person with a disability to live in a non-institutional setting. These services are classified as follows (For further information, see AIHW 2009):

- Therapy support for individuals (service type 2.01)—Specialised, therapeutic care services including occupational therapy, physiotherapy and speech therapy. These services are intended to improve, maintain or slow deterioration of a person's functional performance, and/or assist in the assessment and recommendation of equipment to enable people to perform as independently as possible in their environment.
- Early childhood intervention (service type 2.02)—Support services to assist children up to (but not including) 6 years of age with a developmental delay to integrate with peers into preschools and the wider community.
- Behaviour/specialist intervention (service type 2.03)—These include the range of services relating to the management of challenging behaviours, including dangerous antisocial behaviour. Services include intensive intervention support, training and education in behaviour management, and consultancy services for other professionals.
- Counselling (individual/family/group) (service type 2.04)—Services that provide counselling to individuals, families or groups.
- Regional resource and support teams (service type 2.05)—Regional resource and support teams are generally inter-disciplinary teams that provide a combination of services in the service type categories 2.01, 2.02 and 2.03, that cannot be broken down into the component parts. Regional resource and support teams may also assist service users to access mainstream services and/or support mainstream-funded agencies. Except for early childhood intervention teams, these teams usually have an individual, rather than a family, focus.
- Case management, local coordination and development (service type 2.06)—This is a broad service type category, including elements of individual or family-focused case management and brokerage, as well as coordination and development activity within a specified geographical area. Services assist people with disabilities to maximise their independence and participation in the community through working with the individual, family and/or carers in care planning and/or facilitating access to appropriate services.
- Other community support (service type 2.07)—Community support services other than those outlined above.

Core activities	The three core activities are communication, mobility and self-care. These are also referred to as 'activities of daily living'.
Core activity limitation (ABS definition)	The ABS defines a core activity need for assistance as a profound or severe disability, that is, people needing help or assistance in one or more of the three core activity areas of self-care, mobility and communication, because of a disability (lasting six months or more), long term health condition (lasting six months or more) or old age (ABS 2006a). Self care, mobility and communication are defined as core activities. The ABS defines levels of core activity limitation as follows: mild, where a person has no difficulty with self care, mobility or communication, but uses aids or equipment; moderate, where a person does not need assistance, but has difficulty with self care, mobility or communication; severe, where a person sometimes needs assistance with self care, mobility or communication; and profound, where a person is unable to perform self care, mobility and/or communication tasks, or always needs assistance.
Country of birth groups	An 'English proficiency index'—a standard tool developed by the Bureau of Immigration, Multicultural and Population Research—was used to classify countries into five categories based on English proficiency: one group for people born in Australia, and four groups for those born overseas (AIHW 2009; DIMA 2003). For those born overseas, groupings are based on the typical ability of migrants from each country to speak English. Countries with the most skilled English speakers, on average, are in English Proficiency Group 1, which is referred to as 'other English speaking countries' in the performance indicators. This group consists of Canada, Ireland, New Zealand, South Africa, the United Kingdom, United States of America, and Zimbabwe. All other countries (English Proficiency Groups 2–4) are referred to as 'non-English speaking countries'.
Disability (ABS definition)	A person has a disability if he or she has a limitation, restriction or impairment, which has lasted, or is likely to last, for at least six months and restricts everyday activities. These activities include: loss of sight (not corrected by glasses or contact lenses); or an aid to assist with, or substitute for, hearing is used; speech difficulties; shortness of breath or breathing difficulties causing restriction; chronic or recurrent pain or discomfort causing restriction; blackouts, fits, or loss of consciousness; difficulty learning or understanding; incomplete use of arms or fingers; difficulty gripping or holding things; incomplete use of feet or legs; nervous or emotional condition causing restriction; restriction in physical activities or in doing physical work; disfigurement or deformity; mental illness or condition requiring help or supervision; long-term effects of head injury, stroke or other brain damage causing restriction; receiving treatment or medication for any other long-term conditions or ailments and still restricted; or any other long-term conditions resulting in a restriction. See 'core activity limitation'.
Disability Services National Minimum Data Set (DS NMDS)	See entry for Commonwealth State/Territory Disability Agreement National Minimum Data Set. The 2009-10 DS NMDS includes information about services provided through the NDA during the period 1 July to 30 June 2010.
Need for assistance	In the CSTDA/Disability Services NMDS, information is collected about each service user's frequency of need for personal help or supervision in nine life areas: activities of daily living (self-care, mobility and communication); activities of independent living (interpersonal interactions and relationships; learning, applying knowledge and general tasks and demands; and domestic life); and activities of work, education and community living (education, community (civic) and economic life; and working). In performance indicators 3, 6 and 8, need for assistance is based on the

person's highest reported need for help or supervision according to the following categories:

- Activities of daily living (ADL): This includes people who sometimes need help or supervision, or are unable to do or always need help or supervision with one or more ADL (communication, mobility and self-care). These correspond to the three core activity areas reported in the SDAC and in the 2006 Census of Population and Housing. Service users recorded as always or sometimes requiring assistance with ADL in the NMDS are conceptually similar to people reported as having a severe or profound core-activity limitation in the SDAC.
- Activities of independent living (AIL) or activities of work, education and community living (AWEC) but not with ADL: This includes people who sometimes need help or supervision, or are unable to do or always need help or supervision with AIL or AWEC (interpersonal interactions and relationships; learning, applying knowledge and general tasks and demands; education; community (civic) and economic life; domestic life; working). This category excludes people who sometimes or always need assistance with ADL. The AWEC category is collected and analysed for service users aged 5 years or over.
- No need for help or supervision: This category includes people who do not need help or supervision for each of the nine life areas, including those who use aids and/or equipment.
- Level of assistance not determined: This category includes people whose need for assistance was 'not stated', 'not collected' or 'not applicable (due to age)'.

Results of need for assistance data items in the NMDS should be evaluated with regard to data quality, including 'not stated' rates. It should be noted that some service providers may not be in a position to accurately assess a person's support needs in all life areas. Furthermore, some consider it an infringement of privacy principles to collect information that is not directly required for service provision.

'Not stated' responses

In performance indicators 3, 6 and 8, 'not stated' responses from the Disability Services NMDS include cases where the data item was not required to be collected.

Open employment services (service type 5.01)

Services received under the CSTDA/NDA that provide employment assistance to people with a disability in obtaining and/or retaining paid employment in the open labour market. For more information, see AIHW 2009.

People with disability

ABS SDAC population—In the ABS SDAC, a person is considered to have a disability if they report that they have a limitation, restriction or impairment, which has lasted, or is likely to last, for at least six months and restricts everyday activities (ABS 2010). This includes:

- loss of sight (not corrected by glasses or contact lenses)
- loss of hearing where communication is restricted, or an aid to assist with, or substitute for, hearing is used
- speech difficulties
- shortness of breath or breathing difficulties causing restriction
- chronic or recurrent pain or discomfort causing restriction
- blackouts, fits, or loss of consciousness
- difficulty learning or understanding
- incomplete use of arms or fingers
- difficulty gripping or holding things
- incomplete use of feet or legs
- nervous or emotional condition causing restriction

- restriction in physical activities or in doing physical work
- disfigurement or deformity
- mental illness or condition requiring help or supervision
- long-term effects of head injury, stroke or other brain damage causing restriction
- receiving treatment or medication for any other long-term conditions or ailments and still restricted
- any other long-term conditions resulting in a restriction.

People with severe/profound core activity limitation

There are four levels of core-activity limitation (profound, severe, mild, moderate), which are based on whether a person needs help, has difficulty, or uses aids and equipment with any of the core activities (communication, mobility and self-care) (ABS 2010). A person's overall level of core-activity limitation is determined by their highest level of limitation in these activities. In the ABS SDAC, a person with profound limitation is unable to do, or always needs help with, a core activity task. A person with severe limitation sometimes needs help with a core activity task, has difficulty understanding or being understood by family or friends, and/or can communicate more easily using sign language or other spoken forms of communication.

Potential population

The potential population for disability services is an estimate of the number of people who are likely to require a disability service at some time. In these performance indicators, the potential population is the estimated number of people aged under 65 years with profound or severe core activity limitation. This is calculated as follows:

- Indicator 3—the potential population was calculated by applying the age-sex severe/profound core activity limitation rates from the SDAC 2009 to the Estimated Resident Population at the beginning of the reporting period by State/Territory by age group by sex.
- Indicator 6—The Indigenous potential population is calculated by applying adjusted age-sex severe/profound core activity limitation rates from the SDAC 2009 to the State/Territory by age group by sex Estimated Indigenous Resident Population at the beginning of the reporting period. The SDAC 2009 age-sex rates will be adjusted by rate ratio of Indigenous core activity need for assistance to all persons core activity need for assistance as calculated from the 2006 Census of Population and Housing.

Remoteness Areas

Information on people's location is presented using Remoteness Areas. The Remoteness Areas are structured on the Australian Standard Geographical Classification (ASGC) developed by the ABS (ABS 2006); categories include Major Cities, Inner Regional, Outer Regional, Remote, and Very Remote Areas. These areas are based on the Accessibility/Remoteness Index of Australia (ARIA), and are structured to provide an indication of the degree of remoteness (or distance) from major urban centres.

- In the CSTDA/Disability Services NMDS, a service user's Remoteness Area was calculated based on their residential postcode. Remoteness Area was calculated based on the ASGC 2009 classification (ABS 2009).

In the ABS SDAC 2009, the ASGC 2006 Collection Districts were used (ABS 2006). The Remoteness Areas were derived by calculating the average ARIA index value for each Collection District and applying the ASGC 2006 Remoteness Area criteria. Very Remote Areas were excluded from the scope of this survey. As a result, remoteness data is presented as Major Cities, Inner Regional and Outer Regional/Remote.

Respite services

Respite services provide a short-term and time-limited break for families

and other voluntary caregivers of people with disability, to assist in supporting and maintaining the primary care giving relationship, while providing a positive experience for the person with disability.

- Own home respite (service type 4.01)—Respite care provided in the individual's own home location.
- Centre-based respite/respite homes (4.02)—Respite care provided in community setting similar to a 'group home' structure and respite care provided in other centre-based settings.
- Host family respite/peer support respite (4.03)—Host family respite provides a network of 'host families' matched to the age, interests and background of the individual and their carer. Peer support is generally targeted at children or young adults up to 25 years of age, and matches the individual with a peer of similar age and interests, usually for group activities. Usually provided on a voluntary basis.
- Flexible respite (4.04)—Respite services that offer any combination of own home and host family/peer support respite (service types 4.01 and 4.03). Includes respite where day outings and camping trips are taken (where the primary purpose is respite). Flexible respite to meet an individual's needs may include brokerage for respite, only when the funding dollars come from respite resources.
- Other respite (4.05)—Respite services other than those outlined above (i.e. other than 4.01–4.04), including crisis respite and holidays for the person with the disability where the primary intention of the service is to provide respite support (rather than primarily a holiday experience) and the service user is generally separated from their usual support arrangements, e.g. family.

SDAC populations

The ABS SDAC has two components – the household component and the cared-accommodation component. The household component covers people in

- Private dwellings such as houses, flats, home units, townhouses, tents and other structures used as private places of residence at the time of the survey.
- Non-private dwellings such as hotels, motels, boarding houses, education and religious institutions, guest houses, construction camps, short-term caravan parks, youth camps and camping grounds, including staff quarters, and self-care components of retirement villages.
- Smaller disability group homes (with fewer than six people) were considered to be private dwellings.

In this context, people in the household component of the survey are referred to as the 'household population'.

The cared-accommodation component covered residents of hospitals, nursing homes, hostels and other homes such as children's homes, who had been, or were expected to be, living there or in another health establishment for three months or more.

Support services that assist in the caring role

This includes services specifically aimed at providing relief from the caring role (such as respite), along with services for the service user/person with disability which have a secondary effect of carer respite and which give the carer an opportunity to pursue their other interests and activities as a by-product of providing support to the person they provide care to (such as day programs). The following three categories of services from the CSTDA/Disability Services NMDS are classified as 'support services that assist in the caring role' (For more information, see AIHW 2009):

- In-home accommodation support
  - Attendant care/personal care (service type 1.05)—An attendant care program provides for an attendant(s) to assist people with daily

	activities that they are unable to complete for themselves because of physical, intellectual or any other disability. The service is provided to people to assist them to live in the community, and to live on their own. – In-home accommodation support (1.06)—Support involves individual in-home living support and/or developmental programming services for people with a disability, supplied independently of accommodation. The accommodation may be owned, rented, or otherwise provided, but should be independent of the agency providing the in-home support service. • Community access services—See 'community access services' glossary entry. • Respite services—See 'respite services' glossary entry.
Supported employment services (service type 5.02)	Services received under the CSTDA/NDA that provide employment opportunities and assistance to people with disabilities to work in specialised and supported work environments. For more information, see AIHW 2009.
Survey of Disability, Ageing and Carers (SDAC)	This ABS survey aimed to measure the prevalence of disability in Australia; measure the need for support of older people and those with a disability; provide a demographic and socio-economic profile of people with disabilities, older people and carers compared with the general population; and estimate the number of and provide information about people who provide care to older people and people with disabilities (ABS 2010). More information about the scope and methodology of the survey is available on the ABS website. The most recent SDAC for which results are available was conducted in 2009.
Targeted support services (service type 5.04)	Targeted support services provide people with disability structured training and support to work towards social and community participation or opportunities to develop skills, or retrain, for paid employment. These services were transferred to State/Territory governments on 1 October 2008.
